GENERAL INFORMATION

LOCATION

The University of Illinois is situated in Urbana-Champaign, in Champaign County, about fifty miles northeast of the geographical center of the State.

The campus of the University lies partly within the corporate limits of the city of Urbana and partly within the corporate limits of the city of Champaign. The two municipalities form one community of about thirty thousand inhabitants. The railway, express, telegraph, and telephone services of both cities are available for the University, and a sub-station of the Urbana post office is located in the University Library Building.

HISTORY

The University was incorporated by an act of the General Assembly, February 28, 1867, as the Illinois Industrial University. This action was taken following the act of Congress known as the "Morrill Land Grant," whereby the national government gave each state in the Union public land scrip equal to 30,000 acres for each senator and representative in Congress, "for the endowment, support, and maintenance of at least one college whose leading object shall be, without excluding other scientific and classical studies, and including military tactics, to teach such branches of learning as are related to agriculture and the mechanic arts. * * * * * in order to promote the liberal and practical education of the industrial classes in the several pursuits and professions of life."

The institution was placed under the control of a Board of Trustees, consisting of the Governor, the Superintendent of Public Instruction, and the President of the State Board of Agriculture, members *ex officio*, and twenty-eight citizens appointed by the Governor. The chief executive officer was called the Regent, and was made *ex officio* a member of the Board and presiding officer of both the Board of Trustees and the Faculty. In 1873 the number of members was reduced to eleven—the Governor and the President of the State Board of Agriculture, *ex officio*, and nine others, who were still appointed by the Governor. Since this time also, the President of the Board has been chosen by the members from among their own number for a term of one year. In 1887, a law was passed making membership in the Board elective at a general State election and restoring the Superintendent of Public Instruction as a member *ex officio*. There were then, therefore, three *ex officio* and nine elective members. In 1917, the General Assembly passed a law reorganizing the administration of the State. By virtue of this law, on January 1, 1919, the office of the President of the State Board of Agriculture was abolished. There are now, therefore, eleven members, two *ex officio* and nine elective.

In 1885, the General Assembly changed the name of the institution from the Illinois Industrial University to the University of Illinois.

The office of executive head of the institution has been held by six persons: Dr. John Milton Gregory, Regent from 1867 to 1880; Dr. Selim Hobart Peabody, Regent *pro tempore* from 1880 to 1881 and Regent from 1881 to 1891; Dr. Thomas Jonathan Burrill, Acting Regent from 1891 to 1894; Dr. Andrew Sloan Draper, President from 1894 to 1904; Dr. Edmund Janes James, President from 1904 to 1920; and Dr. David Kinley, Acting President from 1919 to 1920, and President since 1920.

The University opened on March 2, 1868. The number of students enrolled was fifty; the faculty consisted of the Regent and two professors. During the first term another instructor was added, and the number of students increased to 77—all men.

During the first term instruction was given in algebra, geometry, physics, history, rhetoric, and Latin. During the autumn of 1868 a chemical laboratory was provided, and laboratory work in botany was begun the following year. In January, 1870, a mechanical shop was equipped with tools and machinery, and here was begun the first shop instruction given in any American university.

On March 9, 1870, the Trustees voted to admit women as students. In the year 1870-71, twenty-four availed themselves of the privilege. Since that time they have constituted from one-sixth to one-fifth of the total number of students.

According to the original State law, the usual diplomas and degrees could not be granted by the University; certificates showing the studies pursued and the attainments in each were given instead. The certificates proved unsatisfactory to the holders, and in 1877 the legislature gave the University authority to confer degrees and issue diplomas.

In addition to the original endowment, Congress has made provision for the Land Grant institutions by the second Morrill act of 1890 (\$25,000 a year); the Adams act of 1900 (\$15,000 a year for research and experimental work); and the Nelson act of 1907 (\$25,000 a year).

The General Assembly in 1911 passed a law providing for a mill tax to provide a fund for the maintenance and operation of the University, thus inaugurating a policy of definite partial provision for the institution.

In 1892, graduate work was undertaken under the name of the Graduate School. In 1907, the General Assembly appropriated \$50,000 for the Graduate School, and the Executive Faculty of that school was organized. The first summer session was held in 1894. The department of music became the School of Music in 1897. The work in law was organized as the School of Law in 1896—the name being changed to the College of Law in 1900. The General Assembly made a special appropriation in 1900 to establish courses of training for business life, and the Trustees organized the Courses in Business Administration, which in 1915 became the College of Commerce and Business Administration. In 1905, the Trustees established a School of Education, which became the College of Education in 1918. The School of Railway Engineering and Administration was created in 1907, following the establishment in 1906 of the department of railway engineering. The General Assembly in 1909 established the department of mining engineering. In 1913, the College of Literature and Arts and the College of Science were united to form the present College of Liberal Arts and Sciences.

Experimental work and research in agriculture and the related sciences was begun at an early date. In 1888, the Agricultural Experiment Station of the University of Illinois was founded, and in 1903 the Engineering Experi-

ment Station was established. Similar organizations on a smaller scale are the Bureau of Educational Research (1918) and the Bureau of Business Research (1921). The facilities for scientific research have been increased by the location at the University of certain State organizations, including the State Laboratory of Natural History (1885), the State Water Survey (1897), the State Entomologist's Office (1899), merged with the Laboratory of Natural History to form the State Natural History Survey in 1917; and the State Geological Survey (1905).

The Chicago College of Pharmacy, founded in 1859, became the School of Pharmacy of the University of Illinois in 1896. The College of Physicians and Surgeons of Chicago was affiliated with the University under a lease in 1897, but this arrangement proved unsatisfactory and was discontinued in 1912. In 1913, the stock and assets of the College of Physicians and Surgeons of Chicago were presented to the University, and the College of Medicine was reopened in that year. The School of Dentistry, which was organized as a department of the College of Medicine in 1901, became the College of Dentistry in 1905. It was closed with the College of Medicine in 1912 and was reopened in 1913.

In 1897, the School of Library Economy, established in 1893 at the Armour Institute of Technology in Chicago, was transferred to the University, the Director of that school was appointed Librarian of the University, and the Library School was opened.

The building contains class and consultation rooms, seminar libraries, conference rooms, research rooms, the Museum of Classical Art and Archeology, and the Museum of European Culture.

The Physics Laboratory (erected 1909) is a three-story fireproof brick building trimmed with Bedford limestone. The main lecture room seats 262. There are large laboratories and recitation rooms, and thirty smaller laboratories for advanced experimental work. Gas, distilled water, compressed air and vacuum, and direct and alternating electric currents of a wide range in amperes and in volts are available in all parts of the building.

The Chemistry Laboratory (erected 1901-2; addition 1914-15) is of brick. The original structure is of slow burning construction, and the addition is fireproof. In the basement two flumes, together with a storage reservoir having a capacity of 7,000 gallons, provide for the measurement and storage of water.

The Laboratory of Applied Mechanics (erected 1901-2) is a brick building containing the materials testing laboratory and the hydraulics laboratory.

The Highway Laboratory (erected 1910) is a two-story brick addition to the Mechanical Engineering Laboratory. It contains the laboratories and recitation rooms and offices of the department of civil engineering which are associated with the work of testing materials used in road construction and with research in the development of such materials.

The Mining Engineering Laboratory (erected 1912) is a one-story brick building. It is divided into five units: Coal washing and preparation; ore-dressing and metallurgy; mining, including blasting and explosives; chemical analysis and sampling; gas analysis, safety lamps, and ventilation.

The Ceramic Engineering Building (erected 1915-16) is a three-story structure, of fireproof construction, built of texture brick and polychrome terra cotta. The front of the building is decorated with colored tile panels. The roof is of Spanish tile, and the floor of the halls and corridors of clay tile. The building houses the work in ceramic engineering and the State Geological Survey.

The Agricultural Building (erected 1900) consists of four separate structures, built around a court and connected by corridors. The court was enclosed in 1912 and divided into class rooms. The main building contains offices, class rooms, and laboratories for the departments of agronomy, animal husbandry, dairy husbandry, and horticulture; the chemistry laboratory of the Experiment Station; administration rooms; and assembly room (Morrow Hall) with a seating capacity of 500. Of the other three buildings, one is used for dairy manufactures, one for farm crops, and one for class rooms and laboratories.

The building contains the Law Library, reading rooms with accommodations for over one hundred persons, the library stack, the librarian's office, offices for members of the law faculty, administrative offices, and class rooms.

The Armory (erected 1914-15) comprises a drill room with a clear area of 200 by 400 feet and a height of 98 feet at the center, the roof being carried

by fourteen three-hinged steel arches. The sides are of hollow tile and the ends, supported by columns, are of steel, glass, tile, and concrete, with wood frames and sashes. The drill floor is of sufficient area to permit the maneuvering of an entire battalion of the cadet brigade.

The Armory Annex is a temporary one-story building used as the military headquarters. It contains both offices and classrooms.

The Smith Memorial Hall (erected 1918-19) is a fireproof building of brick and stone, occupied by the School of Music. The building contains plenum chambers, machinery, and dressing rooms, the Director's offices, class rooms, studios, the recital hall, the Memorial Room dedicated to the donor, Captain Thomas J. Smith and his wife, Tina Weedon Smith, to whom the building is dedicated, and the Library, with a score trial room, eleven studios, forty-seven practice rooms, and a small lecture room. All studios and practice rooms are sound-proofed.

The Administration Building (erected 1914-15) is a three-story fireproof building of brick and stone. The building contains the rooms of the Board of Trustees and the offices of the President, the Registrar, the Comptroller, the Supervising Architect, the Dean of Men, the High School Visitor, the Alumni Association, the University Press, and the Information Office.

The Library (erected 1896-97; additions 1914 and 1918) is modern Romanesque in style, with a tower 132 feet high, and is built of Minnesota sandstone. The building houses the work of the library and of the Library School.

The Auditorium (erected 1907-8) is a brick and stone building for general meeting purposes. It contains an auditorium seating 2,000, a memorial vestibule, and a four-manual organ.

The Men's Gymnasium (erected 1901) is a three-story building of stone and pressed brick. This building contains a swimming pool, lined with white enamel bricks; general locker room, shower and steam baths; rooms for the University athletic teams; a room for visiting teams; a dressing room for members of the faculty; and offices for the physical director and the instructors in athletics, a large room fitted with modern appliances for gymnastic exercises, and an elevated running track, 15 laps to the mile.

The Gymnasium Annex (erected 1889-90) has a clear floor space of 15,000 square feet in one hall, while the addition (erected 1918) gives an additional area of about 7,500 square feet.

The Woman's Building (erected 1905) is in the New England colonial style of architecture, of brick and stone. This building houses the offices of the Dean of Women, women's rest rooms, parlors, the offices, class rooms, laboratories, cafeteria, and model apartment of the department of Home Economics, and the offices, gymnasiums, and swimming pool of the department of Physical Education for Women.

The Women's Residence Hall (erected 1917) is located on Nevada Street north of and adjacent to the recreation field for women. It is a three-story fireproof brick and stone building of colonial design. It will accommodate 150 girls. There are both double and single rooms, a suite for the matron, and rooms for servants. The basement contains the kitchen and dining room in each wing overlooking the sunken garden in the court. In the center of the first floor is a living room with adjoining parlors. A large sleeping porch occupies the south end of each wing on each floor.

The President's House (acquired in 1917) is located at 1203 W. Nevada Street, Urbana.

The Health Service Building (erected 1896) is a three-story frame building, in the colonial style, originally built for the President's house.

The Isolation Hospital (erected 1908) has been used as a hospital since 1914. It is a one-story stucco building, with a subsidiary service building providing a kitchen and additional ward space. The basement contains a supply room, a laboratory, and a complete disinfecting suite. The main floor is divided into three separate ward units, each with a capacity of seven beds and having a nurse's room with bath, a diet kitchen, a linen closet, a bath room, and a private room for use as an observation room or for serious cases.

The Central Heat and Power Plant (old boiler house erected 1902; new boiler house, 1910 and 1914). The new boiler house is equipped with six 500-horsepower B. & W. boilers with chain grates. The power plant contains a 250-kilowatt Allis-Chalmers direct connected steam engine and dynamo, a 500-kilowatt Westinghouse turbo-generator, and a 100-kilowatt Curtiss turbo-generator. The pipe lines of the heating system and the circuits for distributing electricity are carried from the central plant to the buildings through brick and concrete tunnels and clay and concrete conduits.

The Pumping Station of the University water-works is a brick building, connected with the central heating station. Seven artesian wells supply the University with water. A masonry reservoir provides for a fire-reserve supply. The pumps, tanks, and connections are arranged to give opportunities for experimental work, and also to vary the working conditions in the adjacent hydraulics laboratory. In this building is kept the equipment of the University fire department, including a hose and chemical wagon.

The University Garage (erected 1922-23) is a one-story brick building housing the University automobiles.

BUILDINGS IN CHICAGO

The College of Medicine Building, in which are housed all the departments except that of anatomy, is a brick and stone structure five stories high, fronting on three streets. It contains three lecture rooms with a seating capacity of two hundred each; a clinical amphitheatre with a seating capacity of over three hundred; an assembly hall with a seating capacity of seven hundred; and recitation rooms. It also contains laboratories for physiology, chemistry, materia medica, therapeutics, and microscopical and chemical diagnosis, each accommodating from fifty to one hundred students.

A three-story annex to the main building contains the pathology, bacteriology, and chemistry laboratories. These laboratories have outside light and are furnished with work tables, desks, lockers, and apparatus. There is a supply of microscopes, lenses, and oil immersions, and a projection apparatus for the illustration of lectures by stereopticon views.

Research Library and Laboratory Building (erected 1922-23) is a five story and basement fireproof structure of brick with limestone trimming with a three-story library wing, and is of the Gothic style of architecture. It is a unit of the group being erected by the University and the State, and houses research laboratories and the Medical Library. The building contains photographic rooms, book stacks, locker room, large reading room, offices, and research rooms. This building is connected by a passage way to the Research and Educational Hospital.

The College of Dentistry, adjoining the College of Medicine, occupies a separate six-story building, fronting on two streets. This building contains three amphitheatres, a clinical operating room, an infirmary, recitation rooms, the laboratories of gross anatomy and of prosthetic and operative dentistry, administrative offices, three dental depots, and four special laboratories, for research in histology and pathology, for anatomical modeling, for porcelain work, and for instructional and diagnostic work in radiography.

The School of Pharmacy.—In December, 1915, the University purchased for the School the property located at the corner of Wood and Flournoy streets and comprising eight city lots with two large brick buildings, connected by a fireproof central stairway tower. The new quarters were occupied in June, 1916.

The buildings include two substantial brick structures connected at each floor by a stair-tower building. The larger contains the offices, the library, the museum, the microscopical laboratory, the bacteriological laboratory, an auditorium, a lecture hall, a recitation room, preparation rooms and private laboratories for the teachers, student's rooms, and locker rooms. The smaller building contains pharmaceutical laboratories, the laboratory for quantitative analysis, the laboratory for qualitative analysis and several private laboratories for the teachers, as well as store rooms and supply rooms. The stair-tower building, of fireproof construction, provides the students' entrance, stairways to each floor, corridors, toilets, and rooms for the hydrogen sulphide generator and the distilled water supply.

A number of departmental libraries and reading rooms are maintained in various buildings on the campus. In some instances they are primarily for the use of the graduate students and advanced undergraduates.

Mason Library of Western History.—The library of western history collected by Edward G. Mason, Esq., long president of the Chicago Historical Society, is in the Public Library of the city of Champaign, and is accessible to students in the University.

MUSEUMS AND COLLECTIONS

Art.—A collection of casts, photographs, and engravings presented to the University in 1876 by citizens of the community has, for want of a suitable gallery, been placed in different buildings on the campus. Eight large statues are in the Auditorium foyer. Numerous pieces are now in the studios of the department of art and design in University Hall, and others are in the corridors and class rooms of University Hall, Lincoln Hall, Natural History Hall, and the Library. A collection of German and Japanese prints purchased by the department of art and design from the St. Louis Exposition in 1905 is displayed in the rooms of the department.

Other collections of value to art students, consisting of a number of casts of Moorish, Spanish, and German ornament and miscellaneous casts, models, prints, and drawings, are placed in the studios and corridors of the department of Art and Design.

Classical Archeology and Art.—This museum is located in rooms 402, 404, and 406 Lincoln Hall, and contains casts and photographs of Greek and Roman sculpture; colored reproductions of ancient painting; many objects from the finds of the Egypt Exploration Fund, received through the generosity of Mr. W. G. Hibbard, Jr., of Chicago; numerous ancient coins, thirty Greek papyri; and other originals of models of Greek and Roman antiquities. About 2,200 photographs exhibit important historic sites and

archeological remains, and in addition there are available 1,900 slides belonging to the department of classics.

European Culture.—This museum is in rooms 401, 403, 405, and 409 Lincoln Hall. It contains casts of Romanesque, Gothic, and Renaissance sculpture; color reproductions of paintings, including the rare Pol de Mont reproductions of early Netherland masterpieces; originals and facsimiles of medieval manuscripts, early printed books, and early maps of the world; originals and reproductions of arms and armor; original Paleolithic and Neolithic antiquities, with selected reproductions of the Bronze and Iron Ages and of the Merovingian period; theatre models and prints of theatres and actors; peasant costumes; ship models; historical groups made by Dwight Franklin; originals and reproductions of early wood carving, early church ivory carving and metal work; Delft ware collected by Mrs. John Milton Gregory and given by her daughter; carbon prints of cathedrals and other photographic material; about 350 coins; reproductions of runic inscriptions, early musical instruments, and other objects.

Oriental Museum.—This museum occupies room 410 Lincoln Hall. Among its collections are 1,700 unpublished cuneiform tablets, the majority from Drehem, Umma, and Larsa, dating from the twenty-ninth to the twentieth century B. C., the others from the period of Nebuchadnezzar; Babylonian seals; fragments of Assyrian and Babylonian bricks with royal inscriptions; pottery, slate palettes, mummy case fragments, mummified sacred birds, and small objects from Egypt, the gift of Mr. W. G. Hibbard, Jr., of Chicago; Egyptian alabasters; squeezes or paper impressions of Hittite and Assyrian inscriptions, loaned by Dr. B. B. Charles of Philadelphia; squeezes of Phoenician inscriptions; pottery and pottery fragments representing the survey of two hundred ancient sites in the Near East; objects from Palestine, including two Hebrew manuscripts, models of domestic furniture, pottery, and prehistoric implements, and a number of unpublished photographs of the Near East.

The Museum of Natural History, on the second and third floors of the Natural History building, contains modern exhibits in zoology and geology, including such topics as classification, evolution, variation, geographic distribution, habitat relations, commercial use of natural resources, archeology, ethnology, and American Indians. Special exhibits include the Greenland Eskimo material obtained by the Crocker Land Expedition and the archeology of the Cahokia Mound Builders, obtained by the recent explorations carried on by the University. The research collections number upwards of 500,000 specimens, and are indicated in the departmental descriptions below.

Botany.—The herbarium contains over 100,000 sheets of mounted specimens. It is representative of the higher plants and fungi of Champaign County and of the State, and forms a collection for the general flora of the United States. The herbaria of Brendel, Welsch, Schneck, Andrews, and of Mrs. Agnes Chase, are valuable for students of the Illinois flora. Because of the interest of the late Professor Burrill and his special students, Clinton, Earle, Seymour, and others, in the study of parasitic fungi, the part of the herbarium devoted to the representation of plants of this group is rich in material records of investigation, to which has been added the Stevens collection of Porto Rican fungi, fourteen thousand numbers. The published "exsiccatae" in this group are well represented. The Mrs. Mary S. Snyder

set of the *Phycotheca Boreali-Americana*, representing over 2,000 named species, has increased the value of the herbarium for students of algae.

Entomology.—The entomology collections of the University include a series of 6,400 specimens, representing 1,600 common species; the Bolter collection, which contains 120,000 specimens representing 16,000 species, and the Mason collection containing about 50,000 specimens. The department has access, also, to the insect collections of the State Laboratory of Natural History, which contain 330,000 pinned insects and 26,000 vials and bottles of specimens in alcohol, mainly from Illinois.

Geology.—This collection illustrates the principal phases of geology, including 10,000 hand specimens of rocks, 3,000 thin sections for microscopic study, over 12,000 minerals, and 60,000 fossils, exhibits of gems and precious stones, meteorites, polished ornamental stones, and specimens illustrating geologic structures, and the principal types of rocks, minerals, and fossils. The collections available for advanced students include those of Tyler McWhorter, Hertzner, the greater part of the specimens collected both privately and for the State Geological Survey by A. H. Worthen, the Carr and Daniels collection of coal plants and animals from Mazon Creek, and the Baker collection of Pleistocene invertebrates.

Geography.—The geography collection consists of a complete file of the United States topographic maps; a collection of U. S. Geological Survey folios; combined contour maps representing the physiographic provinces of the United States; a collection of foreign topographic maps; rainfall and vegetation maps; relief models of all the continents and of smaller areas; and several thousand lantern slides.

Zoology.—The zoology collections present a synoptical view of the zoology of the State. The mounted mammals include a collection of the ruminants of the United States and representatives of the other orders of Mammalia except the Sirenia. The same orders are also represented by mounted skeletons. There are also a collection of mounted birds; the Barnum collection of bird's eggs; nests and eggs of Illinois birds; mounted skins of larger species of cold-blooded vertebrates, both terrestrial and marine; mounted skeletons of typical representatives of the principal groups; alcoholic specimens; casts; alcoholic specimens of all classes and orders of Mollusca, and dissections showing the internal anatomy of typical forms; several thousand shells, belonging to more than 2,000 species (the collection of the Illinois aquatic species is nearly complete); several hundred dried specimens and alcoholics, and a series of Blanschka glass models of the lower invertebrates; several sets of Ziegler wax models and series of sections and other preparations showing the embryology of vertebrates and invertebrates. The study collections include the Nason, Daniels, Hinkley, and Baker collections of Mollusca, embracing about 250,000 specimens representing upwards of 7,000 species.

The collections of the State Laboratory of Natural History are available for illustrative purposes, as well as for original investigation by advanced students.

Commerce and Business Administration.—For its courses in industrial economics and commerce the University has a collection of the materials in commerce, showing the various stages in production, from the raw materials to the finished articles; lanterns and several hundred slides; political and industrial maps; and diagrams and stereoscopic views illustrating phases of commerce and industry.

Engineering.—The departments of the College of Engineering maintain collections of materials drawn from their respective fields of practice. The Department of Architecture has a number of reproductions of fragments from architectural monuments. The Department of Ceramic Engineering has a collection of modern wares representing various types of bodies, glazes, and methods of decoration. The Departments of Civil Engineering and Theoretical and Applied Mechanics maintain exhibits of tested specimens and structures. The Department of Mechanical Engineering is the custodian of a 600 h.p. vertical triple-expansion engine, directly connected to an electric generator, a type of machine in common use for power station service twenty years ago, and numerous machines of historical value, with a collection of exhibits of engineering apparatus. In the mining museum is a collection of models showing the methods of working coal and ore mines and both sectionalized and operating mining machines, and appliances. Collections of photographs and blue prints illustrate all phases of mining and metallurgical design and construction. This department has also collections of specimens of ores, coals, non-metallic minerals, and metallurgical products. The Department of Railway Engineering maintains exhibits of track rails typifying practice since the beginning of railway construction; many details employed in car and locomotive construction, historic and modern; and an extensive collection of photographs and prints. The Engineering library has about 4,800 lantern slides. The Ricker Library of Architecture includes also 15,000 mounted photographs and 11,000 lantern slides.

Agriculture.—The agricultural departments maintain collections illustrative of their work. The collections include specimens of standard varieties of corn; wax models of fruit and vegetables; a horticulture herbarium; specimens of breeds of live stock; a collection of farm machinery; and exhibits of negatives and samples showing the progress of investigations with fruit, crops, and soils.

Library School Collection.—The School has made a collection of books and pamphlets on library science; library reports, bulletins, and catalogs; mounted samples showing methods of administration in libraries; book-plates; books, photographs, and lantern slides on library architecture and the history of books, printing, and libraries.

ADMINISTRATION

GOVERNMENT

The government of the University is vested by law primarily in a Board of Trustees, consisting of eleven members. The Governor of the State and the Superintendent of Public Instruction are members *ex officio*. The other nine members are elected by the people of the State for terms of six years; the terms of three members expire every second year.

The administration of the University is vested by the Board of Trustees in the President of the University, the Provost, the Senate, the Council of Administration, the Faculties of the several colleges, the Deans of the colleges, and the Directors of the schools.

The President is the administrative head of the University.

The Senate is composed of all officers of full professorial rank and those other members of the faculty who are in charge of separate departments of the various colleges and schools. It is charged with the direction of the general educational policy of the University.

The Council of Administration is composed of the President, the Dean of the Graduate School, the Deans of Men and Women, and the Deans of the several colleges. It constitutes an advisory board to the President, and has exclusive jurisdiction over all matters of discipline. The Council does not determine educational policy; but when any matter arises which has not been provided for by common usage or by rule of the Senate and cannot be conveniently laid over until the next meeting of the Senate, the Council may take action according to its discretion.

The Faculties of the colleges and schools of the University, composed of the members of the corps of instruction of these colleges and schools, have jurisdiction, subject to higher University authority, over all matters which pertain exclusively to these organizations.

The Dean of the Graduate School, the Deans of the several colleges, and the Directors of the schools are responsible for the carrying out of all University regulations within their respective departments.

DEPARTMENTS AND CURRICULA

For the purpose of administration the University is divided into several colleges and schools. These are not educationally separate, but are interdependent and form a single unit. The list follows:

- I. The College of Liberal Arts and Sciences
- II. The College of Commerce and Business Administration
- III. The College of Engineering
- IV. The College of Agriculture
- V. The College of Education
- VI. The College of Law
- VII. The School of Music
- VIII. The Library School
- IX. The School of Railway Engineering and Administration
- X. The Graduate School
- XI. The College of Medicine
- XII. The College of Dentistry
- XIII. The School of Pharmacy

ADMISSION

An applicant for admission to any of the colleges or schools of the University must be at least sixteen years of age except that the Council of Administration may admit on petition a student over fifteen years of age but less than sixteen who meets the requirements for admission and who is to reside when he enters the University with his parents or guardians, or with some one chosen by them. Candidates for admission to the College of Dentistry (Chicago), and to the School of Pharmacy (Chicago), must be seventeen years of age.

Women are admitted to all departments on the same terms as men.

Students are admitted to the professional departments in Chicago (Medicine, Dentistry, and Pharmacy) only at the beginning of the first semester (during the first ten days of October); they can enter the College of Engineering to best advantage at the opening of the school year in September. In all other cases they should enter if possible at the beginning of the semester.

Scholarship Requirement for Non-Illinois Students.—An applicant for admission to the University who is not a legal resident of Illinois will be required to present with his application for admission to any of the colleges or schools of the University, except as a special student or as a student in the Graduate School, satisfactory evidence that he maintained at the school or college from which he would enter the University of Illinois a scholastic average at least ten percent above the passing grade of such school or college. In case of records which are not kept in numerical grades but in literal or other systems of grading, this requirement will be interpreted to mean an average of one grade above the passing grade; e.g., in a system of A, B, C, and D, with D as the passing grade, the average must be C.

The Undergraduate Colleges.—Fifteen units of secondary school work in acceptable subjects must be offered by every candidate, and *no conditions are permitted*. A unit represents the work of 180 recitation periods of forty minutes each, or the equivalent in laboratory or other practice.

The subjects and credits required by the University for admission to the various curricula in the undergraduate colleges and schools for the year beginning September 1, 1924, are given on the following page.

(For the requirements for the academic year 1923-24 see the Annual Register for 1922-23.)

Whenever two units of language are required both units must be in the same language.

It is desirable that students who intend to pursue curricula involving college mathematics, physics, or advanced chemistry, or those in which university courses in mathematics are prescribed, should present for admission *one-half unit of advanced algebra* in addition to the required unit common to all.

Attention is called to a requirement effective in September, 1924, that in any curriculum in which less than 15 hours of laboratory science are required a student who enters without at least one unit of laboratory science shall be required to substitute 5 hours of a laboratory science for 5 hours free electives in the requirements for graduation.

Candidates for the curriculum in athletic coaching must pass physical and medical examinations.

The subjects listed in the preceding table as required by the University for admission to the various colleges, schools, and curricula are those which are considered essential preparation for college work and without which the student may not be admitted. In order to assist prospective students to select courses in high school which will give most effective preparation for later work in college, there are presented below lists of additional subjects which are strongly recommended. In planning his work the prospective student should endeavor to include these subjects in his curriculum.

1. *The College of Liberal Arts and Sciences.*

For the curricula in chemistry, chemical engineering, and home economics—physics, one unit.

For the pre-medical curriculum—two units in laboratory science (physics, chemistry, botany, and zoology).

For all other curricula—foreign language, one or two units, in addition to the units prescribed; history and civics, two units; laboratory science, one unit.

SOURCES OF ACCEPTABLE CREDITS

The credits required for admission to the undergraduate departments, as detailed above, may be secured:

- (a) By *certificate* from an accredited high school or other secondary school.
- (b) By *examination*.
- (c) By *transfer* from another university or college of recognized standing.

(A) ADMISSION BY CERTIFICATE

A candidate for admission *by certificate* must be a *graduate* of an accredited school.

An applicant *who has attended but who has not been graduated* from an accredited school must pass entrance examinations in the following subjects, amounting to 5 units:

English composition	1 unit
Algebra	1 unit
Additional subjects to be designated by the University authorities.....	3 units
<i>Total</i>	<u>5 units</u>

The remaining 10 units necessary to make up the 15 units required for admission may also be made in entrance examinations or may be offered by certificate from an accredited school.

Blank certificates for students wishing to enter the University by *certificate* from an accredited high school or academy may be had of the Registrar. They should be obtained early and should be filled out and sent to the Registrar for approval as soon as possible after the close of the high-school year in June. Certificates received at the University after September 3 (in 1924) will be held until the arrival of the students unless such certificates are accompanied by an addressed envelope with a special delivery stamp.

Accredited Schools.—The High School Visitor of the University visits and inspects, on request, high schools and other preparatory schools throughout the State. On the basis of his reports, approved by the Committee on Accredited Schools and by the Council of Administration, the University accredits all work which is found to be sufficiently well done. For a list of accredited schools, address the High School Visitor. Not all the schools named in this list are accredited for the same amount of work or all for the same subjects. A student presenting a certificate from any one of these schools will be given entrance credit for all the subjects named therein *for which the school is specifically accredited as shown in the certificate of its accredited relation issued to the school by the University.*

Entrance credits will also be accepted on certificate from the following sources:

1. From schools accredited by the North Central Association of Colleges and Secondary Schools.
2. From schools accredited to the state universities which are included in the membership of the North Central Association of Colleges and Secondary Schools, provided the certificate shows that the Illinois standard time requirements have been met.
3. From schools accredited by the Southern Association of Colleges and Secondary Schools.

4. From schools approved by the New England College Entrance Certificate Board.

5. From high schools and academies registered by the Regents of the University of the State of New York.

6. From the state normal schools of Illinois and other state normal schools having equal requirements for graduation.

Foreign Students.—Candidates for admission who come from foreign countries should bring complete official credentials. Certificates from Oriental and Slavic countries must be accompanied by certified translations. On arriving at the University foreign students should consult with the Assistant Dean of Foreign Students, Room 152, Administration Building.

(B) ADMISSION BY EXAMINATION

The University Entrance Examinations.—Entrance examinations are given at the University in Urbana (in Room 100, Commerce Building) three times in each year: in September, immediately before the opening of the fall semester; in January and February, shortly before the opening of the spring semester; and in July, during the Summer Session. Similar examinations are given in Chicago five times in each year, about March 15, June 15, August 15, September 15, and December 15. These examinations cover substantially all the subjects required or accepted for admission. Programs may be obtained by addressing the Registrar.

The Examinations of the College Entrance Examination Board.—The certificate of the College Entrance Examination Board, showing a grade of 60 percent or higher, will be accepted for admission in any subject in the lists on pages 60 and 61 in the amounts there specified as being acceptable. These examinations will be held during the week of June 17-24, 1924.

All applications for examination must be addressed to the Secretary of the College Entrance Examination Board, 431 West 117th Street, New York, N. Y., and must be made on a blank form to be obtained from the Secretary of the Board on application.

Applications for examination at points in the United States east of the Mississippi River, and at points on the Mississippi River, must be received by the Secretary of the Board at least three weeks in advance of the examinations, that is, on or before Monday, May 27, 1924; applications for examination at points in the United States west of the Mississippi River or in Canada must be received at least four weeks in advance of the examinations, that is, on or before Monday, May 20, 1924; and applications for examinations outside of the United States or Canada must be received at least six weeks in advance of the examinations, that is, on or before Monday, May 6, 1924.

Applications received later than the dates named will be accepted when it is possible to arrange for the admission of the candidate concerned, but only on payment of \$9.00 in addition to the usual fee.

The examination fee is \$9.00 for all candidates examined at points in the United States or Canada, and \$20.00 for all candidates examined outside of the United States and Canada. The fee should be remitted by postal order, express order, or draft on New York to the order of the College Entrance Examination Board and should accompany the application.

A list of the places at which examinations are to be held by the Board in June, 1924, will be published about March 1. Requests that the examina-

tions be held at particular points, to receive proper consideration, should be transmitted to the Secretary of the Board not later than February 1.

The New York Regents' Examinations.—Credits will be accepted, also, from the examinations conducted by the Regents of the University of the State of New York.

(C) ADMISSION BY TRANSFER OF ENTRANCE CREDITS FROM OTHER COLLEGES OR UNIVERSITIES

A person who has been admitted to another college or university of recognized standing will be admitted to this University upon presenting a certificate of honorable dismissal from the institution from which he comes and an official statement of the subjects upon which he was admitted to such institution, provided it appears that the subjects are those required here for admission or real equivalents. No substitutes will be accepted for the subjects *prescribed* by the University for all colleges or for individual colleges except that a student who comes from a college or university rated in Class A by the Committee on Admissions from Higher Institutions, with a record of thirty hours without failures or conditions and with an average grade ten percent above the passing grade of the college, may be matriculated irrespective of deficiencies in prescribed subjects.

Admission to Advanced Standing.—After matriculation, an applicant may secure advanced standing either by examination or by transfer of credits.

1. *By examination.*—Advanced standing is granted only by examination unless the applicant is from an approved school. Examinations for advanced standing are given without fee if taken within 60 days after matriculation; if taken later, a fee of \$5.00 is charged for each examination.

2. *By transfer of credits.*—Credits may be accepted for advanced standing from another university or a college or a junior college of recognized standing or from a state normal school. In general it is unwise for a student to enter a specialized curriculum at the university as late as the beginning of the senior year. An applicant for advanced standing by transfer must present a certified record of work done in the institution from which he comes, accompanied by a summary of his preparatory work and by a letter of honorable dismissal. Students intending to transfer to the University of Illinois should send their credentials to the Registrar as early in the summer as possible.

Students in large number enter the University each year after completing one, two, or even three years at other universities and the colleges of the State. In recognition of this situation the University is cooperating cordially and sympathetically with the higher institutions in the State in their endeavor to coordinate their work with that of the University. In order that definite information may be had in advance in regard to the credit which may be allowed from a specific institution, the University, in conference with the colleges, has adopted certain standards for accrediting and has classified the higher institutions within the State in accordance with the manner in which they are able to meet these standards. Students from the colleges which have met these standards in full upon entering the University receive hour for hour credit but in applying for a degree will be expected to conform to all the prescriptions and limitations as to credit announced for their chosen curriculum.

The Registrar of the University will, on application, gladly furnish full information in regard to the transfer from Illinois colleges.

Admission as Unclassified Students.—Persons over twenty-one years of age may be admitted as unclassified students in the undergraduate colleges, provided they secure (1) the recommendation of the instructor whose work they wish to take, and (2) the approval of the dean of the college concerned. They must give evidence that they possess the requisite information and ability to pursue profitably, as unclassified students, their chosen subjects, and must meet the special requirements for the particular college in which they wish to enroll, as stated below.

An unclassified student is not matriculated and must pay a tuition fee of \$7.50 a semester in addition to the regular incidental fee of \$25.00 a semester if a resident of the State, or of \$37.50, if a non-resident.

No one may enroll as an unclassified student in any school or college of the University for more than two years, except by special permission, application for which must be made through the dean of the college.

A person registered as an unclassified student in one college and desiring to take a course in another college of the University must obtain the approval of the dean of the latter college.

For the *College of Liberal Arts and Sciences* the University requires a written application, accompanied by official certificates, indicating the character and extent of the applicant's preparatory work, and showing honorable dismissal from the school last attended. In order that action may be taken on such applications before registration they should be presented at least one week before the beginning of the semester.

For the *College of Engineering* the University requires that applicants for admission as unclassified students shall satisfy the entrance requirements in mathematics and English (one and one-half years of algebra, one year of plane geometry, one-half year of solid geometry, one year of English composition, and two years of English literature).

For the *College of Agriculture* the University will receive non-matriculants twenty-one years old or over, provided that if deficient in English, as measured by the requirements for matriculation, they shall arrange to carry English as one subject until that deficiency is made good; and provided further, in the case of men, that they shall have at least two years of experience in practical agriculture.

For the *College of Law* the University has a regulation providing that no credit earned by an unclassified student in the College of Law may be counted toward a degree in law.

Deficiencies.—Students may not enter with a deficiency in preparatory work. The full requirements as stated above must be presented before the applicant may enter.

No-Credit Course in Rhetoric for Deficient Students.—Early in the first semester the Department of English determines by a series of tests, including the writing of several compositions, the grade of each student's preparation to pursue the freshman work in rhetoric, and places those students who are found to be insufficiently prepared in a special course for which no credit is given.

THE PROFESSIONAL SCHOOLS

College of Education.—For admission to the two-year professional curricula in the COLLEGE OF EDUCATION, leading to the degree of Bachelor of Science in education, a candidate must be able to matriculate in one of the under-

graduate colleges and must offer in addition *60 semester hours* of college credit (exclusive of military science.)

(For the requirements for the undergraduate curricula in Athletic Coaching and Industrial Education in this College, see above).

College of Law.—For admission to the *three-year curriculum* in the COLLEGE OF LAW as a regular student an applicant must be matriculated and have 60 hours' credit in a college of this University; or have completed two full years of work as given at another college or university of recognized standing, as a matriculated student in such college or university; or have received by transfer 60 hours of university credit here.

For admission to the *four-year curriculum* in the COLLEGE OF LAW an applicant must have completed 60 hours of work, exclusive of physical education and military, in a college of this University, or at another college or university of recognized standing.

Library School.—Admission to the LIBRARY SCHOOL is conditioned on the presentation of credentials showing that the applicant holds a bachelor's degree in arts or science from the University of Illinois or has had other equivalent training.

Application blanks for admission may be secured from the Director of the School, and these, filled out, should be filed, with documentary material showing qualifications for admission, generally not later than August 1. It is to the candidate's interest to present his application and certificates early, in order that the question of admission may be settled before he comes to Urbana.

For admission as an *unclassified student* to the Library School a written application is required, accompanied by official certificates, indicating the character and extent of the applicant's preparatory and college work. In order that action may be taken on such applications before registration day, they should generally be presented not later than one month in advance. It is the practice to admit as *unclassified students* only those persons who, tho unable to meet the requirements for entrance, are substantially prepared for thoro and advanced work. Such persons must present evidence of possessing the information and ability to pursue the chosen subjects profitably. They must also present some substitute for the requirements for entrance, such as approved library or teaching experience or foreign travel. Preference will be given to those engaged in library work, especially in Illinois libraries. Such students are expected to take the regular curriculum, or, failing that, as much of the prescribed work as they are prepared for.

College of Medicine (Chicago).—For admission to the COLLEGE OF MEDICINE, candidates must present:

1. Four years' work in an accredited high school or the equivalent, comprising not fewer than 15 units in acceptable subjects, including prescribed subjects as follows:

English	3 units
Algebra	1 unit
Plane geometry	1 unit
Latin, Greek, German, or French (both units in the same language).....	2 units
History and civics	1 unit
Electives	7 units
<i>Total</i>	15 units

2. Two years' work in a recognized college or university, comprising not less than 60 semester hours, and including prescribed subjects as follows:

NOTE 1: BIOLOGY.—Four of these 8 semester hours must consist of laboratory work. This requirement may be satisfied by a course of 8 semester hours in either general biology or zoology, or by courses of 4 semester hours each in zoology and botany, but not by botany alone.

NOTE 2: GERMAN, FRENCH, SPANISH, OR ITALIAN.—German or French is preferred. The student is strongly urged to secure a reading knowledge of one of these languages. This will ordinarily require at least two years' work in the high school followed by at least 6 hours' work in the same language in college, or two years' work (at least 12 hours) in college if the language was not begun in the high school, or the equivalent.

NOTE 3: ELECTIVES.—As desirable electives the following subjects are suggested: psychology; college algebra and trigonometry; additional English; economics, history, sociology, political science; logic; Latin, Greek; drawing. Among the free electives advanced chemistry, zoology, and botany may be offered.

Students registered in the medical curriculum.—The seven year medical curriculum offered by the University (p. 194) consists of two years of pre-medical work at Urbana, including the subject requirements stated above, two years of pre-clinical work in the College of Medicine in Chicago (for these four years a B.S. degree may be given), two years of clinical work in the College of Medicine at Chicago, and one year as an interne in a hospital approved by the University. The registration of students at Urbana who have completed the requirements of the first two years of the medical curriculum (the pre-medical work) and who have done in residence at the University at least two semesters of such curriculum is continued in the College of Medicine subject to the following conditions:

1. The student who wishes thus to continue his work in the University must signify his intention to the Registrar on a form provided by him not later than March 1 of the year in which he purposes to continue his work in the Chicago department, if he is to complete his pre-medical work in June. If the work is to be completed in the Summer Session, the form referred to must be filed by July 1.

2. The student must comply with the general regulations for registration in the University in the medical course. This includes the payment of fees in advance.

3. A student who is on probation in the University at the time of continuing his University registration in the Chicago departments will be continued on probation.

No conditions are permitted.—Candidates for admission who, in June, 1924, will have completed the above requirements except for a few hours in collegiate subjects should plan to make up these deficiencies in full by attendance at summer sessions during the summer of 1924.

College of Dentistry (Chicago).—For admission to the COLLEGE OF DENTISTRY, candidates must present:

1. Four years' work in an accredited high school or the equivalent,

comprising not fewer than 15 units in acceptable subjects, including prescribed subjects as follows:

School of Pharmacy (Chicago).—The requirements for the SCHOOL OF PHARMACY are the same as those for the undergraduate colleges at Urbana with respect to *high-school graduation*, the *number of units required*, the *acceptable subjects*, and the *prescribed subjects* (see pages 58 and 59).

The required fifteen units may be summarized as follows:

I. Prescribed subjects	
English (composition and literature)	3 units
Algebra	1 unit
Plane geometry	1 unit
II. Electives (general electives, not more than 4 units from List C)	10 units
<i>Total</i>	15 units

GRADUATE SCHOOL

Admission to the Graduate School may be granted to graduates of institutions whose requirements for the bachelor's degree are substantially equivalent to those of the University of Illinois. A graduate of an institution meeting the requirements of a standard college (see p. 64) may be admitted to the Graduate School, provided he satisfies the Dean and the departments concerned that he will be able to proceed to the master's degree in a period not exceeding two years. *Admission to the Graduate School does not, however, imply admission to candidacy for an advanced degree, and gives no right or claim to be so admitted. Such candidacy is determined by the Faculty after the student has demonstrated by his work here, for from two to five months, that he has the ability to do major work of graduate character. A mere accumulation of "credits" or "grades" is not sufficient.*

DESCRIPTION OF SUBJECTS ACCEPTED FOR ADMISSION

The amount of work in each subject which corresponds to the minimum number of credits assigned is shown by the description of subjects below. (See statement of work required for credit of one unit, page 58.)

1. AGRICULTURE.—A course in agriculture may be accepted for one unit of entrance credit, and two such courses may be accepted for two units,

if the work covered by each course is so related in its parts as to constitute one of the accepted divisions of agricultural work. At least half the time must be devoted to laboratory work.

2. **ALGEBRA, *One and one-half units.***—Fundamental operations, factoring, fractions, simple equations, extraction of roots, radicals, quadratic equations and equations reducible to quadratic form, surds, theory of exponents, proportion and variation, logarithms, and the analysis and solution of problems involving these principles.

ALGEBRA, *One unit.*—Fundamental operations, factoring, fractions, simple equations, extraction of roots, radicals of second order, fractional exponents, variation and proportion, quadratics, including completing the square and simultaneous equations having one quadratic and one linear equation and quadratic systems of simple form.

3. **ASTRONOMY.**—A knowledge of the descriptive matter in a good text-book, and familiarity with the geography of the heavens, with the various celestial motions, and with the positions of the conspicuous naked-eye heavenly bodies.

4. **BOOKKEEPING.**—A knowledge of double entry bookkeeping, with emphasis on business transactions and their interpretation in the ledger accounts, through books of original entry; simple trading and profit and loss statements and balance sheets, and explanation of the meanings of the items involved. The work must be done under the immediate supervision of a teacher, and should amount to at least ten periods in class each week for one academic year.

5. **BOTANY.**—Acquaintance with the general structure of plants and of the principal organs and their functions, derived from a study of the objects, is required; also knowledge of the main groups of plants and the ability to classify and name the more common species. Laboratory note-books and herbarium collections must be presented.

6. **BUSINESS LAW.**—The amount of business law accepted is indicated by the scope of any of the ordinary text-books on the subject, such as Spencer's *Elements of Commercial Law*, Burdick's *Business law*, and White's *Elements of Commercial Law*.

7. **CHEMISTRY.**—Text-book and laboratory work so arranged that at least half of the time shall be given to the laboratory. The laboratory notes, bearing the teacher's indorsement, must be presented as evidence of the actual laboratory work accomplished. Candidates may be required to demonstrate their ability by laboratory tests.

8. **CRIVICS.**—The high-school course for one term should deal mainly with American government (local, state, and national), political institutions, and citizenship. Such text-books as Ashley, Forman, and Garner indicate the field required. A full year's high-school course may give attention to social problems.

9. **COMMERCIAL ARITHMETIC.**—The amount of work required is shown by any of the ordinary texts, such as Smith's, Finney's, Bookman's, Rowe's "New Essentials," Thurston's, and Baker's. Instructors should constantly emphasize the relation of arithmetic to business customs and procedures.

10. **COMMERCIAL GEOGRAPHY.**—The amount and character of the work accepted is covered in such books as Whitbeck's *High School Geography*, Smith's *Commerce and Industry*, Brigham's *Commercial Geography*, and Robinson's *Commercial Geography*.

11. DOMESTIC SCIENCE.—(a) An equivalent of 180 hours of prepared work with at least two recitation periods a week in foods. (b) An equivalent of 180 hours of prepared work with at least one recitation period a week in clothing. (c) An equivalent of 180 hours of prepared work with at least two recitation periods a week on the home. (Two periods of laboratory work are considered equivalent to one period of prepared work.) Either (a) or (b) or (c) will be accepted for one unit; or one-half unit may be accepted in each of these divisions. Where two years are offered, it is desirable that one semester in the second year be devoted to the home. (c) may be accepted as a third unit, providing it is given substantially as outlined in the Syllabus of Domestic Science and Domestic Art published by the University and that (a) and (b) are made prerequisite for it.

12. DRAWING.—Freehand or mechanical drawing, or both. Drawing books or plates must be submitted. The number of credits allowed depends on the quantity and quality of the work submitted.

13. ECONOMICS.—The principles of economics, with economic history, as given in any good elementary text-book.

14. ENGLISH COMPOSITION AND RHETORIC.—Spelling, punctuation, grammar, sentence structure, and paragraphing, and ability to write with considerable accuracy and effectiveness; knowledge of the application of grammatical terms and ability to state the essential principles of grammar and to explain the grammatical structure of sentences. The student is supposed to know the elementary principles of rhetoric, the technical terms used, and the application of the principles to ordinary composition. The degree of proficiency expected in grammar, rhetoric, and composition can hardly be acquired in less than one period each week for four years. During at least half of this time the student should have written compositions under supervision and have received individual criticism of his written work. A review of grammar and some supervised composition in the fourth preparatory year are strongly advised.

15. ENGLISH LITERATURE.—(a) Each candidate is expected to have read certain assigned literary masterpieces. With a view to a large freedom of choice, the books provided for reading are arranged in the following groups from which at least ten units are to be selected, two from each group. Each unit is here set off by semicolons.

(b) In addition to the foregoing the candidate will be required to present a careful, systematic study, with supplementary reading, of the history of either English or American literature.

(c) The candidate will be examined on the form and substance of certain books in addition to those named under (a). For 1924 the books will be selected from the list below. The examination will be of such a character as to require a minute study of each of the works named. The list is:

Note-books and drawings must be presented to show the character of the work done and the animals studied. The drawings are to be made from the objects themselves, not copied from illustrations, and the notes are to be a record of the student's own observations of the animals examined. The student should have accurate knowledge of the external anatomy of each of eight or ten animals distributed among the larger divisions of the animal kingdom, and should know something of their life histories and of their adaptations to environment. Special attention should be given to a study of the living animal. The names of the largest divisions of the animal kingdom, with their distinguishing characteristics, and with illustrative examples selected from familiar forms, ought also to be known.

GRADUATION—FIRST DEGREES

A bachelor's degree is conferred on any student who satisfactorily completes the curriculum described under one of the various colleges and schools, doing either the first three years, or the last year, of his work in residence at the University.

A candidate for a bachelor's degree must pass in the subjects marked *prescribed* in his chosen curriculum, and must conform to the directions given in connection with that curriculum in regard to electives. In the College of Liberal Arts and Sciences (for the A.B. degree), the College of Commerce and Business Administration, and the College of Agriculture, credit for 130 hours is required for graduation. In the curricula in chemistry and chemical engineering in the College of Liberal Arts and Sciences, in the College of Engineering, in the College of Law, in the Library School, and in the School of Music, the candidate must complete the curriculum as laid down.

In order to receive his bachelor's degree a student must have secured grades not lower than C in subjects aggregating at least three-fourths of the work, prescribed or elective, required for such degree. The system of grading is as follows: A, excellent; B, good; C, fair; D, poor (but passing); E, failure.

The number of hours required includes, for men, four in military drill and tactics and two in physical education; and for women, one in hygiene and four in physical education. Men excused from the military requirements, and women who do not take the course in physical education, must elect instead an equivalent number of hours in other subjects.

In all cases in which a thesis is required,¹ the subject must be announced not later than the first Monday in November, and the completed thesis must be submitted to the dean of the proper college by June 1. The work must be done under the direction of the professor in whose department the subject belongs, and must be in the line of the curriculum for which a degree is expected. The thesis must be presented on regulation paper; it is deposited in the library of the University.

The annual commencement exercises are held in June, but degrees may be conferred at other times as follows:

Students who complete their work at the end of the first semester may, on application, be recommended for their degree at the February meeting of the Senate.

Students who are to complete their work for the bachelor's or the master's degree in the Summer Session, and who register in advance of the June meeting of the Senate for specified courses in that session which complete the requirements in their cases, may be recommended at the June meeting, subject to the successful completion of the specified courses in the Summer Session.

Students who complete their work at the end of the Summer Session may, on application, be recommended at the October meeting of the Senate.

¹See requirements for graduation in the various colleges.

All graduates are ranked as of the class of the calendar year in which their degrees were conferred, i.e., students who receive their diplomas in August or October, with the class of the preceding June, and those who receive their diplomas in February, with the class of the following June.

A student who has already received one bachelor's degree may receive a second bachelor's degree, provided that all specified requirements for both degrees be fully met, and provided also that the curriculum offered for the second degree include at least 30 semester hours not counted for the first degree.

HONORS AND PRIZES

UNIVERSITY HONORS

By the following system of honors, the University gives public official recognition to such students as attain a high grade of scholarship.

Preliminary Honors are assigned at the completion of the sophomore year on the basis of the grades received during the freshman and sophomore years in all studies except military and physical training. To be eligible a student must have received grades of A in at least fifty percent and must not have received grades of C or lower in more than fifteen percent of the work in which honors are sought. Preliminary Honors afford an opportunity for sophomores to secure recognition for high scholarship without waiting for graduation.

Final Honors (*Candidates for the Degrees of B.S., B.Mus., LL.B., and B.L.S.*) are assigned on graduation on the basis of the grades received during the junior and senior years. To be eligible a student must have received grades of A in at least fifty percent and must not have received grades of C or lower in more than fifteen percent of the work in which honors are sought. Final honors especially favor students whose preparatory education has been so imperfect as to prevent them from receiving preliminary honors.

Special Honors are awarded at the close of the senior year. No student may receive such honors who has not completed, before the beginning of his senior year, at least twenty hours' work in the subject, or group of allied subjects, in which the honors are sought; he must complete thirty hours' work in the same subject, or group of allied subjects, by the end of his senior year, must do such other work as the professor in charge may assign, and must prepare an acceptable thesis. No student is eligible for special honors who, during the senior year, has received a grade lower than C in any subject. Special honors are planned for especially brilliant students who prefer to concentrate their efforts on a special course. A student may receive both final and special honors.

The Faculty of the College of Liberal Arts and Sciences recommends candidates for the degree of Bachelor of Arts *with honors* in a particular subject, under the following conditions:

1. For the degree with *Honorable Mention* the student must have received A in half of his work offered in courses acceptable for his major subject, and no grade below C in the work thus offered. He must also have attained a grade not lower than B in at least three-fourths of all the other work presented for graduation, exclusive of courses taken during his freshman year.

2. For the degree with *High Honors*, a recognition of work of exceptional merit, the student must have received A in three-fourths of his work offered in courses acceptable for his major subject, and no grade below B in such work. He must also have attained a grade not lower than B in three-fourths of all the other work which he presents for graduation, exclusive of courses taken during his freshman year. Not later than five weeks before the end of the session in which he expects to complete the work for his degree, he must be recommended by the department in which his major subject is chosen, and either present an acceptable thesis in his major subject or pass a satisfactory examination based on a course of study approved by the department in which he does his major work, and pursued under the direction of an instructor selected by the student with the consent of the department.

3. The thesis or course of study in the department in which major work is done carries credit for at least four semester hours, irrespective of whether the student eventually receives High Honors or not; and the instructor in charge reports to the Registrar a grade for the course at the end of each semester, based on a test, either written or oral, of the student's progress.

4. These distinctions are noted on the student's diploma and in the Commencement Program and the Annual Register, and the winners receive special consideration in departmental recommendations for graduate scholarships and for professional positions.

Freshman Honors (College of Liberal Arts and Sciences).—At the close of each year a list is prepared of freshmen in the College of Liberal Arts and Sciences who have made an especially good record in scholarship. The names are announced at an assembly of the College; notice is sent in each case to the parent or guardian, and to the principal of the high school of which the student is a graduate.

The names of the students who received honors under the foregoing regulations during the academic year 1922-23 are published in part VII of the Register.

DEBATING AND ORATORY

The University engages yearly in four intercollegiate debates, the teams for which are chosen in a series of competitive preliminaries to which all students are eligible.

THE I. M. I. DEBATING LEAGUE consists of the universities of Illinois, Minnesota, and Iowa. It holds a debate at each university on the first Friday in December.

THE MIDWEST DEBATING LEAGUE consists of the universities of Illinois, Michigan, and Wisconsin. It holds a debate at each university on the third Friday in March.

THE NORTHERN ORATORICAL LEAGUE, consisting of Northwestern University, and the state universities of Illinois, Iowa, Michigan, Minnesota, and Wisconsin, holds an annual contest on the first Friday evening in May. The contests for 1924 will be held on May 1, at Ann Arbor, Mich. The winner receives the Lowden testimonial of one hundred dollars, and the speaker awarded second place, fifty dollars. The Illinois representative is selected in competitive contests open to all undergraduates.

A FRESHMAN-SOPHOMORE DEBATE and an INTER-SOCIETY DECLAMATION CONTEST are held yearly.

PRIZES

The Thacher Howland Guild Memorial Prize.—Friends and admirers of Thacher Howland Guild, instructor and associate in English, 1904-14, have endowed the Thacher Howland Guild Memorial Prize, an annual prize of \$25, to be given to the undergraduate student submitting the poem or one-act play which in the opinion of a committee appointed by the department of English shows the greatest originality and literary merit; provided that the award may be withheld in any year if no production deemed worthy of a prize is submitted. The name of the winner of this prize is printed in the commencement program.

The St. Patrick's Day Prize.—The Ancient Order of Hibernians offer annually a prize of \$50 for the best essay by an undergraduate or a graduate student of the University on a subject connected with Ancient Irish literature, history, or archeology. The essay, not less than 5,000 words in length, must

The Bryan Prize.—In 1898, Mr. William Jennings Bryan gave to the University the sum of \$250 from the interest on which a prize of \$25 is offered biennially for the best essay on a topic relating to the science of government. The contest is open to all matriculated undergraduate students. The essays may not be less than three thousand nor more than six thousand words in length, and they must be left at the President's office not later than the second Wednesday in May. It is suggested that the essays be on some phase of modern colonial government. The prize was offered for the first time in 1901. It will be offered next in 1925.

The Francis J. Plym Fellowship in Architecture.—By the generosity of Mr. Francis J. Plym, of Niles, Michigan, a graduate of the University of Illinois of the class of 1897, the Trustees have established a fellowship for the advanced study of architecture. The stipend is \$1,000, awarded annually by competition in architectural design. The holder of the fellowship is required to spend a year in study abroad. For further information address the Department of Architecture.

The American Institute of Architects Medal.—The American Institute of Architects offers annually a medal for award to the senior in the Department of Architecture whose development during the four years' course is the most consistent and best. In making the award the scholarship in all work is considered.

The Scarab Medal in Architecture.—The Scarab Society of the Department of Architecture offers annually a bronze medal to be awarded during the second semester for the best solution of a problem in architectural design, the competition being limited to students in architecture.

The Ricker Prize in Architectural History.—The Ricker Prize in Architectural History is awarded annually for the best presentation of some phase of architectural history, and is open to all students registered in the second year's work in this subject. Baker, Professor of Civil Engineering Emeritus and for forty-eight years a professor in the department, has endowed two prizes for the two ranking senior students in civil engineering. These prizes, amounting to \$75 and \$25 respectively, are awarded primarily on excellence of scholarship in the senior year and secondarily on personal qualities and professional activity. The names of the winners are placed annually in a bronze tablet located near the civil engineering drafting room and a special certificate is given to the student winning first prize.

The Schaefer Prize in Engineering.—Mr. John V. Schaefer, President of the Cement Gun Construction Company of Chicago, a graduate of the College of Engineering of the Class of 1889, offers annually a first prize of twenty-five dollars and a second prize of fifteen dollars for the two best technical papers written by students beyond the freshman year in the College of Engineering. The essay, which must be at least 1500 words and not more than

2500 words in length, must describe some engineering construction or operation with which the writer has been personally identified in some capacity during a vacation period, and must be accompanied by photographs and by freehand sketches made by the writer. Phi Beta Kappa Prize.—Gamma of Illinois chapter of Phi Beta Kappa offers annually a prize of \$25 to that member of Gamma Chapter who at his graduation from the College of Liberal Arts and Sciences gives evidence of greatest promise as a scholar in the liberal arts. The award is based on the following considerations: (a) Class room records; (b) other literary and scholarly activities in the University; (c) an essay, which may be a senior thesis or a term paper. The committee in charge may withhold the award if none of the essays appear worthy of the prize. Essays submitted in competition and all correspondence with reference to this prize should be addressed to the Secretary of the Phi Beta Kappa Society, University of Illinois. The committee will not be limited in its award to those who have submitted papers specifically for this purpose or have otherwise given formal notice of candidacy. Special consideration will be given to theses deposited in the College office by candidates for honors in the various departments.

A laboratory deposit of \$15.00 each year is required to cover breakage or damage to apparatus furnished by the University. From this deposit will be deducted the charges for apparatus broken, missing or not returnable, and the locker fee of \$1.00 if the student uses a locker in the coatroom.

ANNUAL EXPENSES

The following are estimated minimum and average annual expenses for undergraduate students attending at Urbana, *exclusive* of clothing, railroad fare, and laboratory fees, if any. This includes only the immediate and fundamentally necessary expenses.

Books and Equipment	\$ 25 to \$ 75
Fees'	50 to 75
Room rent for one (two in a room).....	81 to 150
Single rooms.....	108 to 180
Board at Clubs, etc.	260 to 360
Washing	30 to 45
<i>Total</i>	<u>\$446 to \$705</u>

Other necessary expenses will need to be taken into consideration. For all the necessary expenses of the year the average student is likely to need not less than \$600.00 to \$800.00. Most students spend more than this amount.

For information in regard to scholarships which cover the matriculation and incidental fee, see page 86.

WOMEN'S RESIDENCE HALLS

The University operates three residence halls for women, The Woman's Residence Hall, the Woman's Residence Hall Annex, and Davenport House. Only residents of Illinois can be accommodated.

Women students and their parents are invited to correspond with the Dean of Women in regard to other suitable places.

The Woman's Residence Hall has accommodations for one hundred fifty women students. A flat rate is charged per year of thirty-eight weeks for room, laundry of sheets and pillow cases, and board in the Residence Hall as follows:

Single room	\$432
Single room (fourth floor)	\$396
Double room, each occupant.....	\$360, \$396, and \$414
Double room (fourth floor), each occupant.....	\$360 and \$378
Double room with private bath (two available), each occupant.....	\$432

The Woman's Residence Hall Annex and Davenport House accommodate respectively fifteen and twenty-six. The rooms accommodate from two to four students and the price varies from \$360.00 to \$396.00 for each occupant.

Half the amount must be paid to the Bursar before the close of the registration period at the opening of the first semester, and the balance before the close of the registration period at the opening of the second semester.

Applications for rooms will be received by the Bursar after April 1 for the following college year. Applications are registered in the order of their receipt, but no application will be registered unless accompanied by a deposit of ten dollars, which will be credited on the payment for the second semester. After May 1 rooms are assigned in the order of application, the women living in the hall having preference. After all the rooms have been assigned the names of those who are unsuccessful will be put on a waiting list if the deposit has not been withdrawn, and as vacancies occur, assignments will be made to them in order.

Application cards and further information may be secured by writing to the Dean of Women.

¹Students of law, music and unclassified students must make needed changes in the amount given for "semester fees."

PART II

THE COLLEGES AND SCHOOLS

COLLEGE OF LIBERAL ARTS AND SCIENCES

For a description of the *buildings* used by this College, see page 46; for *museums* and *collections* under its care (classical art and archeology, oriental, European culture, natural history, botany, entomology, geology, and zoology), see pages 53-55; for *clubs and societies* auxiliary to its curricula see page 84; for *fees* see page 87.

The University, through its College of Liberal Arts and Sciences, offers a liberal education including both the humanities and the sciences; furnishes preparatory to later professional and technical studies especially arranged curricula by which good students may ordinarily obtain in six years both the degree in arts and a professional degree in law or medicine, or a technical degree in engineering; and provides highly specialized curricula in applied science (particularly chemistry), journalism, and home economics. The degree of Bachelor of Arts is conferred on the completion of all these curricula, except those in applied science for which the degree of Bachelor of Science is given.

Under the modified elective system a student who desires to prepare for teaching may specialize to a considerable extent in the subject which he wishes to teach and may also find time for courses in education and related subjects of interest to teachers. Such students should, as a rule, continue their preparation in the Graduate School.

Students who desire to devote a considerable part of their undergraduate study to specific preparation for some calling other than teaching may select courses in law, medicine, dentistry, journalism, applied chemistry, or household administration, in accordance with curricula given in detail in the following pages.

For the requirements for admission to the University, see pages 58-74.

For a statement of the regulations of the University in regard to unclassified students, see page 65.

It is the policy of the University to admit as unclassified students in the College of Liberal Arts and Sciences only a select group of mature and serious persons who, tho unable to meet the formal requirements for entrance, are substantially prepared for work of college grade and have a specific and clearly defined purpose in their study.

REQUIREMENTS FOR THE DEGREE OF BACHELOR OF ARTS

A. *University Requirements*—Each candidate must meet the general university requirements with respect to registration and residence, and must also secure credit in approved courses amounting to one hundred thirty hours, an hour being one class period a week for one semester. Each class period presupposes two hours of preparation by the student, or the equivalent in the laboratory or drawing room.

Attention is called to a requirement effective in September, 1924, that in any curriculum in which less than 15 hours of laboratory science are required a student who enters without at least one unit of laboratory science shall be required to substitute 5 hours of a laboratory science for 5 hours of free electives in the requirements for graduation.

B. *Prescribed Subjects*.—Rhetoric 1-2; Physical Education 1-2 and Hygiene 1 for men; Physical Education 7a-7b, 8a-8b, and Hygiene 2 for women; Military Science, a total of 4 hours for men.

C. *Group Requirements*.—Every candidate must offer the minimum of work specified in each of the following groups:

I. *English*.—The offering in this group must include at least a one-semester course in literature.

II. *Foreign Languages and Literatures* (exclusive of courses in translation).

If a student has received credit for but two units of a foreign language for entrance, he must pursue the study of foreign language through two years' courses or the equivalent. If he has received credit on entrance for three or more units of foreign language, he must continue the study of foreign language through one year of his college course.

NOTE.—Candidates for the degree who have not offered Greek or Latin or French or German for entrance must offer one of these languages for graduation.

III. *History, Political and Social Science*.—History, economics, political science, sociology: 8 hours.

IV. *Mathematics and Physical Science*.—Mathematics, astronomy (courses with college mathematics as prerequisites), physics, chemistry: a minimum of 5 hours, with a minimum total of 15 hours in Groups IV and V.

V. Botany, bacteriology, entomology, geology, physiology, zoology: a minimum of 5 hours, with a minimum total of 15 hours in Groups IV and V.

NOTE.—Not fewer than 4 laboratory hours a week for one semester, or the equivalent, shall be offered in *some one* department in groups IV and V.

VI. Education, philosophy, psychology: 6 hours, of which 3 shall be in philosophy or psychology.

D. *Major Subjects*.—Each candidate must select some subject as his major. A major consists of courses amounting to 20 hours chosen from among those designated by a department and approved by the faculty of the college. Such courses are exclusive of those elementary or beginning courses which are open to freshmen, and inclusive of some distinctly advanced work. At least five hours of the work accepted for major must have been done in residence at this University and included within the maximum credits allowed in any one division. See the statements regarding majors under departments in Part III.

The subjects at present recognized as majors in this college are: English, French, German, Greek, Latin, Spanish, classics, Romance language, mathematics, astronomy, physics, chemistry, bacteriology, botany, entomology, geology, physiology, zoology, home economics, education, economics, history, political science, sociology, philosophy, psychology.

E. *Minor Subjects*.—Each candidate must offer, in addition to his major, a minor of 20 hours in one or more allied subjects designated by the major department and approved by the faculty of the college. *At least 8 hours must be offered in one subject.* See the statements regarding minors under departments in Part III.

F. *Elective Subjects.*—

1. Not more than 40 hours in any one subject may be counted for graduation, except: (a) in special curricula approved by the faculty of the college; (b) when a student is writing a thesis, he may count, in addition to the 40 hours, the hours of the course in which he does his thesis work; (c) in the department of English a student may take 40 hours in addition to Rhetoric 1-2.

NOTE.—The total credit in Art and Design is limited to 20 hours.

2. No credit is granted in any subject unless the student pursues it for the full time required in the shortest course offered in that subject. For example, if the student elects a course which yields two hours for one semester, he must stay in the class during the semester in order to get any credit at all. *In order to secure any credit in a beginning course in a foreign language, a full year's work must be completed.*

3. A limited amount of credit toward the degree of Bachelor of Arts is ordinarily given for courses offered in other colleges and schools of this University, as follows:

Credit toward the degree is given for thesis work only as part of the work in some course for which the student is registered.

H. *Optional degree of Bachelor of Science.*—Students who do major work in one of the subjects in Group IV or Group V or in Home Economics, and who have credit for 60 semester hours or more in these groups or in Home Economics, on recommendation of the faculty of this College, may be graduated with the degree of B.S., instead of A.B. Such recommendation must be secured by a petition presented not later than 10 days after the opening of the last semester or Summer Session preceding the granting of the degree.

JOURNALISM

Students who are preparing for reportorial, literary, or editorial work in journalism should take their major work in English, or in journalism, and make up their study schedules from the following suggested curriculum. With the consent of the adviser, other studies may, for purposes of specialization, be substituted for those suggested. A program which satisfies the group and major requirements may, for instance, be so modified in the third and fourth years as to lay emphasis on any one of the social sciences.

Candidates for the degree of bachelor of arts in journalism are subject to the requirements in Liberal Arts and Sciences.

HOME ECONOMICS

The courses of instruction given in this department are planned to meet the needs of four classes of students: (a) those who desire a knowledge of the principles and facts of home economics; (b) those who wish to make a specialty of home economics for the purpose of teaching the subject in secondary schools and colleges; (c) those who wish a knowledge of the principles of household administration and institutional management; (d) those who are interested in work in nutrition and dietetics.

Students who hold *scholarships in home economics* must make this subject their major along one of the lines indicated and take each semester *at least four hours* in home economics or in subjects required for admission to courses in home economics.

Suggested curricula are given below. In all cases students whose major is home economics must also satisfy all of the requirements for the degree of bachelor of arts in the College of Liberal Arts and Sciences. (See Major A, page 91).

SUGGESTED CURRICULUM IN ECONOMIC ENTOMOLOGY

For students wishing to prepare for state or national service in economic entomology or as teachers of entomology in agricultural colleges or universities, the following curriculum has been arranged to include the entomological, agricultural, and horticultural courses most essential to the end in view, together with the required subjects and the group electives necessary for the degree of Bachelor of Arts.

The principal features of the prescribed part of this curriculum are 29 hours of entomology, 15 hours of other biological subjects, 11 hours of agriculture and horticulture, 10 hours of chemistry, and 40 hours of courses required for graduation, group electives, and other miscellaneous courses. Twenty-five hours of free electives remain after the courses of this prescribed list are provided for.

PREPARATORY TO MEDICINE

The requirements for admission to the College of Medicine are stated on page 66.

The following two-year pre-medical curriculum covers the entrance requirements of the College of Medicine and includes additional courses in science which are considered desirable for prospective medical students. This course of study is recommended to students who enter the College of Liberal Arts and Sciences to prepare themselves for the study of medicine.

The following subjects are suggested as desirable electives in the second year: chemistry, economics, English, entomology, history, psychology, and zoology.

CHEMISTRY AND CHEMICAL ENGINEERING

Students who follow the general curriculum in the College of Liberal Arts and Sciences with chemistry as a major subject are eligible for the degree of Bachelor of Arts.

For the more specialized training of the chemist, the following curricula, largely prescribed, have been arranged. Each requires a maximum total of 136 hours and leads to the degree of Bachelor of Science.

The schedules for the first and second years in both chemistry and chemical engineering are the same.

Preparation in German or French equivalent to two years of high-school work or one year of university work is prescribed. The total language requirements for graduation including courses offered for entrance must be equivalent to two years of university German or French. Students are advised to offer one unit in physics as a part of the general electives.

Students registering either in the curriculum in chemistry or in the curriculum in chemical engineering must offer one unit of high-school chemistry and one-half unit of advanced algebra for admission to these curricula. University credit in Chemistry 1 (five hours) is acceptable in lieu of one unit of entrance chemistry.

CURRICULUM IN CHEMISTRY, THIRD AND FOURTH YEARS

The following schedule of courses offers after the second year prescribed subjects required of all students and in addition five group options, the last four of which are outlined for the purpose of affording systematic training in important lines of applied chemistry. The first option, A, is intended for those who wish to place chief emphasis on the fundamental branches of chemistry as a science and for those who desire a combination of subjects not outlined in the other four groups. Students in option A must submit to their adviser at the beginning of the junior year an outline of their program for the junior and senior years. Approval of the outline must be secured from the adviser before registering. At least 12 hours of the electives under option A must be in chemistry, and it is recommended that they be selected as far as possible from more advanced courses in inorganic, analytical, organic, and physical chemistry. In all groups in the junior and senior years the subjects to be taken outside of the department, including electives, must amount to at least ten hours, including a course in the theory of economics. Students who have presented German for entrance should elect French 1a and 1b in the junior year; those who have offered French should elect German 1 and 3.

The groups provided for, with the letter used to designate each group, are as follows: A. General; B. Electrochemical; C. Industrial; D. Food and Sanitation; E. Physiological; F. Sanitation.

CURRICULUM IN CHEMICAL ENGINEERING

THIRD AND FOURTH YEARS

The work of the technical chemist or superintendent is frequently so closely associated with mechanical and other branches of engineering as to make a knowledge of these subjects essential. To meet these conditions, the following four-year curriculum in chemistry and related engineering subjects has been arranged. The degree given is that of Bachelor of Science in chemical engineering.

It is advised that students intending to take this curriculum be prepared to offer for entrance two units of manual training, including mechanical drawing, or arrange to take equivalent courses in the University.

¹Ten hours of thesis credit are required for graduation in chemistry and nine hours for graduation in chemical engineering, subject to the provision that a partial substitution of chemical electives in special cases may be granted on recommendation of the department. In no case may the total thesis credit in either curriculum be reduced below a minimum of five hours.

²Twelve hours of the total electives of the third and fourth years, Group Option A, must be in Chemistry; ten hours must be taken outside of the department.

CURRICULUM IN PHARMACEUTICAL CHEMISTRY

For students who are graduates of recognized colleges of pharmacy an option in pharmaceutical chemistry leading to the degree of Bachelor of Science in chemistry is offered.

The credits to be allowed on transfer are based on the curriculum of the University of Illinois School of Pharmacy.

For entrance to the School of Pharmacy fifteen units of high-school work are required. For the degree of Graduate in Pharmacy, the students attend for two years of thirty-six weeks each. The course of study is the equivalent of fifty-eight university hours. For the degree of Pharmaceutical Chemist, an additional year of thirty-six weeks is taken and the course of study for this year is equivalent to twenty-five university hours.

The following option in pharmaceutical chemistry leads to the degree of B.S. in chemistry.

1. Persons holding the degree of Graduate of Pharmacy from a college of pharmacy holding membership in the American Conference of Pharmaceutical Faculties, who can present fifteen units of high-school work for entrance, will be allowed forty hours of university credit in the chemistry curriculum.

2. In addition to the forty hours of credit to qualify for the work of the third year a student must offer the following subjects from the University of Illinois or elsewhere:

¹For a limited number of students Chem. 78, Metallography, second semester, may be substituted for Chem. 69, Assaying. Note should be made of the prerequisites for Chem. 78.

²Ten hours of thesis credit are required for graduation in chemistry and nine hours for graduation in chemical engineering, subject to the provision that a partial substitution of chemical electives in special cases may be granted on recommendation of the department. In no case may the total thesis credit in either curriculum be reduced below a minimum of five hours.

College Algebra.....	3 hours

Analytical Geometry	4 hours
Calculus	6 hours
Physics	9 hours
Rhetoric and Composition.....	6 hours
French or German (preceded by two units' entrance credit in the same language).....	8 hours
<i>Total</i>	<u>38 hours</u>

Such students will have junior standing.

3. The work of the junior and senior years should include the following courses:

Chem. 14b, Advanced Organic Chemistry Lectures..	3 hours

Military training and physical education or electives	6 hours
<i>Total</i>	<u>58 hours</u>

Students holding the degree of Pharmaceutical Chemist will be allowed eighteen hours of advanced standing in lieu of the eighteen hours chemical and non-chemical electives of the last two years.

COLLEGE OF COMMERCE AND BUSINESS ADMINISTRATION

For a description of the *building* used by this College, see page 47; for *museum and collections* under its charge, see page 55; for *societies and clubs* auxiliary to its curricula, see page 84; for *fees* see page 87.

The University through the College of Commerce and Business Administration offers its students a knowledge of the principles underlying business, with special training for particular business callings. It does not attempt to prepare students for clerical and similar occupations as employees, but it does endeavor to lay a foundation on which successful careers in managerial and administrative positions and as proprietors may be built. To this end, courses in economics, accountancy, business organization and operation, banking, commerce, railway administration, public utilities, and industry are offered in combination with courses in language and literature, the social sciences, law, mathematics, and the natural sciences.

The work of the college is divided into three departments as follows: economics, including finance and statistics; business organization and operation, including accountancy, public utilities, and business law; and transportation.

For the requirements for admission see the statement of the requirements of the University, pages 58-74.

See the statement of the general regulations of the University in regard to unclassified students, page 65.

REQUIREMENTS FOR GRADUATION

Students who complete a curriculum in the College of Commerce and Business Administration are awarded the degree of Bachelor of Science. The requirements for graduation are as follows:

1. *University Requirements*.—A candidate must comply with the University requirements as to residence and registration, and secure credit amounting to 130 hours, including credit in the following subjects prescribed by general university regulations for all students: *Rhetoric 1-2*, 6 hours; and *Physical Education 1, 2* and *Hygiene 1*, 2 hours, for men, and *7a-7b* and *8a-8b* and *Hygiene 2*, 5 hours, for women; and *Military Science*, 4 semesters, 4 hours, for men. Students who elect the Reserve Officers' Training Corps must also take *Military Science*, 4 additional semesters, 4 hours.

2. *Study Methods*.—All freshman students are required to attend the lecture course on study methods given once a week during the first semester.

3. *Prescribed Subjects*.—A candidate must also secure credit in the other subjects listed as *prescribed* in his chosen curriculum.

4. *Language Group*.—Of the electives allowed, 8 hours must be either in English literature or in a foreign language in all curricula, but prescribed courses in either of these subjects may be counted in meeting this requirement.

In order to secure any credit in a beginning course in a foreign language, a full year's work must be completed.

5. *Social Science Group*.—Twelve hours of electives must be chosen from the following group of subjects: *History, political science, philosophy, psychology, and sociology*, provided that *not fewer than six hours* in any one subject may be counted in fulfilling this requirement; but prescribed courses in any of these subjects may be counted.

Requirement 5 applies to curricula in: General Business, Banking, Insurance, Accountancy, Railway Administration, Commerce and Law, and Trade and Civic Secretaries.

Requirement 5 does *not* apply to curricula in: Railway Transportation, Commercial Teachers, Foreign Commerce, Industrial Administration, and Public Utilities.

6. *Science Group*.—In all curricula *ten hours* of electives must be chosen from the following groups of subjects: *Chemistry, mathematics*, (Math. 22 and Math. 23 excepted) and *physics*, provided that *not fewer than five hours* in any one subject may be counted in fulfilling this requirement; but prescribed courses in any of these subjects may be counted.

7. *Free Electives Group*.—Free electives sufficient to make the 130 hours required for graduation may be selected from any department in the College of Commerce, the College of Liberal Arts and Sciences, or the Library School. All other electives must have the approval of the Dean of the College at the time of registration.

8. *Laboratory Science*.—In any curriculum in which less than fifteen hours of laboratory science are required a student who enters without at least one unit of laboratory science shall be required to substitute five hours of a laboratory science for five hours of free electives in the requirements for graduation.

The curricula in commerce and business administration are: General business, trade and civic secretarial service, banking, insurance, accountancy, general railway administration, railway transportation, commercial teaching, foreign commerce, industrial administration, public utilities, and commerce and law. The subjects prescribed for graduation in each curriculum are listed in the following outlines. These subjects are in general arranged in sequence and should be taken in the order given.

In addition to the prescribed subjects sufficient electives must be taken each semester to make up a minimum of 15 hours, but not to exceed a maximum of 18 hours of work. In choosing electives the attention of students is called to provisions 4, 5, and 6 of the preceding statement of the requirements for graduation. It is *required* that a sufficient number of hours from the subjects enumerated in groups 4 and 6 above be taken during each semester of the first year to make up, together with the prescribed subjects, a schedule of not fewer than 15 hours. Attention is called to the fact that some elementary courses carry only part credit for seniors.

CURRICULUM IN INDUSTRIAL ADMINISTRATION

The following curriculum is intended for students planning to enter the administrative or selling departments of industrial plants. To the usual courses in economics, accounting, etc., are added groups of technical courses offered by other colleges of the University. Four such groups have been arranged, as follows: Group A, the machine industries; Group B, the electrical industries; Group C, the building trades; Group D, the chemical industries. The student who selects one of these groups is required to take all the courses listed in the chosen group.

¹Semester hours. For definition, see page 223.

A student electing the chemical industries group is required to take Econ. 27—Modern Industry (3) and Econ. 22—Economic History of the United States (3), instead of G. E. D. 1—Elements of Drafting (4) and G. E. D. 2—Descriptive Geometry (4), in the first year; and Chem. 1 or 1a—Inorganic Chemistry (5 or 3), instead of T. and A. M. 20—Analytical Mechanics (3), and Rhet. 10—Business Letter Writing (2) in the second year. Rhet. 10 is deferred until the third year.

One year of foreign language or English literature must be included among the electives.

CURRICULUM IN COMMERCE AND LAW

(A six-year combined curriculum)

The following curriculum is provided for students who wish to combine commercial and legal studies and secure both the degree of Bachelor of Science and the degree of Bachelor of Laws or of Doctor of Law in six years. Students who elect this curriculum must meet all the requirements for graduation from the College of Commerce and Business Administration; but, in exercising their privileges of election, they are urged to select as many hours as possible from the following subjects: Hist. 2a-2b, English History (6); Hist. 3a-3b, United States History (6); Hist. 4a-4b; English Constitutional History (6); Pol. Sci. 1, American Government (3); and Pol. Sci. 3; State and Local Government (3); and Econ. 25, Economic History of England (3). Students expecting to study law should devote at least 12 hours to work in history and political science. A course in English History is regarded as one of the most essential pre-legal subjects.

The law courses in the curriculum may be taken only in the fourth year, and are counted for 30 hours of credit toward the degree, provided the full year's work is completed. In their fourth year, students will be regularly registered in the College of Law, but must file copies of their study-lists in the office of the Dean of the College of Commerce and Business Administration at the beginning of each semester.

GRADUATE WORK

In the College of Commerce and Business Administration numerous courses open only to graduate students are offered in Economics (including Agricultural Economics), Accountancy, and Business Organization and Operation. An opportunity is afforded graduate students for study in any one of the twelve curricula of the College.

BUREAU OF BUSINESS RESEARCH

The Bureau of Business Research was organized in 1921 to carry on research in economic problems of statewide importance. In addition to its work in research, it maintains a Division of Information which attempts to be of assistance to the business men of the state.

COLLEGE OF ENGINEERING

For a description of the *buildings* used by this College, see page 47; for *collections* related to it, see page 56; for *clubs and societies auxiliary to its curricula*, see page 84; for *fees*, see page 87; for *honors*, see page 77; for *honorary societies*, see page 84; for *prizes*, see page 79.

The purpose of the College is to train men for the profession of engineering. In its curricula, cultural subjects are interwoven with the theoretical subjects of the several departments. The instruction of the class-room and the practice afforded by the library, the drafting room, and the laboratory are correlated. Throughout his course the student works on problems and proceeds by methods similar to those which arise in the experience of the practicing engineer.

For the requirements for admission to the University, see pages 58-74.

See the statement of the regulations of the University in regard to unclassified students, page 65.

REQUIREMENTS FOR GRADUATION

Each curriculum in the college requires the completion of 142 credit hours. With the exception of the curricula in Ceramics, Ceramic Engineering, General Engineering, and Engineering Physics, no less than 130 hours of the 142 are specified and required for the degree. Six or nine hours of non-technical work are elective in the junior and senior years of each curriculum.

The curriculum in General Engineering is administered by the office of the Dean of the College.

The curriculum in Gas Engineering is administered by the Department of Mining Engineering.

ARCHITECTURE.—The University offers two curricula in the Department of Architecture leading to the first degree, the curriculum in architecture and the curriculum in architectural engineering.

The curriculum in architecture aims to train the student to produce correct, thoughtful, and beautiful works of architecture. The schedule includes liberal and scientific subjects to supply the background for creative work and to give a knowledge of the principles involved in the processes of safe and economical construction; also free-hand drawing for the purpose of training the eye to recognize correct proportion and training the hand to skillful and rapid drawing. The curriculum, however, consists mainly of the study of architectural forms and principles and their application in architectural design. From time to time the problems of the Society of Beaux Arts of Architects are given and the student drawings sent to New York for judgment.

The curriculum in architectural engineering gives a groundwork in mathematics and applied mechanics, and includes such studies as strength of materials, mill, and tall building construction, reinforced concrete, etc. The principles of these subjects are applied to all forms of building construction in courses given in the senior year. While specializing in construction, this curriculum includes also the study of the forms and principles of architecture through such subjects as free-hand drawing, architectural history, architectural drawing, and architectural design.

Both curricula prepare the student for the examinations of the Illinois State Board of Examiners of Architects, and graduates are exempt from examinations required for entrance into the American Institute of Architects, and from the preliminary examination for the prize in Architecture of the American Academy at Rome.

Students intending to take up the study of architecture should take free-hand and architectural drawing and general history in high school.

The equipment of the department includes plaster casts of architectural detail and ornament; lantern slides of architectural subjects and of painting and sculpture; a collection of 300 examples of American woods, shown in three sections each; and collections of architectural drawings and of specimens of building materials, fittings, and appliances.

A balopticon is used for direct projection of photographs and colored plates, and a double electric lantern for projecting two pictures on the screen at once for comparative study. Geometrical and architectural models are lighted by a light properly adjusted for demonstration of the subjects of shades and shadows and conventional rendering. Wall space in the corridors of the department and in all drafting rooms has been prepared for exhibition purposes, and collections of drawings are constantly displayed. The department occupies the fourth floor of Engineering Hall, and part of the third; its quarters include drafting rooms for undergraduate and graduate work, lecture rooms, studios for free-hand drawing, and the Ricker Library of Architecture.

The Ricker Library of Architecture, occupying the entire north wing of the fourth floor of Engineering Hall, is open every week day from 8 a. m. to 10 p. m. Large tables are provided for the examination of books, photographs, and drawings. The books, representing a collection of several thousand on architecture, engineering, and allied arts, are all books for reference in history, design, and construction. There are also over 15,000 lantern slides, 15,000 mounted photographs and drawings, and a collection of stereoscopic views of several of the principal countries of the world.

CERAMIC ENGINEERING.—In the Department of Ceramic Engineering are offered courses of instruction relating to the fabrication of clay products, cement and glass, and enamels for metals.

In addition to the fundamental engineering courses, work is offered in the physical and chemical principles of the production of silicate products, the winning and preparation of raw materials, their shaping, drying, and burning, or fusion, the composition and application of the various glazes, glasses, enamels, and colors, the planning and construction of industrial plants, and the machines, apparatus, kilns, and furnaces used in these plants.

Industrial cooperation and research are prosecuted, and a series of bulletins on ceramic subjects is being published.

The ceramic laboratories contain apparatus for the testing of clays and the preparation of cements, enamels, and glasses; machinery for grinding the raw materials, for shaping bricks, tile, saggars, pottery, and refractories; a gas producer; kilns and furnaces; pyrometers, potentiometers, electric furnaces, recording instruments, and all other accessories for exact scientific and technical work.

A library pertaining to the silicate industries is available; also there are sets of working drawings representing the construction of important plants.

CIVIL ENGINEERING.—This department makes possible a systematic study of the principles of engineering and gives the students an opportunity for practice in the survey, design, and construction of public and other engineering works. The prime object is the development of the mental faculties of the student, particularly his initiative, and to help him to obtain a good grasp of the needs and opportunities afforded by engineering.

For the surveying courses there is a full equipment of engineers' transits, levels, plane-tables, and other instruments in use in ordinary and railroad surveying, and in more precise work.

In a building set apart for the purpose are highway laboratories containing machines for testing bituminous and non-bituminous road materials, including brick, stone, and other road-making substances.

The structural laboratory building houses the cement concrete laboratory, the structural research laboratory, and the semi-fluids laboratory. The cement concrete laboratory is equipped for testing cement, aggregates, and concrete specimens. The structural research laboratory is equipped with a mechanician's shop and with a high-capacity testing machine for investigating structural elements. The semi-fluids laboratory is devoted to the study of the statics and dynamics of pulverulent, granular, fragmental, and plastic materials.

ELECTRICAL ENGINEERING.—In the Department of Electrical Engineering is provided a curriculum in the theory and application of electricity. The first two years of work are substantially the same as in the other engineering curricula, including work in drafting room and shop, and instruction in the principles of mathematics and physics. In the third year a course in dynamo machinery is followed by the theory of alternating currents, while laboratory and design courses emphasize principles. Technical courses cover the generation, transmission, and distribution of electric power, and its various applications. In the laboratory a study of dynamos is followed in the fourth year by experiments in the operation of electrical machinery. Investigation of problems of power distribution is made in advanced laboratory and thesis work.

The 850 kilowatt power plant of the University supplies the electrical engineering laboratory with power for its operation.

The power equipment in the electrical engineering laboratory includes one hundred direct-current machines with a total capacity of 600 kilowatts, forty alternating current machines with a total capacity of 400 kilowatts, and sixty-three transformers with a total capacity of 380 kilowatts. Experimental switchboards containing a total of 30 panels afford distribution and control.

The instrument room contains standards for the calibration of commercial instruments of all types, 250 portable instruments for experimental work, and a 240 ampere-hour storage battery. The graduate laboratory contains apparatus for research including four oscillographs, one 2,000-cycle alternator, one 200,000-volt transformer, one 1,000-ampere direct current generator, and apparatus for high voltage direct current investigations. The photometer room contains apparatus for tests of the various light sources. Two special 100-line switchboards are connected with cables and apparatus for experiments in telephony. The equipment for electrometallurgical work includes one 30-kilowatt induction furnace, one 25-kilowatt arc furnace, two 30-kilowatt resistance furnaces, one 15-kilowatt vacuum furnace for melting, one 3-kilowatt vacuum furnace for annealing and one 1.5-kilowatt muffle furnace.

MECHANICAL ENGINEERING.—The courses in the Department of Mechanical Engineering are planned to present the theory and practice of the generation and transmission of power, and of the design, construction, operation, and testing of machinery of all kinds. In the laboratories emphasis is given to the engineering and economic principles of machine construction and to problems of scientific shop management.

The Designing Rooms are supplied with drawing tables, reference books, files of trade catalogs, gear charts, and collections of blue prints. A collection of kinematic models, sectional steam specialties, lantern slides, and photographs is also available.

The Mechanical Engineering Laboratory is equipped with machines and testing instruments for instruction in steam engineering, gas power engineering, refrigeration, heating, and ventilation. The equipment includes a 210-horsepower experimental boiler, with chain-grate stoker, fuel economizer, and induced draft; a separately fired steam super-heater; types of throttling, high-speed automatic, and Corliss steam engines; steam condensers; a compound two-stage air compressor; a large compound duplex steam pump; a 100-k.w. Terry steam turbine; a 200,000-pound Lea water-flow; a 10-ton ammonia compression refrigerating machine; a 10-ton ammonia absorption refrigerating machine; typical gas, gasoline, and oil engines; a 50-horsepower suction gas producer, house-heating boilers and furnaces; a 150-horsepower electric absorption and transmission dynamometer; and apparatus for instruction in heating and ventilation and the mechanical equipment of buildings. The central heating and power plant contains types of boilers, stokers, pumps, and engines in commercial service.

The Shop Laboratories are provided with machinery and apparatus to illustrate the process of the manufacture of machinery. The laboratories include the *Pattern Laboratory* with an equipment of benches, lathes, machinery, and small tools needed in pattern construction; the *Foundry Laboratory* equipped with cupola, brass furnaces, core ovens, moulding machines, and facilities for bench and floor moulding; the *Forge Laboratory* equipped with

forges, anvils and small tools, a steam hammer, a power-driven punch and shear, and with gas and electric furnaces; and the *Machine Laboratory* with an equipment of lathes, planers, shapers, milling machines, grinders, boring mills, drill presses, and with typical small tools and fixtures used in manufacturing.

MECHANICS, THEORETICAL AND APPLIED.—The courses in theoretical and applied mechanics are designed to meet the needs of students of engineering.

The *Laboratory of Applied Mechanics* comprises the materials testing laboratory and the hydraulics laboratory. The equipment of the *Materials Testing Laboratory* includes testing machines and apparatus for making physical tests of materials of construction, such as tension, compression, flexure, shearing, torsion, hardness, and impact tests, and tests under repeated load.

The laboratory contains machines of capacity for testing full size structural and machine members. Among these there is a universal machine of six hundred thousand pounds capacity. Facilities are provided for making, curing, and testing concrete and reinforced concrete test specimens. The *Hydraulics Laboratory* has facilities for furnishing water under a range of pressures and volumes. There is an equipment of devices for measuring and recording the flow of water, including measuring pits, water meters, weir channels, nozzles, pitometer, and Venturi meters. In the equipment are pumps, a stand-pipe, water motors, and a turbine water wheel for testing purposes. A supply of pressure gauges, weighing scales, and other auxiliary apparatus is provided.

MINING ENGINEERING.—In the Department of Mining Engineering are offered courses of instruction in mining and metallurgical engineering to train men for the various phases of the mineral industry.

The work of the department adds to the preliminary courses in mathematics, languages, chemistry, physics, and general engineering, that are common to all courses in engineering, specialized work in mine surveying, mining methods, geology, prospecting, mine examination and valuation, ventilation, first aid and rescue, mining machinery, coal washing and ore concentration, metallurgy, utilization of fuels, administration and organization of mines, mining law, and the design of mining and metallurgical structures.

There are three distinct options—coal mining, ore mining, and metallurgical engineering—and by means of the electives offered, a student can also specialize along the geological phases of mining, including work in oil prospecting and development.

In addition to its work of instruction, the department concerns itself with the development and dissemination of scientific facts of service in improving the practice of mining with reference to efficiency in operation, the security of life in the mines, and the conservation of the mineral resources of the State.

The drawing room contains the catalogs of the manufacturers of mining machinery with a complete card index, standard reference books on mine and mill design, and a collection of photographs, blue-prints, and drawings of mines, mine structures, ore, coal, and metallurgical plants.

The mine-gas and safety-lamp laboratory contains safety lamps of all types, electric and magnetic locking appliances, a photometer, a dark room for photometric work, Ryan, Oldham, and Hailwood safety-lamp testing apparatus, appliances for gas and dust analysis and explosibility tests, and a Bacharach hydro volume and pressure recorder.

A centrifugal fan three feet in diameter is connected to 500 feet of ventilating ducts arranged in three parallel lines so that the effects of splitting

the air in various ways may be demonstrated. The same equipment is used for experimental work in mine ventilation.

The coal-washing and ore-dressing laboratory contains for crushing: rolls, gyratory and jaw crushers, and a 500-pound 3-stamp battery; for screening and sizing: trommels, shaking and vibrating screens, 11-inch exhaust fan, cyclone collector and classifiers; for concentrating and cleaning: pan, piston and pulsating jigs, bumping table, vanner, concentrating tables, and electrostatic separator, a magnetic separator and two flotation units. These machines can handle 3 to 5 tons of coal and one ton of ore an hour. There are also a complete sampling and drying equipment, a cyanide testing plant, and other appliances used for testing. Adjoining this laboratory is a chemical and assay laboratory equipped for the analytical work connected with coal washing and ore concentration.

The explosives and drilling laboratory contains types of rock and coal drills, an air meter, a diamond drill, chain and puncher coal cutters and a complete outfit for demonstrating the use of explosives.

MUNICIPAL AND SANITARY ENGINEERING.—The curriculum in the Department of Municipal and Sanitary Engineering is designed to train students for the duties of the engineer employed on the design, construction, and operation of public works and public utilities, and for general engineering work.

The methods of training are intended to develop power to take up and solve new problems connected with municipal public works, as well as to design and to superintend the ordinary constructions. Surveying, structural materials, and structural design are taught as in the civil engineering curriculum. Chemistry and bacteriology of water supply and sewage disposal are given; and there is instruction in mechanical and electrical engineering in the generation and transmission of power.

The hydraulic laboratory is well equipped with apparatus illustrating the laws of hydraulics as applied in waterworks and sewerage practice, and it also contains a small rapid sand filter, a small slow sand filter, and several arrangements of dosing siphons. Research equipment in plumbing devices and installations is provided. Opportunities for practice and study are provided at the filter plant of the Champaign and Urbana Water Company, and at the University experimental sewage treatment plant.

PHYSICS.—The Laboratory of Physics supplies facilities and equipment for instruction and investigation in physics. Gas, distilled water, compressed air and vacuum, and direct and alternating electric currents are available in all parts of the building. There is a collection of over 4,000 pieces of apparatus. New investigations can usually be started with the apparatus on hand. There are two workshops, one for advanced students and instructors, and one for the mechanics of the department. The students' shop is equipped with lathes, drill press, and bench tools. The mechanics' shop contains lathes, milling machines, drill press, and other facilities for fine work.

The University Library contains sets of journals of physics and the related sciences in English, French, and German. The recent volumes of the physical journals, together with a collection of text-books, encyclopedias, dictionaries, and other reference books, are in the special library of the Laboratory.

RAILWAY ENGINEERING.—The Department of Railway Engineering is organized to train students for service in the technical departments of railways. In it the University offers curricula in railway civil engineering, railway electrical engineering, and railway mechanical engineering, all three of which are substantially the same as the corresponding civil, electrical, and mechanical engineering curricula to the end of the second year. The curricula in railway civil and railway mechanical engineering are designed for those who wish to enter steam railway service in the engineering and motive power departments respectively, while the curriculum in railway electrical engineering is intended for those who will serve on electric railways or in the electrical departments of steam roads. The special subjects of the curriculum in railway civil engineering concern the location, design, construction, and maintenance of railway track and equipment, and the design of railway structures. The courses in railway electrical engineering deal with the design and construction of electric railway equipment, the operation and performance of electric cars and locomotives and with the problems which arise in the electrification of steam lines. The curriculum in railway mechanical engineering adds to the fundamentals of the general mechanical engineering curriculum special railway courses on the design of locomotives and cars, the resistance of trains, the performance and tests of locomotives, and tests of railway equipment.

A locomotive testing plant, built from the original designs of the department, is devoted exclusively to making tests to determine the performance of locomotives. The locomotives tested have, for the most part, been furnished by certain railroad companies. Permanent arrangements are contemplated under which it may be possible to maintain in the plant a locomotive of the latest design.

For purposes of instruction a light freight locomotive is permanently available in this laboratory. This locomotive, donated by the Illinois Central Railroad, is of the mogul type with simple cylinders using saturated steam.

The University owns and operates, jointly with the Illinois Central Railroad, a railway test car designed for experimental work on steam roads. It is equipped for making train resistance and locomotive performance tests, and during the last twenty years has been in frequent operation in carrying on resistance and tonnage rating tests on the Illinois Central Railroad and on several eastern roads.

For work on electric roads the University owns an electric test car, of the interurban type, designed and built for the University. It is equipped with four 50-horsepower direct current motors and with the Westinghouse multiple control system, and with instruments for recording power, speed, acceleration, and the other data needed in road tests, and for measuring and recording the electric resistance of rail bonds. Through the courtesy of the Illinois Traction System this car is operated on its lines, which enter the campus of the University.

The laboratory equipment includes a drop-testing machine and a brake shoe testing machine, both constructed in accordance with the standard of the Master Car Builders' Association. The drop-testing machine is designed for use in testing the strength of railroad rails, car axles, car couplers and draft gears; and may be used in studies of the physical properties of structural materials of any sort. The brake shoe-testing machine supplies

means for determining the wearing properties and frictional qualities of brake-shoes, such as are employed in regular service on railroad trains.

Much of the work in the railway courses is given in the departments of civil, electrical, and mechanical engineering, and the shop and laboratory equipment of these departments is available for students in the railway department.

Three steam roads—the Illinois Central, the Cleveland, Cincinnati, Chicago, & St. Louis, and the Wabash railroads; and two electric interurban roads—the Illinois Traction System and the Kankakee and Urbana railway—enter Champaign and Urbana. The department is afforded by them opportunities for practical road tests and field work.

GENERAL ENGINEERING LECTURES FOR FRESHMEN

One general lecture, sufficiently popular in character to interest and inspire young students, is given each week. All freshman engineering students are required to attend this lecture.

TRIPS OF INSPECTION

Students in the College of Engineering are required to make a trip of inspection during their senior year. Such trips supply an opportunity to inspect the work of industrial establishments and of engineering enterprises. They usually occupy from three to four days, and are taken during term time, under the supervision of University authorities. They involve an expense of approximately \$25 to \$30 to each student. For the year 1923-24, the trips occurred on October 24-27, 1923.

No student not in line for graduation is permitted to go on the annual inspection trip of the College of Engineering without the approval of the General Committee on Inspection Trips.

NON-TECHNICAL ELECTIVES

The non-technical electives for students in the College of Engineering are subject to the following restrictions:

1. They are restricted to courses offered in the College of Liberal Arts and Sciences and in the College of Commerce, and courses 1 to 16 in Music.
2. Such courses must not be open to freshman students, except in the case of courses in music.
3. The courses must be approved by the head of the department in which the student making the election is registered.
4. Students in the College of Engineering electing the third and fourth years' work in the Reserve Officers' Training Corps may substitute the hours of credit thus received for a corresponding number of hours of the required non-technical electives.

RHETORIC PREREQUISITE FOR JUNIOR STANDING

Rhetoric 1 and 2 are prerequisites for junior standing in the College of Engineering, and no student in this College shall be permitted to register in more than eight hours of prescribed junior work without having passed or being registered in Rhetoric 1 or 2.

REQUIREMENTS IN LANGUAGE

Except in curricula where the language requirement is specifically designated, as German or French, for instance, any student who has completed in high

school one or more years of French, German, Spanish, or the fourth year of English and has had the same accredited to him as entrance credits by the Registrar, may be excused from language requirements specified in his curriculum to the extent that one year's high-school work shall be considered the equivalent of a semester's work in college and he may select in lieu thereof any course falling under the designation of non-technical electives in the College of Engineering or technical electives outside the required courses in his curriculum. No fractional unit of high school work may be considered in the application of this regulation, and the full equivalent of the eight-hour requirement in a single language must be obtained by each student in the fulfillment of graduation requirements.

THESES

Theses may be required of all students in the Department of Ceramics and may be elected by students in other departments with the approval of the head of the department concerned. Only students of high standing are allowed to elect theses.

CURRICULA AND DEGREES

Each of the following twelve curricula, leading to the degree of Bachelor of Science, may ordinarily be completed in a period of four years.

A graduate of the University of Illinois in architectural, ceramic, civil, electrical, mechanical, mining, municipal and sanitary, or railway engineering may receive the degree of an allied curriculum on the completion of from thirty to thirty-six semester hours of work approved by the faculty. This work may be done in one academic year.

A graduate of the College of Liberal Arts and Sciences of the University of Illinois, or of any college of equal standing, whose mathematical training includes the calculus, who has had an acceptable course in physics, and training in mechanics to enable him to begin the mechanics of the junior year, may receive the degree of Bachelor of Science on the completion of sixty-eight credit hours of work in engineering under the direction of the faculty. This work may be done in two academic years. Candidates for the degree in the department of architecture are not required to be prepared in calculus or mechanics, but should have special preparation in drawing.

CURRICULUM IN GAS ENGINEERING

The curriculum in gas engineering combines many of the items of the course in Chemical Engineering and a number of the more distinctly engineering subjects from Mechanical, Electrical, and Mining Engineering. It is intended to fit men for operating positions about a gas or coke plant rather than for positions in the laboratory where the work is more distinctly of a chemical nature. The degree of Bachelor of Science is given on completion of the curriculum.

CURRICULUM IN GENERAL ENGINEERING

The curriculum in general engineering is intended for students who do not wish to pursue the more specialized engineering curricula, but who, however, wish to secure fundamental training in engineering principles. Its object is to fit men for executive or administrative positions in large organizations where questions of organization, production, and distribution may be considered the chief functions of the executive. This curriculum furnishes an excellent foundation for work with the technical press, or sales work in foreign countries. It also forms an excellent basis for work in engineering organizations of insurance, banking, and similar companies. The degree of Bachelor of Science in General Engineering is awarded on its completion.

FIRST YEAR

For the first year's work, see Curriculum in Architectural Engineering.

¹The time allotted to special Gas Engineering in the Senior year will be divided among such subjects as the Design of Gas Plants and the Manufacture, Distribution, Utilization, and Economics of Gas.

THE COLLEGE OF AGRICULTURE

For the *buildings* used by this College, see page 48; for *clubs auxiliary to its curricula*, page 84; for *honors*, page 77; for *honorary societies*, page 83; for *fees and expenses*, page 87.

The University, through the College of Agriculture, offers, to both men and women, curricula designed for four different purposes:

First, and mainly, to train for the profession of farming.

Second, to train for the teaching of agriculture in the public schools.

Third, to train for the profession of landscape gardening.

Fourth, to train for the profession of floriculture.

The curricula offered in the Department of Home Economics have two purposes in view:

First, and mainly, to train young women in the science of household affairs, and the art of homemaking.

Second, to prepare teachers for giving instruction in domestic science in high schools, and, in connection with the College of Liberal Arts and Sciences, to fit for college and university positions.

In the case of both men and women the great purpose is to prepare for the practical affairs of life. In order that technical knowledge and skill may not be developed at the expense of those things which tend to the production of cultured and versatile men and women, the technical work is closely associated with the related sciences, and students are required to divide their time fairly between those subjects that develop general knowledge and breadth of view.

In the College over one hundred sixty courses of instruction in technical subjects are given, besides opportunity to elect from the scientific and literary offerings of the other colleges of the University. Credit is given for all work accomplished.

For the requirements for admission to the University, see pages 58-75.

Applicants for admission to the Graduate School should have had an undergraduate course in scientific and technical agriculture equivalent to that of the University of Illinois; yet students who are otherwise eligible for admission to the Graduate School may be admitted to graduate standing in agriculture, if they have had a thoro training in the fundamental sciences, even tho their undergraduate curriculum may have lacked to some extent the amount and kind of technical work included in our course.

REQUIREMENTS FOR GRADUATION

Students who have satisfied the University requirements as to registration, residence, and diploma fee, and have maintained throughout their course a satisfactory record of scholarship and moral character will, on completion of the studies of the prescribed list and sufficient electives to make a total of 130 semester hours, be graduated with the degree of Bachelor of Science.

A thesis is not required for graduation, but any student who has completed not fewer than 90 hours of credit before the senior year may then elect a thesis course in any department, provided he has done at least 20

hours' work in courses pertinent to the thesis problem, subject to the approval of the head of the department.

Graduates of approved colleges may secure a degree in agriculture from the University on completion of the technical and scientific requirements. This will ordinarily require two years of residence work; a minimum of one year is required.

In physical education not more than five semester hours for men and seven semester hours for women are accepted toward graduation.

SCHOLARSHIPS

For information concerning scholarships in agriculture and home economics, see page 86.

FACILITIES FOR INSTRUCTION AND METHODS OF WORK

The affiliation of the College with the Agricultural Experiment Station enables the University to support a larger faculty than would otherwise be possible, and permits a higher degree of specialization. For the most part, those who teach in the College conduct experiments in the same subjects in the Station.

The methods of instruction vary with the nature of the courses. In general the laboratory method prevails. Text-books are used when good ones are available. Laboratory and text are supplemented by lectures and reference readings.

AGRICULTURAL EXTENSION.—Agricultural extension work serves as the intermediary between the College of Agriculture and the Agricultural Experiment Station and the local community and the farm. Each department does extension work, and so far as possible provides special men for such work. The responsibility for the work of these men lies with their own department. For this reason not all of the extension effort issues from one office.

For administrative purposes and for the coordination of these activities through a regular channel, agricultural extension is administered as a separate department, conducting all extension enterprises which do not deal with technical subjects and cooperating with other departments in diffusing the results of their work in the State.

Some of the general extension enterprises are: Agricultural extension schools and demonstrations in different localities; Farmers' Week conducted annually at the College in January; helping at farmers' institutes and similar gatherings, with special railway lecture trains, at the boys' state fair school, and in educational exhibits at fairs and elsewhere; welfare work in rural communities; and excursions to the College. (See also under University Extension, Part V.)

AGRONOMY.—The Department of Agronomy gives instruction in those subjects which relate to the field, such as field crops; the chemistry, physics, and biology of the soil; manures, and rotation in their relation to fertility; plant breeding. The department maintains equipment and facilities for instruction in these subjects, and in addition, opportunity is afforded for contact with the research work of the Agricultural Experiment Station, especially in crop production, soil fertility, soil biology, and plant breeding, in the analytical and potculture laboratories on the soil bins on the experiment fields at the University and in other parts of the state.

ANIMAL HUSBANDRY.—Courses in the Department of Animal Husbandry cover the study of sheep, swine, poultry, and beef cattle and their products; heavy and light horses, with their care and training; the management of herds, flocks, and studs; feeding, breeding, general sanitation, hygiene and disease control, and marketing; and the chemical and physiological phase of animal nutrition.

The University herds, flocks, and studs contain about six hundred pure-bred cattle, swine, sheep, and horses, and several hundred fowls, ducks, and turkeys, which are available for class purposes. These animals are also used for investigations in feeding and breeding, and for illustration of breed types and characteristics. The breeds represented are Shorthorn, Hereford, and Aberdeen Angus cattle; Poland China, Berkshire, Duroc Jersey, Chester White, Large Yorkshire, and Hampshire swine; Shropshire, Oxford, Southdown, Hampshire, Rambouillet, and Corriedale sheep; and Percheron, Hackney Pony, and American Saddle horses. In addition, a large number of grade animals of the various classes of live stock furnish material for judging practice. In this practice, standard market classes and grades of live stock are illustrated, and instruction is given in the selection of animals according to feed-lot and market requirements. The stock pavilion offers opportunity for show and judging work. The lectures of the courses are supplemented by 1,000 or more lantern slides, charts, diagrams, models, and photographs. Work on pedigree and breed is facilitated by sets of the different herd, stud, and flock registers, and complete files of the leading American and British journals.

The equipment for instruction and investigation in the feeding, breeding, and management of live stock consists of modern buildings for the housing of beef cattle, swine, sheep, horses, and poultry, and a feed storage barn, with various forms of grinding mills and other machinery for the preparation of feed. The laboratories of the department afford facilities for both undergraduate and advanced study in animal nutrition, genetics, and animal diseases.

DAIRY HUSBANDRY.—Courses in the Department of Dairy Husbandry include judging, breeding, feeding, and management of dairy cattle, and the manufacture of dairy products. Instruction in dairy bacteriology and dairy chemistry is also furnished.

In addition to laboratories and lecture rooms, its equipment includes a complete commercial creamery equipped to manufacture butter, cheese, ice cream, and condensed milk, and facilities for the distribution of market milk. The department operates a farm of 160 acres and has 150 milch cows, bulls, and young stock, which are typical representatives of the Holstein-Friesian, Jersey, Guernsey, and Ayrshire breeds. It also has a cross-bred herd (Guernsey-Holstein-Friesian) which is kept for the purpose of studying the inheritance of certain characters in dairy cattle.

FARM MECHANICS.—Courses in the Department of Farm Mechanics cover the principles of engineering as applied to the various phases of agriculture, including the subjects of elementary farm mechanics, drainage, farm buildings, concrete construction, farm machinery, tractors, harvesting machinery, dairy machinery, and farm home equipment.

The University has a large assortment of tractors, gas engines, and a full line of farm machinery in this department for student use. Lighting units, water systems, etc. are provided in the home equipment laboratory. Draft-

ing room is provided for work in farm buildings, and also adequate facilities are provided for concrete construction.

Students who would enter teaching, research, or design work in this field should supplement the courses mentioned above with higher mathematics, mechanics, and other basic engineering courses as given in the College of Engineering.

FARM ORGANIZATION AND MANAGEMENT.—In the Department of Farm Organization and Management the principles of economics and accounting are applied to the business of farming.

The problems of farm organization and farm operation are dealt with. The work is based on the literature available on the subjects, and on the detailed farm management and cost accounting studies carried on with a considerable number of farmers located in several sections of the state.

Field trips will be conducted to some of the cooperating farms, and other farms in Champaign County, which serve as good demonstrations of certain farm management practices and furnish the basis for laboratory work. Such trips will constitute a part of the regular work in the farm management courses.

Special problems on systems of farming, the organization of individual farms, and land ownership and tenure are pursued by advanced students.

A special curriculum in which economics, accounting, business organization, and farm management occupy an important place is provided for agricultural students.

HOME ECONOMICS.—The courses of instruction given in the Department of Home Economics are planned to meet the needs of four classes of students: (a) those who desire a knowledge of the general principles and facts of home economics; (b) those who wish to make a specialty of home economics for the purpose of teaching the subject in secondary schools and colleges; (c) those who wish a knowledge of the principles underlying household administration and institutional management; (d) those who are interested in work in nutrition and dietetics.

Students who hold scholarships in home economics must take each semester at least four hours in home economics or in subjects required for admission to home economics.

The department is housed in the Woman's Building where laboratories, lecture rooms, and an apartment for home management are provided. A cafeteria serves as a teaching laboratory for students interested in institutional work.

HORTICULTURE.—Courses offered in the Department of Horticulture include instruction in the five divisions (pomology, olericulture, floriculture, landscape gardening, and forestry), and also in subjects dealing with all divisions, such as plant propagation, spraying, the evolution of horticultural plants, and experimental horticulture.

For instruction in pomology, use is made of the fruit plantations maintained by the department. Orchards of different ages afford opportunities for practice in pruning and for studies of tree types, while the products furnish materials for practice in grading and packing of fruits and study of systematic pomology. A collection of fruit packages illustrates types used in commercial packing. A collection of wax models of fruits represents the principal varieties grown in Illinois.

For olericulture, or vegetable gardening, areas of ground are reserved on which garden operations are illustrated and crops are grown. The equipment

also includes a greenhouse, hotbed frames and sash, seed drills, wheel hoes, hand tools, markers, planters, and other appliances for the growing and handling of vegetables.

The equipment in floriculture includes ten glass houses and a service building. Six of the houses, including the palm house, are used for instructional work exclusively, and the other four, while intended for experimental purposes, add to the facilities for instruction in floriculture as conducted on a commercial basis. Besides roses, carnations, and chrysanthemums, the houses contain a selection of plants representing the forms used in commercial and decorative or conservatory work. The service building contains laboratories, class rooms, offices, and potting, storage, and work rooms. An assortment of florist's supplies is maintained. Floricultural periodicals, reference books, and a series of over eight hundred slides add to the equipment. The ornamental gardens furnish illustrative materials for students in floriculture and landscape gardening.

The equipment in landscape gardening includes four drafting rooms with desks for individuals, modern filing devices for office practice, seminar rooms, lecture rooms, offices, and a library. The library contains a complete collection of books, periodicals, pamphlets, photographs of examples of foreign and American landscape gardening, and works on civic design, all carefully indexed. There is a collection of representative drawings and blue-prints from the offices of practicing landscape architects, and one of city maps.

The collection of trees and shrubs growing on the campus and about certain residences near the University furnishes material for plant studies in the courses in planting design. The herbarium of the division is also available for reference. A series of 3,500 lantern slides is used in lectures.

Instruction in forestry is facilitated by a collection of native woods and a forest tree plantation of about twenty acres, containing Scotch pine, white pine, Norway spruce, European larch, green ash, black walnut, hickory, bur oak, white elm, and other species.

CURRICULUM IN AGRICULTURE

Required for the Degree of Bachelor of Science in Agriculture

All students except those in the special curricula in home economics, floriculture, and landscape gardening are required to take the same work during the freshman year and part of the sophomore, junior, and senior years. This work gives the student a correct conception of the fundamental farm practices and an insight into the technical branches of agriculture, such as animal and dairy husbandry, horticulture, farm crops, soils, farm mechanics, and buildings, and leaves a large part of the junior and senior years open for elective studies.

One hundred thirty semester hours are required for graduation, as follows:

CURRICULUM IN FLORICULTURE

Required for the Degree of Bachelor of Science in Floriculture

The object of this curriculum is to fit men and women for the profession of floriculture. The laboratory exercises in technical subjects consist of practical work in greenhouses and gardens and give the students a working knowledge of the best methods now in use.

Of the 130 semester hours required for graduation, 103-105 are provided for in the prescribed list. The other 27-25 hours of credit necessary for graduation are electives.

Students registered in floriculture will be required to make at least one inspection trip before graduation. The annual trip costs about \$25.

TEACHER TRAINING COURSE (Smith-Hughes)

Students graduating with the degree of Bachelor of Science in Agriculture may qualify to teach under the Vocational Act if they have credit for 13 to 20 hours of Education, including one semester's teaching.

Students applying for the degree of Bachelor of Science in Agricultural Education must take the first two years in the College of Agriculture, as required for the degree of B.S. in Agriculture, and the last two years in the College of Education.

FARMERS' WEEK

The meeting formerly known as the Corn Growers' and Stockmens' Convention, is now conducted as Farmers' Week, held January 21-26, 1924. The program for this meeting is especially arranged to meet the needs of farmers and young men who can spend but a few days away from home, the farm as a unit being considered. Fundamental topics are discussed, such as factors determining systems of farming, physical layout of the farm-stead, location of buildings, garden, and lawn. The maintenance of soil fertility, plant relationships, means of reducing cost of farming operations, importance of accounting, relations of the farmer to his farm organizations, and community standards, are some of the problems studied. Intensive class work is given in animal husbandry, poultry, dairying, farm crops, soils, farm mechanics, farm management, and horticulture.

No entrance examinations are required or fees charged for this course. It is important that everyone should be here at the opening of the session. On the arrival at Champaign or Urbana, application should be made at the University Young Men's Christian Association, where information concerning board and room may be obtained.

TRACTOR AND GAS ENGINE SHORT COURSE

The Department of Farm Mechanics of the College of Agriculture conducts each year a series of one week short courses on Farm Tractors and Gas Engines. These courses are given before and after the regular Farmers' Week in January, extending into February. The work, of a very practical nature, is valuable to tractor owners and operators. Eight hours a day are spent on lecture and laboratory work on the operation, care, adjustment, and repair of tractors. Ignition, magnetos, carburetors, transmission systems, clutches, and lubrication systems are some of the special phases taken up.

Only a limited number can be accommodated, and a small fee is charged. Announcement is made through the agricultural papers in December, and those desiring to come should get their applications in early.

THE COLLEGE OF EDUCATION

The College of Education includes, besides the general courses leading to the degree of Bachelor of Science (Education), curricula in Agricultural Education, Athletic Coaching and Physical Education, Home Economics Education, Music Education, and Industrial Education. It is the aim of the College of Education to prepare its students for positions in the educational profession. It is, therefore, considered as one of the professional schools. In Industrial Education, and in Athletic Coaching and Physical Education, four-year curricula are offered.

ADMISSION.—In general, a student must complete two years (60 hours exclusive of military) of a curriculum in one of the colleges of Agriculture, Commerce and Business Administration, Engineering, or Liberal Arts and Sciences, or the School of Music, before being admitted to the College of Education. The exceptions to this are: Athletic Coaching and Physical Education, and Industrial Education. To the former, admission is granted on the fulfillment of admission to the University and the passing of a medical and physical examination; to the latter, admission is granted on the fulfillment of the requirements for admission to the University.

Juniors entering the College of Education through the College of Liberal Arts and Sciences should have completed the prescribed subjects and the first five group requirements for the degree of Bachelor of Arts. Juniors entering through the other colleges should select some curriculum in the college chosen, and complete the first two years. Juniors entering from other institutions must present 60 hours of a curriculum pursued in that institution.

Students who enter with more than 60 hours of credit will be given advanced standing in the College of Education to the amount which the credit is in excess of 60 hours.

GRADUATION.—Students who complete a curriculum in the College of Education are awarded the degree of Bachelor of Science.

The requirements for graduation are the following:

1. A curriculum of 70 hours, except in Athletic Coaching and Physical Education, in which 136 hours are required, and in Industrial Education, in which 130 hours are required.

2. A major of 20 hours in education, including the following courses: Educational Psychology, 3 hours; Technic of Teaching, 3 hours; a teachers' course in the subject of specialization, 3 hours; Principles of Secondary Education, 3 hours; and Educational Practice, 3-5 hours.

During the year 1923-24, the teachers' courses offered in the departments of the College of Liberal Arts and Sciences and the School of Music may be substituted for the teachers' courses which will later be given in the College of Education.

3. A subject of specialization, which the student expects to teach, must be selected. Twenty hours of approved courses must be completed, except that in Agricultural Education, 56 hours, Home Economics Education, 36 hours, Athletic Coaching and Physical Education, 47 hours, and Industrial Education, 25 hours must be completed.

In computing the hours in the subject of specialization, courses taken in other colleges prior to admission may be counted.

4. The remainder of the curriculum may be elected from a list of courses approved by the faculty of the College of Education.

TEACHER'S DIPLOMA.—Graduates of the College of Education who have satisfied the faculty with regard to their qualifications as teachers will be granted a Teacher's Diploma to apply toward the fulfillment of the requirements for certificates issued without examination.

CURRICULA.—Because of the variety of curricula which the student may offer for admission to the College of Education none is presented in any department except agricultural education, home economics education, industrial education, music education, and athletic coaching and physical education. Students preparing to teach other subjects should follow the requirements stated under "Graduation."

AGRICULTURAL AND HOME ECONOMICS EDUCATION.—Courses are offered for the preparation of teachers, supervisors, and administrators of Vocational Agriculture, and of Home Economics, designed to meet the requirements of the Smith-Hughes Act relating to teacher-training institutions.

Courses in teaching include practice in the departments of Vocational Agriculture and Home Economics in the high schools near the University. Opportunity is offered to graduate students to carry on investigations in the field of Agricultural Education.

SUGGESTED CURRICULA IN INDUSTRIAL EDUCATION

The Department of Industrial Education has been established as an aid in the promotion of the welfare of industry. This it aims to do largely through the better training of teachers. The department is also concerned with the training of teachers of shop work and drafting in the field of general education, and with the training of administrators for industrial education.

While the Department is organized as a part of the College of Education, it makes use of such courses in other colleges and departments as serve its purposes. This makes possible a wealth of material for students specializing in industrial education.

Attention is called to a requirement in effect in September, 1924, that in a curriculum in which less than 15 hours of laboratory sciences are required a student who enters without at least one unit of laboratory science shall be required to substitute 5 hours of a laboratory science for 5 hours of free electives in the requirements for graduation.

GRADUATE WORK IN EDUCATION.—Graduate work in education is offered to qualified students in the following fields: Educational administration; history of American education; educational psychology; educational statistics; educational measurements; educational theory. The facilities of the University, including the library, laboratories, and the Bureau of Educational Research, are such as to make possible the investigation of all kinds of problems connected with the development of educational practice, theory, and administration. The major purpose of graduate work in education is to train students for administrative positions or for work as educational specialists in connection with city and normal schools, colleges, and universities.

UNIVERSITY HIGH SCHOOL.—The laboratory work of the College of Education centers around the work of *University High School*. This school, limited to 250 students, offers the customary high-school curricula. The courses in educational practice are conducted by the instructors of the high school in connection with their high-school teaching. In this way, through observation of skilled teaching and participation, both in the student and the teacher activities, the college senior secures an unusual type of educational practice. It is believed that these courses add materially to the strength of the professional work of the College.

BUREAU OF EDUCATIONAL RESEARCH.—The Bureau of Educational Research is equipped for the following purposes: (a) the investigation of educational problems; (b) state service through the dissemination of information by correspondence with those making inquiry concerning the problems of education; and (c) the publication of research circulars and bulletins.

The University, through the Bureau, also offers a curriculum to prepare students for directing educational research in public schools. This curriculum is planned for three classes of students: (1) superintendents and supervisors who are directing educational research, (2) supervisors and teachers who desire to prepare themselves to direct educational research, and (3) graduate students in education.

COMMITTEE ON APPOINTMENT OF TEACHERS.—The Committee on Appointment of Teachers recommends qualified graduates of the University for positions as teachers or supervisors in public schools, colleges, and technical schools in response to requests from the school authorities. The Dean of the the College of Education is chairman of the Committee, and the Principal of the University High School is its secretary.

CERTIFICATION OF HIGH SCHOOL TEACHERS IN ILLINOIS.—In Illinois high schools all teachers must be duly certificated. County high school certificates are granted on examination by county superintendents, and State high-school certificates on examination by the State Superintendent. A county high-school certificate may be granted without examination to graduates who, within three years after graduation, present certified credits to the State Examining Board in the subjects of examination, accompanied by faculty recommendation of ability to teach in the high school. Following are the requirements for securing this certificate: (1) Graduation. (2) Faculty recommendation. (3) Certified credits for: (a) 8 semester hours in English; (b) 12 semester hours in education, including Educational Psychology and Technic of Teaching; (c) 3 majors of not less than 16 semester hours in three high-school subjects of groups of related subjects; (d) 3 minors of not less than 8 semester hours each in three high-school subjects; (4) Electives sufficient to make up the remaining number of semester hours required for graduation. When an applicant has had secondary or high-school work in

any subject which is offered as a major or a minor and such secondary work is the necessary prerequisite for the college work which is offered, the same may be counted in making the majors and minors, but shall not be counted in making the total number of semester hours required for graduates.

The following subjects may be combined within their groups to form a major: Algebra and geometry; botany, zoology, physiology; physics and chemistry; two or more history courses; mechanical drawing and manual training; domestic art and domestic science.

State high-school certificates are granted under the following conditions:

"A four-year high-school certificate valid in any high school in the State, for which the requirements shall be: (1) Graduation from a recognized college or university, or the completion of an equivalent preparation; (2) three years' successful teaching, two of which shall have been in the State on a first grade, a high-school, or a supervisory county certificate; (3) a successful examination in English, educational psychology, and the principles and methods of teaching; and (4) the preparation of a thesis on one or more secondary school problems, the subjects of which shall be selected from a list prescribed by the Superintendent of Public Instruction."

Education 10 and 25 embody the materials usually covered by the State examinations in educational psychology and in methods of teaching.

REQUIREMENTS OF THE NORTH CENTRAL ASSOCIATION.—Students who anticipate teaching in high schools accredited to the North Central Association of Colleges and Secondary Schools should complete courses in education aggregating at least *fifteen* semester hours. This requirement of the Association is effective for new teachers after 1924, but is not retroactive.

THE COLLEGE OF LAW

For the *faculty* of the College of Law and for the *courses* in law, see under "Law" in the Description of Courses, Part III; for *fees* and *expenses*, see page 87.

The University offers in the College of Law a three-year curriculum, based on an entrance requirement of two years of college work and leading to the degree of Bachelor of Laws (LL.B.); and a four-year curriculum, based on an entrance requirement of two years of college work and leading, at the end of two years, to the degree of Bachelor of Science in Law (B.S.) and to the professional degrees of Bachelor of Laws (LL.B.) or of Doctor of Law (J.D.) on the completion of the course. The degree of Doctor of Law is also open to students in the three-year curriculum who meet the requirements.

ADMISSION.—*Three-Year Curriculum.* For admission to the three-year curriculum as a regular student, an applicant must be matriculated and have 60 hours of credit in a college of this University; or have completed two full years of work as given at another college or university of recognized standing, as a matriculated student in such college or university; or have received by transfer 60 hours of university credit here.

Thirty hours of law may be credited toward the degree of Bachelor of Arts in the College of Liberal Arts and Sciences or toward the degree of Bachelor of Science in the College of Commerce and Business Administration. In this manner students may secure in six years both a degree in arts or commerce and a degree in law. This combination of curricula is known as the three-three combined curriculum: see the statement about electives in law in the College of Liberal Arts and Sciences (p. 94) and the curriculum in Commerce and Law (p. 116). A candidate for both degrees must in his fourth year register in the College of Law, and also register or file a copy of his study-list in his other college, as that college may require.

Four-Year Curriculum.—The four-year curriculum in law leads to a first degree of Bachelor of Science in law, and a second degree of Bachelor of Laws or of Doctor of Law. This course provides a broader training for students preparing to enter the legal profession, offers an opportunity for correlating work in the College of Law with advanced courses in the social sciences. The admission requirement is 60 hours of credit (not including military and physical education) in a college of this University, or equivalent credit from another college or university of recognized standing. Students in this curriculum will normally be candidates for the degree of Bachelor of Science (B.S.) in law in two years and for the professional degree of Bachelor of Laws (LL.B.) or of Doctor of Law (J.D.) on the completion of the curriculum.

In exceptional instances, persons over twenty-one years of age may, with the approval of the Dean, be admitted as unclassified students. In determining whether a person may be admitted as an unclassified student, consideration is given to the applicant's age and experience, as bearing upon his ability to pursue law study successfully. An unclassified student is not a candidate for a degree, and credit earned by an unclassified student may not be counted toward a degree in law. Neither admission nor attendance as an

unclassified student in one semester gives a right to continue as an unclassified student in any subsequent semester. If an unclassified student's record has been in any respect unsatisfactory, the Dean may refuse permission to register in any subsequent semester. An unclassified student is not a member of the first, second, or third year classes in the College of Law, or of any class in the University.

ADVANCED STANDING.—Students from law schools of approved standing who comply with the requirements for admission to this school may receive by transfer not to exceed two years of credit. Students from other schools may in special cases be given advanced standing on examination on subjects taken by them in such schools.

REQUIREMENTS FOR GRADUATION, DEGREE OF BACHELOR OF SCIENCE IN LAW.—The degree of Bachelor of Science in law is not a professional degree. Candidates must offer 130 hours of university work; but courses open to university freshmen and sophomores will not, when taken by juniors or seniors, count for the degree, except by special recommendation of the College of Law. The required credits must include the following courses or their equivalents:

(a) *Required of all candidates:* Rhetoric 1, 2, 6 hours; University Latin, one year, for students not offering two years of high-school Latin for entrance; Mathematics, or the Physical or Natural Sciences, 10 hours; Psychology or Philosophy (a course in Logic being required), 6 hours; Law, not less than 30 or more than 40 hours.

(b) *Additional requirements for students entering from a College of Liberal Arts and Sciences:* Foreign Language (including the Latin prescribed above), English, Rhetoric (not counting Rhetoric 1 and 2), or Public Speaking, 20 hours (but in the case of a student offering for entrance three or more high-school units of foreign language this requirement will be 12 hours).

Two minors of at least 12 and 8 hours, respectively, in History, Political Science, Economics, Philosophy, Sociology, or Public Speaking.

(c) *Additional requirements for students entering from a College of Commerce and Business Administration:* Accountancy 1a, 1b, 6 hours; Business Organization and Operation 1, 3 hours; Economics 1, 3, 51, and 10, 14 hours; Additional advanced courses in Economics or Accountancy (Economics 55 being for this purpose an advanced course), 6 hours; History, Political Science, Philosophy, or Sociology, 9 hours; Foreign Language (including the Latin prescribed above), English, Rhetoric (not counting Rhetoric 1 and 2), or Public Speaking, 10 hours.

A candidate for the degree of Bachelor of Science in law who, at the beginning of an academic year, has attained sixty hours of credit, exclusive of Military Drill and Physical Education, and so is entitled to admission to the four-year curriculum in law, must register in the College of Law. If he does not so register, he will not be permitted to include courses taken during that year in making up the total of 130 hours required for the degree. However, in order to satisfy subject or group requirements for the degree, he may substitute for credits previously acquired credits obtained that year in courses falling within these requirements.

A candidate who, during an academic year, increases his college credits from under 60 hours to over that number, exclusive of Military Drill and Physical Education, may offer them all toward the 130 required hours, subject to the other requirements for the degree.

All candidates in their first year of work in the College of Law must take Contracts and Torts.

DEGREE OF BACHELOR OF LAWS.—The degree of Bachelor of Laws in the three-year curriculum will be conferred on students who complete eighty-four hours of law work distributed over a period equal to three academic years.

The degree of Bachelor of Laws will also be granted to students in the four-year curriculum who shall have complied with the requirements for the degree of Bachelor of Science in law and in addition shall have received credit for 56 hours in legal or other courses; provided that their total credits in law courses shall be not less than 86 hours, and provided that credits allowed in law courses in excess of 86 hours shall be confined to courses in public law or in the legal aspects of economic problems.

In either case the candidate must have pursued the courses of the first year and the second-year course in Equity Jurisdiction and have secured grades not lower than C in subjects aggregating at least three-fourths of his law work at the University.

DEGREE OF DOCTOR OF LAW.—The degree of Doctor of Law will be granted to students in the three-year curriculum who comply with the following conditions:

1. Secure a Bachelor's degree in the College of Liberal Arts and Sciences or in the College of Commerce and Business Administration at least two academic years prior to the completion of the courses for the degree of Doctor of Law.
2. Complete the work required for the degree of Bachelor of Laws.
3. Obtain a minimum average grade of B in College of Law. If the grade is below B, the degree conferred is Bachelor of Laws.
4. Present a thesis approved by the faculty of the College of Law, in accordance with the requirements.

The degree of Doctor of Law will be granted to students in the four-year curriculum who comply with the following conditions:

1. Complete the work required for the degree of Bachelor of Science in Law.
2. Complete the work of the four-year law curriculum with a minimum average grade of B. If the grade is below B, the degree conferred is Bachelor of Laws.
3. Present a thesis approved by the faculty of the College of Law, in accordance with the requirements.

FIFTH AND SIXTH YEARS

The same as for students from a College of Liberal Arts and Sciences

THE LAW LIBRARY.—The Law Library contains over 32,000 volumes, including all the reports of the courts of last resort of all the states; the United States Supreme, Circuit, and District Court reports; the National Reporter System; the English reports; the Irish reports; the Scotch appeal cases; the current Canadian and Australian reports, and complete reports of several of the Canadian provinces; the statutes of the various states; several sets of selected cases, such as the American Reports, American State Reports, American Decisions, Lawyers' Reports (Annotated), and American and English encyclopedias and digests; and a full collection of standard text-books and legal periodicals.

PURPOSE AND METHOD OF INSTRUCTION.—The method of instruction is chiefly the study and discussion of decided cases, with collateral reading of statutes, selections from standard treatises, and periodicals, accompanied by free discussion in the class room. The aim is to train the student in habits of legal reasoning as well as to impart a thoro knowledge of the law as it actually is.

The criticism frequently urged against law schools that they do not give practical training in practice and procedure has been met by the establishment of suitable courses aimed to give skill and facility in the application of legal rules. This work is covered by several special courses.

First year men are instructed in legal bibliography and are drilled in the use of digests and reports. In the courses in common law pleading, equity pleading, and Illinois procedure, practical exercises are given in drafting and

criticising pleadings and other litigious papers. The course in conveyancing offers training in the examination of abstracts of title covering a great variety of transfers and proceedings, and includes practical problems in drafting contracts, deeds, and other legal documents.

The sessions of the Practice Court are open to members of the third year class. The court is presided over by Judge O. A. Harker, who has had an experience of twenty-five years as a judge of the Circuit and Appellate Courts of Illinois. It is the purpose to have the proceedings of the Practice Court conform to proceedings in the various courts of the state. Students are trained in the preparation of pleadings, brief making, legal investigation and argument, the preparation of legal documents, and in the trial of cases, both civil and criminal.

SCHOLARSHIPS.—Eight scholarships are open to matriculated students of the first and second years, to be awarded at the end of each year, four of \$37.50 each semester and four of \$18.75 each semester, available in discharge of incidental fees.

ILLINOIS LAW QUARTERLY.—The *Illinois Law Quarterly* is devoted to the scientific study and investigation of the law, and gives particular attention to problems of interest to the Bar of Illinois. It is edited by the faculty and a board of student editors, the members of which are chosen primarily on the basis of scholarship. The publication of the *Quarterly* and its use in connection with various courses are a part of the educational program of the College of Law.

ORDER OF THE COIF.—Each year ten percent of the senior class (or a minimum of three) are eligible to the Order of the Coif, a national honorary law society organized to promote scholarship in law, which was established at the University in 1904. Elections of seniors to the Order of the Coif are held at the beginning of the second semester.

THE SCHOOL OF MUSIC

For *admission* to the School of Music, see the general statement of entrance requirements of the University, pages 58-74. For *fees* see page 87. For the *faculty* of the School of Music and description of the *courses* in music, see under "Music" in the "Description of Courses," Part III.

The University offers in the School of Music regular courses leading to the degree of Bachelor of Music.

In conjunction with the College of Education the degree of Bachelor of Science in Music Education is offered to students completing the curriculum in Public School Music. (See page 157.)

A student matriculated in the School of Music takes throughout his course two applied subjects, one a major (piano, voice, etc.) in which two half-hour lessons a week are taken, and the other a minor in which two twenty-minute lessons a week are taken.

Students of the School of Music are not allowed to participate in any musical activity outside the University without the consent of the Director of the School of Music.

All courses in History, Theory, and Appreciation of Music are open to students free of charge.

The University Choral Society and the University Orchestra are open to qualified persons from any College.

For the requirements for admission, see pages 58 to 74.

GRADUATION.—Candidates for the degree of Bachelor of Music must offer credit for 130 semester hours, including the prescribed subjects named below, one of which must be piano.

All music students are required to attend the concerts and recitals which are given under the auspices of the School of Music. More than three unexcused absences during the semester will affect the grade of the major practical subject, of which this required attendance is a part.

Public performance being also a part of the course of study in a practical subject, all students are required to participate in a program when sufficiently prepared.

CURRICULUM WITH MAJOR IN VOCAL MUSIC

The first and second years are the same as in the instrumental major curriculum, except that voice is the major practical subject.

At least eight hours each of French, German, and Italian are required for the vocal major. One of the languages is to be taken in the sophomore year, and a *second* language in the junior year. If the student has not presented for admission at least two units of the *third* language, he must elect this language in the senior year. Otherwise, a course in English is advised for this elective.

THEORY MAJOR.—A student may take a major in Theory of Music only on recommendation of the Director. In addition to the complete Theory course offered in the instrumental major, he must complete the courses in Advanced Composition (Music 11 and 12), and in Advanced Orchestration (Music 17 and 18). In addition he must present a recital during the senior year of his own compositions and orchestral arrangements. His work in applied music must be equivalent to that of three years of collegiate study. A thesis is required.

MUSICAL ORGANIZATIONS.—The University Choral Society is conducted by the Director of the School of Music, and gives two choral concerts during the year. The chorus meets once a week. Members of the faculty, students of the University, and singers of the community are admitted by examination or conference with the Director.

¹Semester hours. For definition, see page 223.

²See paragraph above relating to language requirements.

The University Orchestra is conducted by the Director of the University Bands, and meets for rehearsal once a week. Concerts are given throughout the year. It is open to all students who qualify for membership.

JUILLIARD SCHOLARSHIPS AND FELLOWSHIPS.—The Juilliard Musical Foundation, established in July, 1919, by the will of the late Augustus D. Juilliard of New York City, provides aid for worthy students in music at various institutions, including this University, in the form of scholarships and fellowships.

Scholarships are awarded to seniors and juniors and the fellowship assigned to this University is awarded to a recent graduate of the School of Music. Both awards are made by vote of the faculty of the School of Music which also determines the division of the scholarship stipend.

THE LIBRARY SCHOOL

For a description of the *Library Building*, see page 50, for an account of the *libraries* themselves, see page 52; for the *collection in library economy*, see page 52; for *fees*, see page 87.

The University offers through the Library School a two-year curriculum for college graduates who wish to enter librarianship as a profession, and certain library courses for students in other schools and colleges of the University who may wish to elect them as a part of their training. The instruction in the first or junior year covers the generally accepted methods and practices in library work; students who complete this year's work are prepared to accept positions in library service. In the second or senior year emphasis is placed on historical and comparative methods of treatment; new subjects are introduced to give the student the necessary outlook and equipment for more responsible positions. Altho stress is laid on simplicity and economy, methods are taught to enable students to work in large libraries where bibliographic exactness is required. Emphasis is laid on the extension of the activities of the public library, and on the importance of cooperation between the library and the schools and other educational and social agencies.

A member of the senior class in any other school or college of the University may, with the approval of the Director of the Library School, elect any course for which he is prepared. The school offers to freshmen and sophomores a course on the use of the library and the ordinary reference books.

For the requirements for admission, see pages 58-74.

RECOMMENDED PRELIMINARY CURRICULUM.—Undergraduates who intend, on the completion of their college work, to apply for admission to the Library School, are requested to select their courses so as to conform in general to the following recommended program of studies preparatory to library work.

English literature, 10¹; Rhetoric, 6.

Latin, 8, in addition to four years of high school Latin.

German, 12, in addition to two years of high school German.

French, 8, in addition to two years of high school French.

German and French begun in college instead of in high school should be continued for a longer period.

Medieval and modern European history, 6; history of England, 6; history of the United States, 6.

Economics, 6; political science, 4; sociology, 6; philosophy, 4; general psychology, 4; zoology, 6; botany, 4; chemistry or physics, 6.

The total of this work is 102 semester hours, leaving the equivalent of about one year of a four-year course free for work in other subjects or for more work in the subjects named.

ADVANCED STANDING.—College graduates who have had approved library experience or who have attended other library schools may be accorded

¹The figure after each subject denotes the minimum number of semester hours which the student should devote to that subject.

advanced standing by securing credit for some of the courses required for graduation. After satisfying all entrance requirements and after matriculation, the applicant for advanced standing may secure such credit either by examination or by transfer of credits from an approved institution offering courses in library economy. (See page 66.)

PREPARATION FOR SPECIAL LIBRARIES.—For students who plan to work in special libraries, a modification of the senior course is encouraged. A student who has completed the work of the junior year may petition for such modification, provided he intends to work in a business, technical, agricultural, or other special library, and provided his undergraduate courses included sufficient work in the field in which he expects to specialize. In such instances, the faculty may permit the student to substitute for certain of the Library School courses such electives in the various colleges of the University as will fit the student for special library work in the subject selected.

LIBRARY VISITS AND FIELD WORK.—Each year all the students in the School visit the libraries and certain of the book binderies, book stores, and printing establishments of either Chicago and vicinity or St. Louis and vicinity. During this visit, which occupies one week, the students are accompanied by members of the faculty. The estimated expense of this visit is about \$30 for each trip. Students are required to present a written report on their return to the University, as the work forms part of Library 23 and Library 26.

Each student in the senior year is required to spend one month in an assigned library, usually a public library, working under the same conditions as a member of the staff of that library, but without compensation. Written and oral reports are required, as the work forms part of Library 26. The expense for the month of field work has been about \$50.

CURRICULUM.—The curriculum is two years in length. For graduation a student must receive credit for all courses except those marked with an asterisk (*), which are elective. The degree of Bachelor of Library Science is conferred on a student who has completed the required work in the two years' curriculum, and has received credit in courses amounting to 62 semester hours.

LIBRARY CLUB.—Any member of the Library School faculty or of the staff of the University Library and any student in the Library School may become a member. Six meetings are held each year.

VISITING LECTURERS.—In addition to the courses of the regular two years' curriculum, the School also offers to its students the advantages of hearing lectures by men and women prominent in bibliographical and library fields. From eight to ten such additional lectures on subjects connected with librarianship are given each year.

THE SCHOOL OF RAILWAY ENGINEERING AND ADMINISTRATION

The School of Railway Engineering and Administration has been established to prepare men for the technical and administrative departments of railroads. The work offered is arranged in five different curricula, any one of which is designed to occupy four years' time. The curricula are:

- Railway Civil Engineering
- Railway Electrical Engineering
- Railway Mechanical Engineering
- Railway Administration
- Railway Transportation

The first three of these curricula are administered by the College of Engineering, and a description of them appears with that of other curricula offered by this College. Students are admitted to them under the same conditions as to other curricula of the College of Engineering, and they have available for their use all of the library, drafting-room, and laboratory facilities which constitute the equipment of this College. The last two curricula are administered by the College of Commerce and Business Administration; they are described in detail in connection with the other curricula of this College. Students are admitted to them under the same conditions as to other curricula of the College of Commerce and Business Administration.

It is the purpose of each of these curricula to add to a foundation of general discipline specialized training for those who look forward to careers in railway service.

The University offered facilities for advanced study and research in various lines as early as 1872. Organized graduate instruction, however, under the name of the Graduate School, was first undertaken in 1892. In 1894 the administration of the school was vested in the Council of Administration, and the Vice-President of the University became Dean of the School. In 1906 the Graduate School was organized as a separate faculty, consisting of a dean and members of the University faculty assigned to this duty by the President.

By action of the Trustees the teaching faculty of the Graduate School includes all members of the University faculty who give instruction in approved graduate courses. The affairs of the School, however, are in charge of the Executive Faculty appointed each year by the President.

ADMISSION.—Admission to the Graduate School may be granted to graduates of institutions whose requirements for the bachelor's degree are substantially equivalent to those of the University, and to applicants from other institutions approved by the Executive Faculty. *Admission to the Graduate School does not, however, imply admission to candidacy for an advanced degree, and gives no right or claim to be so admitted. Such candidacy is determined by the Faculty after the student has demonstrated by his work here, for from two to five months, that he has the ability to do major work of graduate character. A mere accumulation of "credits" or "grades" is not sufficient.*

Admission to graduate courses may be granted only to those who have had the requisite undergraduate work in those courses or departments. But a student of mature age who satisfies the Dean and the department concerned of his ability to pursue graduate work in a given line may be enrolled in particular graduate courses, without reference to a degree, and permitted to carry on such study or investigation under the direction of a department of the University as the department shall recommend and the Dean approve.

Application blanks for admission may be secured from the Registrar of the University. Every applicant must submit with his application for admission an official transcript of his college record.

CHARACTER OF GRADUATE WORK.—The principal aim of graduate study is the development of the power of independent work and the promotion of the spirit of research. Each candidate for a degree is expected to have a wide knowledge of his subject and of related fields of work; for the graduate student is not expected to get from lecture and laboratory courses all the knowledge and training necessary to meet the requirements for his degree.

GRADUATE STUDY IN THE SUMMER.—Graduate students in the summer session are subject to the same scholastic requirements as those in the regular University year. Their study lists must be approved by the Dean of the Graduate School, or his representative. Attendance during four summer sessions, or one semester and two summer sessions, is considered the equivalent of one year in residence. If in these sessions the required amount of work is properly done a master's degree may be earned in this way. The faculty is unwilling to accept summer-session work beyond the master's degree towards the doctors degree, except in the case of a student who works in a summer session preceding or following a regular year's attendance at the University. In no case may the last year's work for the doctorate be done in disconnected summer sessions.

No course offered in the summer session may be taken for credit towards a higher degree unless it is specially described in the summer-session circular as accepted for that purpose.

SUMMER WORK IN MEDICAL SCIENCES.—Graduate courses in medical sciences are offered in the summer quarter between June and September at the College of Medicine of the University in Chicago.

MASTERS' DEGREES.—The master's degree conferred depends on the character of the bachelor's degree. The A.M. usually follows A.B., M.S. follows B.S. However, this sequence may be departed from in cases where the undergraduate course of study of the candidate was of a kind for which some institutions give A.B., while others give B.S.

Candidates for the degree of Master of Arts or Master of Science are required to do at least one full year's work in residence, including a thesis. By this is meant from four to five units courses each semester or their equivalent. A unit course is one which requires ten hours of time a week through one semester, or a minimum of 180 hours, irrespective of the mode of distribution of that time in class work, laboratory work, and private study.

Students in zoology who take work in a marine or fresh-water biological laboratory or station are permitted to offer not less than six weeks nor more than nine weeks of such work in partial fulfillment of the requirement for the master's degree¹.

Similar arrangements are made for students of geology in connection with Geological Surveys.

A candidate for a master's degree may do all his work in one subject, or he may select a major and one minor, or a major and two minors. A major or minor denotes the field of knowledge of a department, or such part thereof as constitutes a separate and independent division of that field.

¹The experience at a marine laboratory, which as indicated above, is optional with the candidate for the master's degree, is required of all candidates for the doctorate in zoology.

The ability to use one or more of the modern languages ordinarily studied in the undergraduate curriculum is expected of all candidates for the master's degree, and in some lines of study is required.

Each candidate for a master's degree is required to present a thesis on some subject approved by the professor in charge of his major work and the Executive Faculty of the Graduate School. Such approval, except in case of students working for a master's degree in summer sessions only, must be secured not later than six weeks from the time when the student begins his year of residence. Students working for a master's degree exclusively in summer sessions must announce their thesis subjects not later than the beginning of their third session in residence. The requirement of a thesis may be waived, however, on the recommendation of the head of the department in which the student is doing his major work and the approval of the Dean, provided application to waive the thesis is made at the time for announcing thesis subjects. A student excused from writing a thesis must replace it with additional courses of instruction.

The thesis in its final form, together with a certificate of approval by the proper officer, must be left by the professor in charge at the Dean's office at least two weeks before the date on which the degree is to be conferred. No article prepared for another use, or previously published, will be accepted as a thesis.

Under proper conditions a student may be permitted to complete the last fourth of his work, if devoted to his thesis, under leave of absence.

Students' work is graded in five classes, A, B, C, D, and E. The last indicates a failure. D indicates unsatisfactory, tho passable work.

SECOND DEGREES IN ENGINEERING.—Two classes of second degrees are open to graduates of the College of Engineering, namely, academic and professional.

The academic second degree in engineering is Master of Science, following Bachelor of Science, in architecture, architectural engineering, civil engineering, electrical engineering, etc. This degree is conferred in accordance with the regulations described above for *academic work in residence only*.

The *professional* second degrees in engineering are as follows:

Master of Architecture, after B.S. in architecture.

Architectural Engineer, after B.S. in architectural engineering.

Ceramic Engineer, after B.S. in ceramic engineering.

Civil Engineer, after B.S. in civil engineering or B.S. in municipal and sanitary engineering.

Electrical Engineer, after B.S. in electrical engineering.

Mechanical Engineer, after B.S. in mechanical engineering.

Engineer of Mines, Civil Engineer, Electrical Engineer, or Mechanical Engineer, after B.S. in mining or railway engineering, according to the course.

Professional degrees are conferred on two classes of candidates: (1) graduates of the College of Engineering of the University who have been engaged in acceptable professional work away from the University for a period of not less than three years after receiving the degree of Bachelor of Science; (2) graduates of the University, or of institutions of equal standing who have been engaged in acceptable professional work in residence at the University for a period of not less than three years after receiving the degree of Bachelor of Science.

In "acceptable professional work" may be included contributions to technical literature, activity in professional societies, investigation of engineering problems, and the teaching of engineering subjects.

A candidate must declare his candidacy and file with the Dean of the College of Engineering, as chairman of the committee in charge, a detailed statement covering his professional study and experience, not later than the first Monday in November preceding the commencement at which he proposes to qualify. Prior to December 31 next succeeding, he must submit for approval an outline of his proposed thesis and he must file his completed thesis not later than April 1. If the statement of professional experience and study and the thesis are accepted, the candidate must present himself at commencement in order to receive the degree.

Candidates for professional engineering degrees who already hold the degree of Master of Science may qualify for the professional degree after two years of professional work.

A candidate for a professional engineering degree must pay the incidental fee of fifty dollars on being notified that his professional study and experience are accepted as qualifying him to enter as a candidate for the degree. No one will be enrolled as a candidate for the degree at the following commencement who does not pay his fee at this time. When a candidate for a professional engineering degree has been accepted and paid his fee, he is eligible to receive the degree at any time within five years, without additional fee, on completion of the requirements; provided, however, that unless he completes the requirements within two years his name will be dropped from the list of candidates and in order to receive the degree within the five-year period he must register once more.

THE DEGREE OF DOCTOR OF PHILOSOPHY.—Each student who is seeking the degree of Doctor of Philosophy is expected to choose for study and final examination a major subject, or field of study, and a first and a second minor. The major subject is the field in which the student expects to become expert and an authority.

One minor must be a subject closely related to the major and may, under certain conditions and with proper approval, be a division of the major field of study. The remaining minor must be taken from a department of study other than that of the major.

For the doctor's degree no definite division of a student's time among major and minors can be made, to hold in all cases. In general the faculty approves an arrangement which, distributing the student's time through the required three years, divides it equally among his three subjects in his first year of graduate study; in the proportion of two to one, as between his major and first minor, in the second year of graduate study (his second minor being finished and dropped at the end of the first year); and gives all his time to his major during his third year.

While "full-time work" in the first year of graduate study, leading usually to a master's degree, is at least eight units for the two semesters, full-time work after the first year is not reckoned in units. The student is simply required to devote all his time to his work. Nor is there any necessary correspondence between the number of courses taken and the number of units required in the first year, or full-time work in any year. A first-year student might possibly secure all the credit necessary in two or three courses; and a second-year or third-year student might conceivably be devoting all his time to one course and his research or to his research alone.

The *minimum* period of study required for securing the degree of Doctor of Philosophy is three years, during which the student is required to devote all his working time to his studies. All three years must be spent in residence at some accredited educational institution and either the first two or the last one of the three must be spent at the University. The degree is conferred, however, not for residence during a certain period, but for scholarly attainments and power of investigation, as proved by thesis and examinations.

Credit for work in other universities is not "transferred". The candidate is examined here on the subjects offered by him for the advanced degree. However, his period of residence at another institution of proper grade may be accepted in fulfillment of the residence requirement of the University, so far as it goes.

EXAMINATIONS.—Towards the end of his second year of study, or by special permission, at the beginning of his third year, the candidate for the degree must submit to a *preliminary examination*, in order to determine whether he will be accepted as a candidate for the degree in the following year. This examination is intended to test the student's knowledge of the fields of his major and minor subjects of study only. It is partly oral, and may be wholly so.

The student will not be admitted to his preliminary examination until the faculty is satisfied that he has finished substantially the equivalent of two years' graduate work. He must do a full year's graduate work between his preliminary examination and the completion of his work for the doctorate.

The candidate will be required to demonstrate his ability to read French and German and other languages needed in his work. This test of proficiency in the use of French and German must be passed before the student is admitted to the preliminary examination in major and minor subjects.

At least two weeks before the time when the degree is conferred, the candidate must submit to a *final examination*, given by a committee appointed by the Dean. This examination is primarily on the research work of the student, as embodied in his thesis, but it is not confined to that. It extends to the whole field of study of the candidate. It will not be confined to the courses which the candidate has attended in the University of Illinois only, if he has done part of the work elsewhere; nor even to the field covered by the courses specifically taken in this or other universities; but will be so conducted as to determine whether the candidate has a satisfactory grasp of his major subject as a whole, and a general acquaintance with the fields of knowledge represented by his course of study.

The final examination may not be divided. The examination must be taken all at one time even tho it requires several sessions.

If after having passed his preliminary examination, he fails in the third year of his study to meet the expectations of the professors in charge of his work, or in any way fails to maintain the standard of scholarship and power of research expected of him, he may be refused admission to the final examination.

Before the candidate is admitted to the final examination and the defense of his thesis, he may be required to take any other examination, oral or written, that is thought proper by the departments in which he has studied.

The above examinations are in addition to those in the courses for which the student is registered. These must be taken at the times for which they are set in the examination schedule.

THESIS.—The power of independent research must be shown by the production of a thesis on some topic connected with the major subject of study. The candidate is expected to defend his thesis or dissertation before the members of the faculty, or as many of them as may wish to question him about it, in connection with his final examination.

The subject of the thesis should be chosen not later than the end of the second year of residence and must be submitted for formal approval by the faculty not later than six weeks from the beginning of his third year of residence.

A typewritten copy of the complete thesis, *on thesis paper*¹, and in final form, must be deposited in the office of the Dean for presentation to the examining committee not later than two weeks prior to the final examination and not less than four weeks before the time when the degree is conferred. At the same time, the candidate must deposit with the Dean a manuscript of the essential part, or an abstract, or a digest of his thesis, in condition for publication at a cost not to exceed seventy-five dollars (\$75). The manuscript must be sufficient to show the method followed, the evidence used and the conclusions reached in the investigation, and must bear the approval of the department and the Executive Faculty of the Graduate School.

The candidate must pay to the Comptroller before graduation the sum of seventy-five dollars, out of which the University will print at least one hundred copies of this manuscript for circulation by the University, unless the thesis entire or in abbreviated form is published by the author or is accepted for publication by a standard journal or publisher within a year from the date of graduation. In the latter event, and after one hundred copies have been presented to the University by the writer, the cash deposit shall be returned to him.

The typewritten and printed forms of the thesis must comply with the regulations given in "instructions for the preparation of masters' and doctors' theses," copies of which may be obtained at the Dean's office on application.

The degree of Doctor of Philosophy in Engineering is offered in certain lines of academic work of a high scholastic type in engineering science for students who wish to prepare themselves as teachers, investigators, and experts.

The general requirements for this degree, as to preliminary education, linguistic attainments, etc., are the same as in other lines.

The following lines of engineering science are open as majors: Engineering mechanics; steam engineering; hydraulic and sanitary engineering; electrical engineering; heating and ventilation engineering; railway engineering; masonry construction and structural engineering; coal-mining engineering.

The first minor may be any of the above or one of the following sciences or an authorized combination of two of them: Theoretical mechanics; mathematics; thermodynamics; bacteriology; chemistry; geology; physics (experimental or mathematical); zoology; botany; economics.

The second minor should be in other than engineering subjects.

SCHOLARSHIPS AND FELLOWSHIPS.—A number of scholarships and fellowships have been established by the Trustees of the University. To first-year graduate students of ability and promise there are open a number of scholarships with a stipend of \$300 each and freedom from tuition, incidental, and laboratory fees¹. To second-year and third-year graduate students, that is, those who have had one or two years of graduate study, there are open fellow-

¹No other will be accepted by the Dean.

ships with a stipend varying from \$350 to \$500, with freedom from the above-mentioned fees. The larger stipends are given only to students who are expected to take their degrees within the year. Each holder of a fellowship or scholarship must pay the matriculation fee of ten dollars, unless he holds a first degree from the University, and also the diploma fee of ten dollars on receiving his diploma.

Candidates for these scholarships and fellowships must be graduates of the University, or of colleges or universities having equivalent requirements for bachelors' degrees.

Application must be made on blanks to be obtained from the Dean of the Graduate School. These application forms should be sent to the Dean of the Graduate School as early as possible in February of the academic year preceding that for which the fellowship is desired.

Nominations to fellowships are made on the grounds of worthiness of character, scholastic attainments, and promise of success in the principal line of study or research to which the candidate proposes to devote himself. Scholarships and fellowships are not given to candidates who are over thirty years of age at the time when the appointment is to be made.

For second-year fellowships, adequate preparation in French, and for third-year fellowships, adequate preparation in French and German is required.

An appointment as honorary fellow, without stipend, may be made as specified for paid fellowships in the case of any one who has shown distinguished merit in his work.

THE CARR FELLOWSHIP IN CHEMISTRY.—The Honorable Robert F. Carr, of the class of 1893, gave in 1919 the sum of ten thousand dollars, the income of which is to be used as the stipendium of a fellowship in chemistry or chemical engineering.

RESEARCH GRADUATE ASSISTANTS IN THE ENGINEERING EXPERIMENT STATION.—The Engineering Experiment Station is devoted to research. Its purposes are the study of problems of special importance to engineers and to manufacturing, railway, mining, and industrial interests, and the stimulation and elevation of engineering education.

Fourteen research graduate assistantships have been established, open to graduates of approved technical schools and universities. The stipend is \$500 a year for each. Applicants to whom these graduate assistantships are awarded agree to hold them for two years, devoting one-half of their time to the work of the Engineering Experiment Station. At the end of this period, if all requirements have been met, the degree of Master of Science will be conferred.

Applications for these graduate assistantships should be made to the Director of the Engineering Experiment Station not later than February 1.

CORNING GLASS WORKS FELLOWSHIPS.—In June, 1920, the National Research Council created a fellowship in the Department of Ceramics with funds given it by the Corning Glass Works. The appointees to this fellowship have the status of fellows or half-time research assistants; they are given the use of the University's laboratories, under the condition that they pay for the materials used and the equipment damaged.

SOCIAL HYGIENE BOARD FELLOWSHIPS.—In January, 1920, the U. S. Interdepartmental Social Hygiene Board gave to the University \$3,500, of

¹Up to a certain amount.

which \$3,000 has been used to establish three fellowships of \$800 and one fellowship of \$600 in chemistry. The holders are given the same privileges as the persons holding Carr Fellowships in Chemistry.

DUPONT FELLOWSHIPS.—DuPont de Nemours and Company gave the University in 1918 the sum of \$750 with which to establish a fellowship in chemistry. They have repeated the gift in the succeeding years.

THE ILLINOIS HISTORICAL SURVEY.—The Illinois Historical Survey is a department of the Graduate School established in 1910 to conduct research in the history of the State of Illinois. It possesses extensive collections of source materials for western history and is continually adding to them. It assists the Illinois State Historical Library in the publication of these and other materials in the *Illinois Historical Collections*. It also offers to graduate students direction in the preparation of theses or monographs based on its collections.

The following persons constitute the staff of the Survey for the year 1923-24: Professor Laurence M. Larson, Ph.D., Director; Associate Professor Theodore Calvin Pease, Ph.D., Assistant Director; Ameda R. King, Assistant.

GRADUATE WORK IN THE SUMMER SESSION.—The Summer Session places emphasis on graduate courses leading to the master's degree. The departments related to high-school teaching and to educational administration have been selected as the centers of this emphasis. An attempt is made to vary the graduate offerings from year to year so that advanced students each year may find acceptable work in their chosen fields.

The normal requirement for the master's degree is full work of graduate grade, satisfactorily completed, through one year of residence. This means a residence of thirty-six weeks at the University. Qualified graduate students may fulfill this residence requirement in four summer sessions of eight weeks each.

In addition to work in the Urbana departments graduate courses are offered in the Summer Sessions in the College of Medicine.

MILITARY SCIENCE

Under the Morrill Land Grant of 1862, military training is required; and under the Act of Congress of June 3, 1916, there are at the University of Illinois six units of the Reserve Officers' Training Corps.

All male students who are citizens of the United States and physically fit, except (1) students over twenty-five years of age when entering the University and (2) students entering the University with junior standing, are enrolled during their first two years in the Reserve Officers' Training Corps.

The courses cover four consecutive years of work. The basic course consists of the first two years, and students in this course are required to devote three periods a week of not less than one hour each to military training. For each semester of work one hour of credit toward graduation is granted. Students may attend a summer camp of six weeks. No university credit is allowed for this camp.

The final two years are called the advanced course. Students who have completed the basic course may elect to take the advanced course, and, if selected by the President of the University and the Professor of Military Science and Tactics, they will be eligible to sign the contract with the Government to pursue the course for two years for which they will receive the payment of commutation of rations provided by law. Students of the advanced course are required to devote five hours a week to military science and training for the two years, and the completion of this work is for them a prerequisite for graduation; they are also required to attend one summer camp of six weeks duration. From the beginning of the advanced course until the conclusion, except for the time spent in camp, such students receive commutation of rations at a rate determined by the Secretary of War; the rate at present is thirty cents a day. At camp, rations in kind are furnished and payment of seventy cents a day is made each student. For each semester of work in the advanced course, students receive $1\frac{1}{2}$ hours' credit toward graduation. Students who have been members of units of the Reserve Officers' Training Corps may take advanced work, provided they present certificates signed by the professor of military science and tactics under whom they served, indicating that they have satisfactorily completed courses in military science.

A student who completes the elective advanced course is eligible for appointment by the President of the United States as a reserve officer of the United States Army for a period of five years. Students who complete the basic course of the first two years are eligible for appointment as sergeants in the enlisted reserve corps of the United States Army; those who complete one year of advanced course work are eligible for appointment to any grade in the enlisted reserve corps.

Military instruction is under the direction of officers of the United States Army. The courses have special reference to the duties of officers. The equipment for military instruction is furnished by the War Department and includes: for Infantry, United States magazine rifles, automatic pistols, revolvers, machine guns, trench mortar, and 37 millimeter guns; for Artillery, nine American three-inch guns and complete equipment for battery and

battalion headquarters, also one each of the following: 155 mm. Howitzer (Schneider), 155 mm. gun (Filloux), 4.7 inch American gun, 75 mm. French gun, 75 mm. British gun, 75 mm. American gun, engineer and signal equipment, tractors, reconnaissance car and trucks; seventy-five horses, saddles, bridles; for Cavalry, 60 horses with full field equipment, rifles, pistols, sabres, automatic rifles, and machine guns; for Engineers, engineer instruments used for military sketching, surveying and making of maps; demolition equipment, map reproduction and photographic equipment, tools and supplies for field fortification, bridge material, and heavy pontoon equipment; for Signal Corps, radio telephone and telegraph instruments, field telephones, telegraph instruments, heliographs, flags, wire-carts, storage batteries, etc.; for Air Service, airplanes, airplane engines, aerial machine guns, aerial bombs, motor test block, radio code and buzzer sets, etc. Ammunition and supplies for demonstrations and practice are furnished. Students in each arm of the service are given instruction in the functions and equipment of the other arms.

The Cadet Brigade consists of an Infantry Brigade of two regiments, a Field Artillery Brigade of two regiments, a Cavalry Brigade of two regiments, one battalion of Engineers, one Signal Corps Battalion, one Observation Group of Air Service. The training in each of these courses is directed by an army officer of the appropriate arm of service. A student is free to choose any branch for which his aptitude and course of study fit him. Appointments as cadet officers in the Brigade are made on the nomination of the Commandant of Cadets, confirmed by the President of the University. Student assistants in military science are selected from the field officers and captains of the brigade, on the recommendation of the professor of military science and tactics. They receive \$100 a year, payable at the rate of \$10 a month from September 1. Certain cadet officers are awarded military scholarships of the value of \$50 per year, payable at the end of the year.

A committee appointed by the President of the University examines candidates for nomination to the Governor of the State for commissions as brevet captains in the State Militia. Candidates must be members of the senior class in full standing; must have completed the course of military studies; must have served two semesters as commissioned officers; and must be approved by the Council of Administration as having good reputations as scholars, officers, and gentlemen.

The University military band is composed of students, and every full term of service therein is counted as one term of drill. Those who play in the band after having earned the four military credits necessary for graduation are paid for this additional service an amount equal to the term fees for the year, as required from students who are residents of Illinois. Besides giving several concerts during the year, the band furnishes the music for regimental formations and ceremonies and other occasions as required by the President of the University. Membership is decided by competitive examination.

PHYSICAL EDUCATION

FOR MEN.—The purpose of the work in the Department of Physical Education is to place emphasis on the educative values of physical activities in developing function, perfecting nervous control, and on mental and moral improvement. The courses are so administered that the following benefits are likewise attained:

Hygienic—Development of organic vigor, improvement of health, and the creation of good physical habits.

Corrective—Correction of posture and carriage and of undeveloped or deformed parts.

Recreative—Giving an opportunity and incentive for physical recreation.

Physical Education is compulsory for freshmen. Regular classes are formed in boxing, wrestling, fencing, swimming, and for class and individual proficiency on the various gymnasium appliances. Lectures are given on personal hygiene.

All competitive athletic games are under direct supervision of the Director of Physical Education, and an examination is required to show that membership on any team will not cause injury, but will tend to improve the physical condition of the participant. No student whose class work is unsatisfactory is allowed to play on a University team.

FOR WOMEN.—The purpose of the work of this department is to improve and maintain the health of the individual. The physical condition and motor ability of each student is determined on her entrance to the University by a medical examination and motor efficiency tests given by the Department of Health Service and the Department of Physical Education. Exercise is prescribed which will best meet her individual need. Further examination is given whenever necessary.

The class work embraces corrective, hygienic, and recreative exercise, including gymnastics, apparatus, marching, folk dances, and games. Tennis, hockey, basketball, volley ball, baseball, soccer, football, archery, quoits, and bowling are played in season.

The gymnasium is open at certain hours and under suitable restrictions to all women of the University.

The swimming pool is open daily, except Saturday, from 10 to 12 a. m., and from 2 to 5:30 p. m. The regulation swimming suit of one piece must be made of cotton jersey or other cotton material.

THE SUMMER SESSION

The Summer Session for 1923 opened June 18, and closed August 11, making a term of eight weeks, or half a semester, for all students except graduate students who are candidates for a master's degree, for whom the prescribed term is nine weeks, and except students taking only courses in library science, physical education for men, or athletic coaching, for whom the term was six weeks from June 18. The Summer Session of 1924 will open on June 16 and close August 9.

All courses, except those in library science and physical education for men, will extend through the eight weeks. Students who wish to remain for only six weeks, however, may obtain from the Director of the Summer Session a certificate for such attendance, but university credit will not be given for six weeks' courses except for those in physical education for men and in athletic coaching.

Students may register for courses aggregating eight hours or less.

The Summer Session is an organized integral part of the University year. Tho its organization is not subdivided into colleges, numerous courses are offered in departments in the Colleges of Liberal Arts and Sciences, Commerce, Agriculture, Engineering, Education, and Law, and the School of Music and the Library School. Unless otherwise specified, all courses may be counted toward a bachelor's or a master's degree. By two Summer Sessions a regular student may reduce the eight semesters to seven, thus securing his degree a half year earlier than he would otherwise have done.

Students who have just graduated from an accredited high school may matriculate in the Summer Session and obtain credit for a half-semester. Pre-medical students are strongly urged to do this and to register for chemistry or zoology, mathematics, rhetoric, or other prescribed pre-medical subjects.

One purpose of the Summer Session is to meet the needs of the teachers in the public schools who wish to spend part of the summer vacation in serious study or investigation. Numerous courses are designed for high-school teachers, supervising officers, teachers of special subjects (agriculture, art, manual training, music, industrial education, etc.), and coaches of athletic teams; graduate courses are offered for college instructors, school supervisors, and principals who are working for advanced degrees.

Admission in regular status to courses in the Summer Session for which university credit is granted is limited to students who could be regularly admitted to the colleges of the University (Liberal Arts and Sciences, or Commerce, or Engineering, or Agriculture) in which they would be registered in the winter session. See pages 58-74.

Admission to courses which give university credit, as *unclassified students*, *not candidates for a degree*, may be granted to persons 21 years of age or over, subject to the general regulations of the University relating to unclassified students.

A student who transfers from another college or university must present a letter of honorable dismissal, and a transcript of record from the institution previously attended.

Students will present themselves for registration on Monday, June 16, 1924.

FEES.—*All fees are due on registration.* An incidental fee of twenty dollars (thirty dollars for students in the College of Law) is required of all residents of Illinois in regular attendance at the Session, and of thirty dollars (forty-five dollars for students in the College of Law) for students not residing in the State. This entitles one to admission to regular courses and to all special lectures. An extra laboratory fee is charged in some courses for materials used. Any single course, counting not more than two and one-half credit hours, may be taken by Illinois students for a fee of ten dollars (fifteen dollars for students not residing in the State), and the laboratory fee, if there be any in connection with the course taken.

Fees in addition to the above general fees are required for practical courses in music.

SCHOLARSHIPS.—All high-school teachers in Illinois, and all other teachers in the State who are qualified to matriculate in the University as regular students, are entitled to Summer Session scholarships of twelve dollars, reducing for them the incidental fee from twenty dollars to eight dollars. Similar scholarships are granted librarians and library assistants employed by Illinois libraries and persons under appointment to such positions. To matriculate regularly in the University, one must either pass the entrance examinations, or present a certificate from an accredited high school or other evidence of having completed the requisite amount of preparatory work.

The scholarship privilege is extended also to persons graduated from the Illinois State Teachers' Colleges during the academic year preceding the session in which the scholarship is desired, and to persons (otherwise qualified) who have not been teachers, but who are under contract to teach in the State during the coming year.

Application blanks for scholarships may be obtained by addressing the Registrar.

GRADUATE WORK.—The Summer Session places emphasis on graduate courses leading to the master's degree. The departments related to high-school teaching and to educational administration have been selected as the centers of this emphasis. An attempt is made to vary the graduate offerings from year to year so that advanced students each year may find acceptable work in their chosen fields.

The normal requirement for the master's degree is full work of graduate grade, satisfactorily completed, through one year of residence. This means a residence of thirty-six weeks at the University. Qualified graduate students may fulfill this residence requirement in four summer sessions of eight weeks each.

In certain cases it will be possible for the graduate student to complete the last fourth of his residence requirement under a leave of absence. This privilege may be granted in the event that the student is able to take advantage of opportunities for research and investigation that are not afforded in the University community. Superintendents, principals, and class room

teachers frequently find it possible to carry on investigations in connection with their school work. There are, for example, numerous problems of school administration and of teaching for which the public school itself forms the only available "laboratory". Where the investigation of such problems is prosecuted with the cooperation of a department of the University it may be possible to count the work toward the master's degree.

COURSES IN LIBRARY SCIENCE.—Courses for the training of librarians have been offered since the summer of 1911, and two distinct groups of courses were offered in 1923.

(1) For college graduates, with or without library experience, there were eight-weeks courses selected from the two-year curriculum of the Library School, counting toward the B.L.S. degree. A student completing the courses offered in 1922, and in 1923, has completed the first semester's work in the Library School.

(2) For high-school graduates who are employed as librarians or library assistants, and for certain others who have completed one full year of study in a college or normal school, six-weeks courses were offered which were more elementary and not counted toward the B.L.S. degree. Problems confronting Illinois libraries were given special consideration in these six-weeks courses, and until May 1, only applicants from Illinois were accepted for admission. After that date those from other states were admitted.

Application blanks for admission must be secured, filled out, and sent to the Director of the School with additional statements, showing the applicant's qualifications for admission. The application must be filed sufficiently early to enable the School to receive replies from librarians and others who have personal knowledge of the applicant.

COURSES IN MEDICINE AND DENTISTRY.—Graduate work in the College of Medicine was offered in pharmacology, pathology, and bacteriology in the Summer Session of 1923. The courses included: Advanced Pharmacodynamics, Research in Pharmacodynamics, Advanced Pathogenesis, and a course in Pathology and Bacteriology Research.

Six-week summer courses are given in the summer for students desiring to advance their work or lighten their curriculum for the ensuing year in the College of Dentistry. The following courses were offered in the Summer Session of 1923: Operative Dentistry: Dental Anatomy, Operative Technics, and Diagnosis for Operative Procedures; Prosthetic Dentistry: Prosthetic Technics (first and third years), and Ceramics; Therapeutics: Clinical Practice. Courses were also arranged for individual and groups practitioners.

COURSES FOR ATHLETIC COACHES.—Courses for Athletic Coaches under the general direction of George A. Huff, Director of Physical Education for Men, meet the growing demand from high schools and from colleges and other institutions for trained men to direct and coach athletics. They are designed to assist both the high-school teacher or principal who desires to become proficient in coaching one or more athletic teams and the man who intends to take up the directing of athletics or coaching as a vocation.

The courses occupy the first six weeks. All the courses are taught by men who coach the athletic teams of the University of Illinois. The athletic plant of the University is turned into a laboratory and the larger part of the instruction is given on Illinois Field.

Students may devote either their whole time or part of their time to these courses. Detailed information regarding the courses for Athletic Coaches may be found in a special circular which will be sent on application to George A. Huff, Director, Gymnasium, Urbana, Illinois.

ATHLETICS.—Altho both the men's and women's gymnasiums are used in some parts of the regular class work in Physical Education, they are nevertheless open for the purpose of general recreation and exercise to students not registered in those courses. Both of the gymnasiums contain swimming pools, shower baths and other forms of bath, lockers, and dressing rooms. Students are charged a small sum for a locker. The tennis courts, general athletic fields, and golf courses on the University campus are open to students.

DESCRIPTION OF COURSES.—For a description of the courses offered in the Summer Session, see the General Description of Courses, beginning on page 223, the description of courses under Medicine, beginning on page 198, and Dentistry, beginning on page 212.

THE COLLEGE OF MEDICINE

For the *faculty* of the College of Medicine, see pages 15-39; for a description of the *building* see page 51; for fees, see page 88; for scholarships, see pages 86 and 193.

The College of Medicine of the University is in Chicago, located in the city block bounded by Harrison, Congress, Honore, and Lincoln streets.

For the requirements for admission, see page 66.

The general rule of the University with reference to unclassified students applies to the College of Medicine: "Persons over twenty-one years of age, *not candidates for a degree*, may, on approval of the Dean, be admitted to classes for which they are prepared."

ADVANCED STANDING.—The University will accept scholarship and time credits for work done in medical colleges having standards equal to those of the College of Medicine of the University, in so far as this work coincides with or is the full equivalent of the courses prescribed by the University.

The pre-medical work of the applicant must meet in full the admission requirements for the class which he desires to enter.

The applicant must present a letter of honorable dismissal from the college in which he pursued his medical studies and be eligible for promotion therein. He must further be able to comply with the requirements for such promotion in the University. (See page 195.) Moreover, his record must be of such a character as to give evidence of a high grade of scholarship.

Irregularities due to differences in the curricula must be satisfactorily adjusted during the first year of the student's attendance.

REGISTRATION.—Students are required to register in the office of the Secretary immediately on the opening of the term for the work of that term, and credit will be allowed only in the branches in which they are registered. Students will be registered in the order in which their fees are paid. The number of students in each class is limited to one hundred.

FEES.—For information concerning fees, see page 88.

LIVING EXPENSES.—The expense of living in Chicago is less than in most large cities. From forty to fifty dollars a month may be regarded as adequate or the ordinary living expenses of a student exclusive of books, clothing, railroad fare, and miscellaneous needs.

The expense for books varies between \$25.00 and \$50.00 a year. The instructors at the beginning of each course direct their students in regard to the purchase of text books.

REA SCHOLARSHIPS.—Through the generosity of the late Professor R. A. Rea a fund has been provided for worthy students, four scholarships each year, awarded by the Faculty.

For the season of 1922-23, they were granted to the following students:

JACK B. BATKO

OTTO BOHEMIL PAVLIN

BENGT NORMAN BENGSTON

DAVID ROSENBLUM

LOREN LESLIE COLLINS

ROBERT SCHAFFER

DAVID SCHINBERG

For information concerning other scholarships available to students at the College of Medicine, see page 86.

ADMISSION TO LICENSING EXAMINATIONS IN ENGLAND.—On the recommendation of the Committee of Management of the Examining Board in England, the Royal Colleges of Physicians and Surgeons have added the University of Illinois to the list of universities whose medical departments are recognized by that Board. By this action graduates of this institution are exempt from all preliminary examinations and admitted to the final licensing examination of the Examining Board.

REQUIREMENTS FOR GRADUATION.—A candidate for graduation from the College of Medicine must meet the following requirements:

1. He must have presented acceptable evidence of good moral character.
2. He must have paid all indebtedness to the college.
3. He must have satisfactorily completed the prescribed curriculum of the College of Medicine, comprising four years, of thirty-four weeks each and in addition must have satisfactorily completed a hospital course of not less than twelve months' duration in a hospital approved by the University. A year of research or graduate work will be accepted in lieu of the hospital year.

Students admitted to advanced standing from other medical schools will not be given full time credit for any year of less than thirty-two weeks of actual work.

The fourth year of the curriculum must have been taken in the College of Medicine.

The diploma for the degree of Doctor of Medicine will be issued on the presentation of satisfactory evidence that the fifth year has been acceptably completed.

CURRICULA AND DEGREES.—The student is offered his choice of the following combinations:

1. A nine-year curriculum—four years in the College of Liberal Arts and Sciences at Urbana, leading to the degree of Bachelor of Arts, followed by five years in the College of Medicine in Chicago, leading to the degree of Doctor of Medicine. This course of study is recommended to students who can afford the time for it, and who are of the average age of graduation from the public high schools.

2. An eight-year curriculum—three years in the College of Liberal Arts and Sciences at Urbana, followed by five years in the College of Medicine in Chicago. Students taking this course are permitted, at the end of their first year in the College of Medicine, to transfer credits in the medical sciences to complete the requirements for graduation of the College of Liberal Arts and Sciences, and receive the degree of Bachelor of Arts. On the completion of the remaining four years in the College of Medicine they receive the degree of Doctor of Medicine.

3. A seven-year curriculum—two years in a recognized college of liberal arts and sciences followed by five years in the College of Medicine. The work of the first two years must include certain prescribed subjects. On the completion of the first two years in the College of Medicine, these students receive the degree of Bachelor of Science; and on the completion of the five years in the College of Medicine, they receive the degree of Doctor of Medicine. The two years of work in arts and sciences required for admission to the College of Medicine may be taken in the College of Liberal Arts and Sciences at Urbana.

GENERAL PLAN OF INSTRUCTION.—The course of study extends over five years. During the first two years the work is, in the main, confined

to the sciences fundamental to the practice of medicine, and the time of the student is largely devoted to laboratory work.

During the third and fourth years the time is largely devoted to the various clinical branches, emphasis being given to practical instruction in dispensary and hospital clinics.

The fifth year consists of a twelve months' interne service in a hospital approved by the faculty of the college, or a year of research or graduate work.

Students are prohibited from doing work that interferes *in any way* with the fulfillment of the requirements of the curriculum. Unofficial clinical work may not be substituted for the official clinical requirements of the curriculum.

In the second semester of the second year, the student is required to elect six hours a week from the courses offered by the pre-clinical departments. If the student has a satisfactory scholarship record, and can satisfy the head of the department in which he desires to work as to his ability to pursue the line of endeavor he proposes to undertake, he may be permitted to register in the graduate school for one unit of graduate work.

In the third year, one hour of elective work a week is required if the regular curriculum is pursued. By a reduction in the required hours in certain of the prescribed subjects, ninety-six hours of elective work may be taken in each semester. This work may be either in pre-clinical or clinical subjects. A student may in this way emphasize his training in some particular subject or subjects. The work may be counted for graduate credit provided the student carries on his work in a department represented on the graduate faculty, and can satisfy the head of the department in which he desires to work as to his ability to satisfactorily pursue the line of work he proposes to undertake.

In the fourth year, the student must elect four hours of work a week from the optional subjects and at least one hour of these electives must be selected from the optional subjects in surgery.

OPTIONAL WORK.—Optional courses supplementary to the required work of the regular curriculum are offered in many departments. Students may be permitted to register for such courses after completing the work of the first year with the consent of the committee. No credit toward the degree in medicine is allowed for this work.

EXAMINATIONS.—General examinations are held in all subjects at the end of each term during the week set apart for this purpose.

Absences from examinations count as failures unless they occur for satisfactory reasons, in which case the student may be examined subsequently, provided permission for such examination be granted by the Dean.

The system of grading is as follows: A, excellent; B, good; C, fair; D, poor (but passing); E, failure. A "failure" can be removed only by repetition of the subject in course in an approved institution. No "conditions" are allowed.

Failures to the extent of 100 hours may be carried from the first (Freshman) year into the second (Sophomore) year or from the second (Sophomore) year to the third (Junior) year. No failures of the third (Junior) year may be carried into the fourth (Senior) year. No failures may be carried from the fourth (Senior) year into the fifth (Interne) year.

Failures must be made up in course, and the number of hours of such

failures shall be deducted from the total number of hours of the regular work for the period.

A student who in any semester receives failures in one-half the total number of hours in his course shall be refused further registration in the College of Medicine.

No student having grades below C in subjects aggregating twenty-five percent of the work of the first two years will be recommended for the degree of Bachelor of Science.

CLINICAL FACILITIES; DISPENSARY.—The Dispensary is divided into ten departments: medicine, surgery, pediatrics, orthopedics, laryngology, dermatology, ophthalmology, gynecology, neurology, and genito-urinary diseases.

Opportunities are afforded the student to examine the cases personally under the guidance of instructors. The student is required to make laboratory examinations pertaining to his own cases. Such examinations as the Wasserman reaction are made by the instructors in the laboratory but the student has an opportunity to follow these and to learn the technic involved.

CLINICS.—In addition to those in the dispensary more than 600 clinics in various hospitals are open to students. The great majority of diseases seen in the temperate zone are demonstrated, and most of the operations of surgery are performed in these clinics.

Fourth-year students are required to examine and diagnose many cases, and under certain conditions may assist in operations.

The Cook County Hospital is located within half a block of the College. This institution is the largest charity hospital in America, and in it is conducted much of the clinical instruction of the College. Medical appointments in this hospital are made each year by the Civil Service Board. The sixty-four internes are selected each spring by competitive examination. Only graduates of medical colleges of Cook County are eligible for these examinations. The internes serve eighteen months.

The County Morgue is located in the hospital grounds, and daily post-mortems are held by the pathologists of the hospital.

The hospital tickets cost \$5.00 each. They are for sale at the office of the Warden. They admit the holders to all clinics and autopsies and to all public operations and lectures.

The University Hospital is located at the corner of Congress and Lincoln streets, opposite the College. The Directors of the hospital are members of the faculty of the College. Bedside instruction is given, under certain conditions, to small groups of students. No students, excepting those of the College, were admitted to clinical instruction in the hospital during the year 1922-23.

There is no charge for admission to these clinics.

The selection of internes for this hospital is limited to graduates of the College.

Clinical instruction to students in small groups, and bedside instruction to those serving as externes, may be given in the following hospitals: Augustana Hospital, Michael Reese Hospital, St. Luke's Hospital, Illinois Charitable Eye and Ear Infirmary, St. Joseph's Hospital, West Side Hospital, Grant Hospital, St. Elizabeth's Hospital, Chicago Policlinic Hospital, St. Mary's of Nazareth Hospital.

NEW HOSPITAL FACILITIES.—The General Assembly of 1919 appropriated \$300,000 for the construction of a Clinical Building. This building will

be devoted to the investigation and treatment of those diseases which belong in the fields of general medicine, surgery, obstetrics, and gynecology.

The General Assembly of 1919 also appropriated about \$1,000,000 to the State Department of Public Welfare for the construction of a group of Educational Hospitals in Chicago. The first building in this group provides for the Illinois Charitable Eye and Ear Infirmary, a Psychiatric Institute, and a Surgical (Orthopedic) Institute for Children.

The last General Assembly supplemented the above appropriation by \$1,000,000 to complete and equip the buildings under construction, and \$500,000 for a research laboratory and library building.

In 1919, the State Department of Public Welfare and the University agreed to a plan of cooperation with the following objects in view: To construct and maintain a group of hospitals and institutes in Chicago where laboratories, libraries, and medical skill could be readily obtained; to provide medical treatment for the indigent sick of the State; to give young men and women a medical education and training for the prevention as well as the cure of disease; to help practicing physicians of the State to keep in touch with the latest and best methods of preventing and curing human ailments; to tell the people of the State through special lectures and bulletins how to keep themselves physically efficient. The object is to determine the cause of sickness and on the basis of this knowledge institute preventive measures.

LIBRARY FACILITIES.—The Quine library contains 27,464 bound volumes and a number of reprints, including the standard text-books, works of reference, monographs, and journal files in the fields of medicine, dentistry, and pharmacy. The collection in the School of Pharmacy containing 4,303 volumes and 2,500 pamphlets, is also available.

THE COLLEGE OF DENTISTRY

(For the *faculty* of the College of Dentistry, see pages 15-39; for a description of the *building*, see page 52; for *fees*, see page 88; for *scholarships*, see page 86).

The College of Dentistry is located in what is known as "the clinical center of Chicago", at Harrison and Honore streets, opposite Cook County Hospital. Adjoining it on the north is the University of Illinois College of Medicine, and on the west the West Side Hospital. Within a radius of a few blocks are a majority of the great metropolitan hospitals and professional colleges and schools. It is about a fifteen minutes' ride from the Loop, or down-town district, by either the Garfield Park branch of the Metropolitan elevated line, or the Harrison Street surface cars.

For the requirements for admission, see page 67.

Students who meet the requirements for admission to the University of Illinois, and who have studied dentistry in any college accredited to the University for not less than one year, may be admitted to advanced standing. Such students, however, will be required to meet all the conditions of the curriculum of the College of Dentistry.

Graduates of colleges of medicine accredited to the University may be admitted to the College of Dentistry and given credit for one year in time and for all satisfactorily completed courses which are required by the College.

Students holding credits other than those listed above should communicate with the Dean for further information.

REQUIREMENTS FOR GRADUATION.—The requirements for the degree of Doctor of Dental Surgery are as follows:

1. Completion of the work of the curriculum with a grade of 75 percent or more in at least 75 percent of the subjects of the entire course. (The curriculum covers four years of college work.)
2. Attainment of the age of twenty-one years.
3. Settlement of all obligations to the University.

Students may become candidates for thesis honors through meritorious work. "Graduation with Thesis" is awarded on the presentation of a satisfactory scientific essay.

CURRICULA AND DEGREES.—1. *A Five-Year Curriculum.*—One year in a recognized college of liberal arts and sciences followed by four years in the College of Dentistry. The work of the first year must include certain prescribed subjects. On the completion of the fourth year in the College of Dentistry the degree of Doctor of Dental Surgery is conferred.

2. *A Six-Year Curriculum.*—Two years in a recognized college of liberal arts and sciences followed by four years in the College of Dentistry. The work of the two years in the arts and sciences must include certain prescribed subjects and must have been preceded by 15 units acquired in an accredited high school. On the completion of the two years in the College of Dentistry students will receive the degree of Bachelor of

Science; and on the completion of the fourth year in the College of Dentistry they will receive the degree of Doctor of Dental Surgery.

REQUIREMENTS FOR SIX-YEAR COURSE.—1. *High-School Requirements.* English, 3 units¹; Algebra, 1 unit; Plane geometry, 1 unit; Physics with laboratory work, 1 unit; Electives, 9 units.

2. *College Requirement.*—Two years in a recognized college or university with a minimum of sixty semester hours, distributed as follows: Chemistry, 12 semester hours²; Physics, 6 semester hours; Biology, 8 semester hours; English, 6 semester hours; German, French, Spanish, or Italian, 6 semester hours; Electives (not including chemistry, physics, or biology), 6 semester hours; Free electives, 16 semester hours.

LICENSE TO PRACTICE IN ENGLAND.—On recommendation of the Board of Examiners in Dental Surgery, the Council of the Royal College of Surgeons, in London, has added the College of Dentistry of the University to the list of dental schools recognized by the college. This recognition implies that the Royal College of Surgeons will exempt graduates in dental surgery of the University from the preliminary science examination for the License in Dental Surgery, and will accept such parts of the curriculum for the License as are completed in the College of Dentistry of the University toward the curriculum of studies required for a license.

HONORARY RESEARCH ASSISTANTS.—Students may, during the last year of their course, be permitted to pursue advanced work in a department, provided, first, that they have shown special aptitude; and, second, that their previous work has been of a sufficiently high grade. If at the end of the last year's work the student's application and attainment are regarded as of a sufficiently high character, he may be awarded an honorary research assistantship.

INFIRMARY.—A large part of the senior course is devoted to practical dentistry, and for this purpose an Infirmary is provided. The Infirmary is supplied with modern accessories, and there are windows on three sides, as well as sky-lights overhead, so that all work may be done by daylight.

LIBRARY.—The general library of the University in Chicago is in the Medical building, which adjoins the College of Dentistry. In this library there are over 27,425 volumes, including a comprehensive collection of works on dental and allied subjects. All standard dental journals are kept on file, and there is a representative collection of works in literature, standard and modern, for the use of English classes in the College of Dentistry. The library, in charge of a librarian and assistant, is open from 9 a. m. to 5 p. m., and room is provided for students desirous of employing their study periods in the library.

¹See definition of unit, p. 58.

²By a *semester hour* of college credit is meant the work of a class meeting once a week for a semester of 18 weeks. Sixty semester hours represent ordinarily two years of college work.

THE SCHOOL OF PHARMACY

For the *faculty* of the School of Pharmacy, see pages 15-39; for a description of the *building*, see page 52; for *scholarships*, see page 86.

The School of Pharmacy was originally the Chicago College of Pharmacy and was incorporated under that name September 5, 1859. In October, 1859, the first course of lectures was instituted, occupying three evenings a week for a period of six months. The first class, of two students, was graduated in 1861. The war caused a suspension of teaching, and the school was not reopened until 1870. The fire of 1871 destroyed the equipment, but in 1872 instruction was resumed for the second time and has since continued without interruption.

The College was formally united with the University May 1, 1896, becoming the technical School of Pharmacy of the University of Illinois.

The School of Pharmacy buildings are located at the corner of Wood and Flournoy streets in Chicago. This location is in the great medical center of Chicago and close to the colleges of Medicine and Dentistry of the University.

For admission, see the statement of the requirements of the University, page 68.

Students who have pursued courses of study in other schools of pharmacy will be given credit for such portions of their work as are equivalent to the work required by this School.

For several years past it has been found necessary to close the enrollment in the School of Pharmacy before the beginning of the session. It is, therefore, of advantage to students to enroll early. The first step in matriculation is to fill out an application for admission, the blank for which may be secured by addressing the Dean of the School of Pharmacy.

REQUIREMENTS FOR GRADUATION.—The candidate for the degree of Graduate of Pharmacy must be twenty-one years of age, and must have attended two annual courses of instruction, the first of which may have been in some other recognized school of pharmacy. He must have attended regularly the laboratory and lecture courses and have satisfactorily finished the work required.

Students who have successfully met the scholarship requirement, but are lacking in age, will receive a certificate and will be awarded the diploma when this requirement is satisfied.

The candidate for the degree of Pharmaceutical Chemist must have successfully completed the course leading to the degree of Graduate in Pharmacy in this School or in some other recognized school of pharmacy whose requirements for admission and graduation are equivalent to ours. He must have satisfactorily completed the work of the third year at this School.

Persons who meet the general requirements for admission to the University may be granted credits on other University courses for equivalent work completed at the School of Pharmacy.

STATE REGISTRATION.—The pharmacy law of Illinois requires all candidates for the certificate of registered pharmacist to pass an examination given by the State Department of Registration and Education. Credit is given as a part of the "practical experience in compounding drugs" required by the law, for the actual time of attendance at a recognized school of pharmacy, but not to exceed twenty-four months for registered pharmacist or twelve months for registered assistant pharmacist. An amendment to the pharmacy law, in effect July 1, 1917, requires graduation from a recognized school of pharmacy of candidates for the certificates of registered pharmacist, with the exception of those drug clerks who were entered on the rolls of the Board of Pharmacy as apprentices or assistants prior to the date when the law went into effect. The diploma of this school also admits to the pharmacy examinations in other states where the graduation requirement is in force.

The School holds membership in the American Conference of Pharmaceutical Faculties.

FEES AND EXPENSES.—For a statement of the fees, see page 88. Fees are payable in advance. Students unable to meet this requirement must make satisfactory arrangements with the Dean at the beginning of the course.

Board and lodging, within a convenient distance of the School, can be had for from ten to fifteen dollars a week.

A register of students desiring employment and of pharmacists wishing to employ students is kept at the School. Students desiring employment are invited to correspond with the Dean.

CURRICULA AND DEGREES.—*A Two-Year Curriculum.* The course leading to the degree of Graduate in Pharmacy appeals especially to young men and women who desire to qualify themselves to become pharmacists. The instruction is so arranged as to require the attendance of first year students on three or four days each week; second year students on five days.

The system of teaching includes lectures, demonstrations, recitations, and written and oral examinations, as well as individual instruction in actual work in operative and dispensing pharmacy, analytical chemistry, use of the compound microscope, etc.

A Three-Year Curriculum.—To meet the demand for special training on the part of students who desire to pursue more extended courses in pharmaceutical chemistry, applied microscopy, and bacteriology, or to prepare themselves for positions in food and drug laboratories, the School offers a three-year course leading to the degree of Pharmaceutical Chemist. This course comprises three annual sessions of thirty-four weeks each, the first two years being identical with the course for the degree of Graduate in Pharmacy.

EQUIPMENT.—The capacity of the laboratories is 370 students, working at one time.

The laboratories are supplied with compound microscopes, analytical balances, and special apparatus, and with collections of crude drugs, medicinal plants, chemicals, and pharmaceutical products.

The library contains over four thousand volumes, including, in addition to works of reference, many rare books, and complete files of the leading pharmaceutical journals.

PART III

DESCRIPTION OF COURSES

EXPLANATION

The arrangement of subjects in the following Description of Courses is alphabetical. The connections of allied departments are indicated by cross references.

Following the description of each course of instruction will be found the requirements, if any, for admission to that particular course. The sequence indicated by these prerequisites must be followed. For instance, under Art and Design 7a, Still-life in Oil Colors, the prerequisites given are Art and Design 1 and 2. These two courses must be completed before Course 7a may be taken.

If a course not required for graduation is selected by fewer than five students it may be withdrawn for the semester.

Graduate courses are numbered upward from 100.

Credit is reckoned, for *undergraduate students*, in *semester hours*, or simply *hours*. An *hour* is one class period a week for one semester or the equivalent in laboratory, shop, or drawing room.

The semester and the number of hours each semester for which the course counts are shown after each course, thus: I, II; (2). The Roman figures indicate semesters; the Arabic numerals in parentheses indicate hours of credit for *each semester* for undergraduates.

Credit for first-year graduate students, candidates for the master's degree, is counted in units. A unit course is one which requires ten hours of time a week through one semester, irrespective of the distribution of that time in class work, laboratory work, and private study; four such courses or their equivalent constitute a full minimum program for one semester. The unit values of graduate courses (numbered 100 and upward) are indicated in the following pages. Courses of the intermediate groups "for graduates and advanced undergraduates," are in general (unless otherwise specified by the department concerned) evaluated as follows for graduate credit: (a) courses open only to students having at least senior standing, 1 unit for a 4-hour or 5-hour course, $\frac{1}{2}$ unit for a 1-hour, 2-hour, or 3-hour course; (b) courses open to juniors, $\frac{1}{2}$ unit for a 4-hour or 5-hour course; $\frac{1}{4}$ unit for a 1-hour, 2-hour, or 3-hour course.

For *second-year and third-year graduate students*, candidates for the doctor's degree, no record of units is kept.

The omission of a course for the current year is indicated by enclosing the entire description of such a course in brackets.

Courses given in the summer session of 1923 are indicated by the initial letter S preceding the number and are grouped by departments after the courses given during the winter.

MAJOR: 20 hours exclusive of Botany 1 and 4, preferably made up of courses grouped along one of six lines, according to the suggestions given below.

MINOR: 20 hours chosen from not more than three subjects in the following list: bacteriology, chemistry, entomology, geology, physics, physiology, and zoology, in consultation with the department of botany. At least 8 hours must be offered in one subject.

Courses offered are of four types; the first intended to meet the needs of beginners; the second laying a foundation for methods of accuracy in observation, manipulation, and experimentation through the study of some fundamentally important subdivision of

the science; the third giving practice in methods of investigation by the study of advanced problems varied to suit the needs and interests of the student; and the fourth teaching independent research by means of thesis subjects leading to the discovery of new facts or laws.

The work of any semester may be credited separately except when a problem is left incomplete in one of the courses open to graduates.

For the convenience of undergraduates in the College of Liberal Arts and Sciences who elect major work in botany the following combination of courses is suggested:—(a) General; 2a, 4a, 23, 27a, and 27b; (b) Specializing in morphology; 2a, 2b, 4a or 24, and 29; (c) Specializing in pathology; 2a, 7a, 28a or 28b, 4a or 17a-17b; (d) Specializing in physiology; 27a-27b, 9a or 9b; (e) Specializing in taxonomy; 2a, 4a, 16b, or 17a-17b, or 26, or 28a-28b; (f) Specializing in ecology; 4a, 23, 24, 25a-25b, and 27a.

Students taking botany as a foundation for agronomy or horticulture are advised to select courses 27a, 4a, 7a, and advanced work on some special topic or topics under courses 7b, 9, 17a-17b, or 22b. Students who expect to teach botany are advised to elect 2a, 4a, 23, 27a, 30, and advanced work in one or more of the special courses 9a-9b, 16b, 17a-17b, or 25a-25b.

The prerequisite for major work in botany in the Graduate School is 20 semester hours in botany or 15 hours in botany plus 5 hours in zoology or entomology.

Those continuing in the second year should take Chemistry 5a and 5b or 13a and 25. In the third year Chemistry 14a, 14b, 14c and 14d or 9 and 9c, 31, and 33 should be taken. With these, more special courses may be taken, but students are not advised to take the special courses unless they have had the fundamental work represented by the selection given above. Students who desire a training for professional work in chemistry, either as teachers or in its industrial applications, should take the curriculum in chemistry, or in chemical engineering.

Students who find it impossible to take more than one semester's work are requested to register in Chemistry 1 or 1a in the second semester rather than in the first.

COURSES FOR GRADUATES

Graduate work in history presupposes two years of college work in this subject, or 16 semester hours, which should include courses in European and American history corresponding roughly to History 1a-1b and 3a-3b in this University. Linguistic preparation, especially in French and German, is important. For medieval history some knowledge of Latin is essential, and Spanish is useful for certain fields of American history.

Advanced courses in history at the University are of three kinds: (1) For information and guidance in general reading. (2) Instruction in methodology, historiography, and biography. A part of this work (in course 103) is required of all graduate students in history during their first year. (3) Seminar courses for the study of special fields with a view to training in the methods of historical criticism and research.

ILLINOIS HISTORICAL SURVEY.—Students have an opportunity to pursue research in Western history in connection with the Illinois Historical Survey, an organization for the purpose of carrying on systematic studies in the history of Illinois.

Attention is also called to the fact that the University has for some time cooperated with the Trustees of the State Historical Library in the gathering and editing of archive material. As a result instructors and graduate students in the department have contributed from time to time to the publications of the Library, and have been given useful training in the study of manuscript and printed material.

SUMMER SESSION COURSES

The department of mathematics offers at least five courses each summer for graduates and advanced undergraduates, and these courses will be so varied as to enable advanced students to secure a suitable sequence during four or five successive summer sessions to meet the requirements for at least the master's degree. Three of these five courses are of an intermediate grade, open to advanced undergraduates as well as to graduates, while the other two are primarily for graduate students.

The intermediate courses are for the present to be devoted to the following six subjects: Theory of equations and determinants, advanced calculus, constructive geometry, advanced algebra, differential equations, and advanced analytic geometry. It is proposed to give a course on each of these subjects every two years.

The prerequisites and credit values are the same as for these courses in the regular semesters unless otherwise stated.

COURSES FOR GRADUATES

The prerequisite for graduate work in physics is a college course in general physics with a year's laboratory course in introductory physical measurements. The student who is to do major work in physics should also have had additional courses in physics or teaching experience, unless the training in his minor subjects, mathematics or chemistry, has been strong and complete. He should also have a knowledge of French and German sufficient to use references in these languages. The courses named below are those open for candidates for the Master's or Doctor's degree. A large part of the last year's work of the candidate for the Doctor's degree is investigational in either experimental or theoretical physics. In addition to these major graduate courses, the courses in elementary dynamics, heat, light, electrical measurements, and introductory electrical theory are arranged with certain additions for graduate credit. The "intermediate" courses on heat, light, and electricity and magnetism (Physics 15, 16, 17, 24) may be offered by students making a minor in physics, and with certain limitations by students in their first year of graduate work for major credit.

104a-104b. SELECTED PROBLEMS IN ELECTRICAL MEASUREMENTS.—I: Resistances; galvanometers; damping; capacities; Dolezalek electrometer; dielectric constants; the measurement of v and e/m for cathode rays; positive electricity; potentiometer. THE HISTORY OF THE
CITY OF BOSTON

The history of the city of Boston is a subject of great interest and importance. It is a city that has played a significant role in the development of the United States. The city's history is filled with events and people that have shaped the nation. From its early days as a small settlement to its current status as a major metropolitan area, Boston has a rich and varied history. The city's location on a peninsula in the harbor of Massachusetts Bay has made it a strategic and important location throughout its history. The city's early history is marked by the arrival of the first settlers in 1630, who established the Massachusetts Bay Colony. The city's growth and development were shaped by a series of events, including the American Revolution, the Boston Tea Party, and the city's role in the abolitionist movement. The city's history is a testament to the resilience and spirit of its people, who have overcome many challenges and built a city that is a source of pride and inspiration for all.

PART V

UNIVERSITY EXTENSION

Extension work has not been organized as a separate administrative unit in the University of Illinois. Several departments, however, have initiated activities, both on the campus and in the State at large, which serve to make some of the facilities of the University available to groups of mature persons who are engaged in various industries and professions.

AGRICULTURE

Each of the departments of the College of Agriculture does extension work and so far as possible provides trained specialists for this purpose. In addition to this a separate service known as Agricultural College Extension conducts extension enterprises that do not deal with technical subject matter, and cooperates with the other departments in projecting their work throughout the State. Through this office correspondence with prospective students is conducted and records of former students kept.

Some of the more general Agricultural College extension enterprises are:

(1) A meeting called Farmers' Week, which has formerly been known as the Corn Growers' and Stockmen's Convention, held annually at the College of Agriculture since 1898. The work offered includes lectures, conferences, and intensive class work in animal husbandry, poultry, dairying, farm crops, soils, farm mechanics, farm management, and horticulture.

(2) Agricultural Open-House held annually the last week in June affords opportunity to get an idea of the work of the College of Agriculture and the Agricultural Experiment Station.

(3) Agricultural extension schools.

(4) Demonstrations in connection with soil-fertility and crop fields in the state.

(5) Cooperation, by furnishing instructors and lecturers, with other educational agencies for rural communities; e. g., farmers' institutes, special lecture railway trains, farm bureaus, the Boys' State Fair School.

(6) Educational exhibits at fairs and expositions.

(7) Farm Bureau and community excursions to the University.

For the Cooperative Extension Service in agriculture and home economics conducted by the University of Illinois and the United States Department of Agriculture, under the provisions of the Federal Smith-Lever Act of May 8, 1914, see page 354.

CERAMIC ENGINEERING

In addition to the regular four-year technical curriculum, the department of ceramic engineering cooperates with the clay and allied industries by offering biannually, at Urbana, during the second semester, a two weeks' industrial course in the principles underlying the manufacture of ceramic products for those who have not the time or the preparation required for

academic studies. The work includes lectures, laboratory work, practice in firing kilns, and informal gatherings for question-asking. A common school education is sufficient to enable one to do the work of this course. No charge of any kind is made.

Under the provisions of the Smith-Lever Act, approved by the President of the United States on May 8, 1914, and the terms of its acceptance by the State of Illinois, the University becomes cooperatively responsible for a system of demonstration service designed to combine the results of scientific discovery with the most approved practice on the farms and in the households of the State.

The most important lines of work undertaken under this act are as follows:

- (1) Cooperation with county farm bureaus in the employment of agricultural advisers.
- (2) Cooperation with county home improvement associations in the employment of a woman adviser.
- (3) Employment of extension specialists in agriculture and home economics as special advisers in the field.

The service in home economics extension may be classified as follows:

1. *Home Bureaus.*—Twenty-one home bureaus have been established in the state. These organizations are interested in the development of better living conditions and their educational work is directed by a home adviser. In the home bureau activities the home advisers are assisted by the group of university specialists. Thus the home bureau forms a link by which the findings of the laboratory are made operative in the homes of the people.

2. *Movable Schools.*—The extension division of home economics in so far as possible provides instruction on request for a movable school in any community which is sufficiently interested to pay the local expenses and the traveling and living expenses of a specialist from the extension staff for one week. In the counties which have home bureau organizations a similar service is given, where application is made through the home adviser, but without cost to the organization except for local expenses.

3. *Correspondence.*—The latest scientific facts are passed from the department to the general public by correspondence.

4. *Service for Organizations.*—Assistance by means of lectures, demonstrations, and study programs, has been given the following organizations:

Boys' and Girls' Clubs
Catholic Woman's Clubs
Church Organizations
Civic Leagues
Colleges
Community Fairs
Community High Schools
Community Clubs
County Fairs
County Teachers' Associations
Farm Bureaus

Farmers' Institutes
Home Bureaus
Household Science Clubs
Illinois League of Women Voters
Parent-Teachers' Associations
Social Science Clubs
State Federation of Women's Clubs
Teachers' Institutes
Township High Schools
Woman's Clubs

5. *Press.*—The local papers in the twenty-one counties in which home bureaus have been established have cooperated by giving publicity. The activities of the home bureau have been given publicity through farm journals.

Eleven of the home bureau organizations print a monthly news sheet which is mailed to the members of the organization. The other organizations send a mimeographed sheet to their members.

The Extension News, issued monthly by the home economics extension staff, is sent to the advisers and to the members of the executive boards in each home bureau organization.

By an act approved March 2, 1887, the national government appropriated \$15,000 a year to each state for the purpose of establishing and maintaining, in connection with the colleges founded upon the congressional act of 1862, agricultural experiment stations, "to aid in acquiring and diffusing among the people of the United States useful and practical information on subjects connected with agriculture, and to promote scientific investi-

gation and experiment respecting the principles and applications of agricultural science." Under this provision the *Agricultural Experiment Station of the University of Illinois* was founded in 1888 and placed under the direction of the Trustees of the University; a part of the University farm, with buildings, was assigned for its use.

The federal grant has since been increased to \$30,000 a year. This is supplemented by state appropriations which make an aggregate fund of approximately \$350,000 devoted to research in agriculture.

Investigations are conducted in the improvement of the economic production of crops; the growing and marketing of orchard fruits and of vegetables; the growing of flowers under glass; the methods of production of meats and of dairy goods, and the principles of animal breeding and of nutrition. The principal types of soil of the State are being studied in the laboratory under glass and in the field. A soil survey is in progress which when finished will map and describe the soil of every farm of the State down to an area of ten acres. Between forty and fifty fields and orchards are operated in various portions of the State for the study of local problems, and assistants are constantly on the road to conduct experiments or to give instruction to producer or consumer. The results of investigation are published in bulletins, which are issued in editions of 5,000 to 50,000 and distributed free of charge.

Much of this work is of interest to students, especially of graduate grade, and it is freely available for this purpose, so far as is consistent with the interests of the Station.

The Engineering Experiment Station of the University of Illinois is an organization within the College of Engineering. It was created by an act of the Board of Trustees on December 8, 1903, to stimulate and to elevate engineering education and to investigate problems of special importance to professional engineers and to the manufacturing, railway, mining, and other industrial interests of the State and of the country. The knowledge thus obtained is made available through bulletins presenting the results of research, and of circulars containing compilations of important information not otherwise accessible.

Control of the Station is vested in an Executive Staff composed of the Director and his Assistant, the heads of departments of the College of Engineering, and the Professor of Industrial Chemistry. This staff is responsible for the establishment of general policies governing work of the Station, including approval of material presented for publication. While all members of the teaching staff of the College are encouraged to engage in scientific research, it is conducted chiefly by the research corps composed of full-time research assistants, research graduate assistants, and special investigators. Those employed for special investigations are engaged for a limited time on a single problem.

The University now maintains fourteen research graduate assistantships in the Engineering Experiment Station. In addition, two research graduate assistantships in gas engineering have been established under the patronage of the Illinois Gas Association. These assistantships are open to graduates of approved American and foreign universities and technical schools, who are prepared to undertake graduate study in engineering, physics, or applied chemistry. Each assistantship carries a stipend of \$600 and freedom from tuition, incidental, and laboratory fees. Appointment to these positions must be accepted for two consecutive collegiate years, at the expiration of which period, if all requirements have been met, the degree of Master of Science will be conferred. Not more than half of the time of these assistants, during ten months of each year, is required in connection with the work of the department to which they are assigned; the remainder is available for graduate study.

Information concerning opportunities for graduate study in engineering will be found in the circular of the Graduate School, which may be obtained from the Dean of the Graduate School. Further details regarding appointment to the Research Graduate Assistantships will be supplied upon request by the Director of the Station.

The Station has already published 139 bulletins and 10 circulars. All these publications are regarded as contributions to the literature of engineering, and many of them present important additions to the science of engineering. All publications are distributed free to those who are on the regular mailing list of the Station, and to others upon request. After the number of copies of a particular bulletin has been reduced to an established limit, a small charge is made for each of those remaining. A charge is made for duplicate copies of a particular bulletin when these are requested by an individual, unless in special cases it is deemed advantageous to the Station to furnish such duplicates free. When ordered in large quantities, a special rate for bulletins may be made by the Director.

Upon request to the Director, the name of any person who desires to receive the publications of the Engineering Experiment Station, as they are issued, will be added to the regular mailing list. A complete list of the publications will be sent to anyone who may desire it.

Cooperative Investigations.—In addition to the research conducted with the funds assigned to the Experiment Station by the University, a number of cooperative investigations have been undertaken with funds supplied by outside agencies which are chiefly interested in a particular investigation. In undertaking such investigations, the University reserves the right to control the results secured and to publish them for the information and benefit of the public. The funds for such cooperative investigations are paid to the University and are administered by it for the special purpose for which they are provided.

The following important cooperative investigations are now in progress:

1. An investigation of chilled iron car wheels in cooperation with the Association of Manufacturers of Chilled Car Wheels.
2. An investigation of stresses in railroad track in cooperation with the American Society of Civil Engineers and the American Railway Engineering Association.
3. An investigation of problems in the mining of coal in cooperation with the United States Bureau of Mines and the State Geological Survey Division. (See statement concerning cooperative investigation of problems of Illinois mineral industries on page 371.)
4. An investigation of warm air furnaces and furnace heating in cooperation with the National Warm Air Heating and Ventilating Association.
5. An investigation of the fatigue phenomena of metals in cooperation with the Engineering Foundation, the National Research Council, the General Electric Company, the Allis-Chalmers Manufacturing Company, the Copper and Brass Research Association, and the Western Electric Company.
6. An investigation to determine the friction losses and power requirements for the ventilation of the vehicular tunnel under the Hudson River in Cooperation with the New York State and New Jersey Interstate Bridge and Tunnel Commissions.

It is the function of the State Natural History Survey to conduct a biological survey covering the entire field of the zoology and botany of the state, but giving preference to subjects of educational and economic importance; to supply natural history specimens to the state educational institutions and the public schools; to investigate the entomology of the state; to conduct experiments with methods for the prevention, arrest, abatement, and control of insects injurious to persons or property; and to publish the product of its investigations in the form of bulletins, circulars, and reports.

Its offices, collections, and experimental equipment are in the Natural History Building and the vivarium of the University and in the Entomology Building, originally provided for the State Entomologist; and its equipment for aquatic biology is mainly on the Illinois River at Peoria. It has also field stations for economic entomology—each adequately equipped for field work and life history studies in the three sections of the state—established at Aurora, Jacksonville, and Carbondale, respectively, and in charge of the three field entomologists; and it has also in active operation a forestry survey, a plant disease survey, and a survey of the plant and animal life of the waters of the state.

The library of the Survey, containing 65,800 books and pamphlets, and its zoological collections, which include 375,000 pinned insects, 26,000 bottles of insects in alcohol, and over 200,000 Illinois fishes, are available to instructors and students of the University for purposes of reference and study.

The State Water Survey Division of the State Department of Registration and Education has succeeded to the duties of the Illinois State Water Survey, which had been organized in the Department of Chemistry of the University of Illinois in 1895. Offices and special laboratories are maintained in the Chemistry Building of the University of Illinois.

A chemical survey of the waters of the State was begun by the State Water Survey in the latter part of September, 1895. In 1897 the legislature authorized the continuance of the work and directed the Trustees of the University to establish a chemical and biological survey of the waters of the State. In 1911 the legislature made an increased appropriation and imposed additional duties on the State Water Survey.

The Survey had collected data concerning water supplies and sewer systems and had surveyed many watersheds.

According to the administrative code the State Water Survey Division, cooperating with other Divisions of the Department, is to investigate and study the natural resources of the State, to prepare plans for their conservation and development, to cooperate with and advise Departments having administrative powers and duties relating to the natural resources of the State, to cooperate with similar Departments in other states and with the United States government, to study the geological formation of the State with reference to its resources in mineral and artesian water, to collect facts and data concerning the water resources of the State, to determine standards of purity for drinking water for the various sections of the State, to publish from time to time the results of its investigations of the waters of the State to the end that the available water resources may be better known and that the welfare of the people in the various communities may be conserved, to make analyses of samples of water from municipal or private sources, to consider and decide all matters pertaining to water and water resources and allied investigational and scientific research, to cooperate with the University of Illinois in the use of scientific staff and equipment, and to cooperate with the various Departments in research, investigational, and scientific work, useful in the prosecution of the work of any Department.

STATE GEOLOGICAL SURVEY DIVISION

The work of the State Geological Survey Division is administered under the State Department of Registration and Education by a Board of Natural Resources and Conservation through one of its sub-committees.

Topographic Surveys

WILLIAM H HERRON, B.S., *Geographer in charge of Cooperative Topographic Surveys*, Urbana, and Washington, D. C.

The Survey cooperates actively with other State departments and technical divisions on problems having a geologic or engineering aspect.

In carrying out the primary purpose of the organization, field parties make investigations of oil, clay, coal, stone, molding sand, artesian water, cement materials, road materials, and general scientific problems. They also conduct surveys for the completion of topographic and geologic maps of the State, in part in cooperation with the United States Geological Survey. During the 1923 field season surveys were made in sixteen counties covering approximately 2,500 square miles. At the close of 1923, approximately 20,750 square miles, representing 37 percent of the State, had been completed. Eight county maps have been made by combining and republishing the atlas sheets in county units, and it is planned to add to the list of county maps as rapidly as the necessary surveys are completed.

Especial attention has been given to the study of available materials for use in constructing highways, in accordance with the hard-road program which is being fostered by State and National governments.

Another recent and special investigation relates to the study of the molding sand deposits of the State, with a view to discovering satisfactory substitution of sands obtained within the State for those which are now being shipped from great distances.

The program of topographic mapping is going forward at a rate designed to complete the map of the State in ten years. In addition to the usual quadrangle surveys special areas have been topographically mapped to serve the immediate needs of the Highway Division for the selection of road routes, of the Water Survey Division and the Department of Public Health for use in recommending public water supplies, and of the Division of Waterways for the study of problems in navigation and flood control. Other irregular areas in need of drainage reclamation are also being surveyed rapidly.

The offices and laboratory quarters in the Ceramics Building are equipped for the conduct of the work of the Survey. Thousands of drill records, detailed mine notes, coal analyses, and other data on economic resources of Illinois form an active and growing collection. From it is drawn much of our knowledge of the geology and mineral resources of the State.

To date sixty-two volumes, eighteen of them in the Mining Investigations series, have been published, as well as numerous drainage, topographic, structural, and geologic maps.

Under an agreement between the College of Engineering, the United States Bureau of Mines, and the State Geological Survey Division, a station has been located at Urbana for a cooperative investigation of the Illinois mining industry, and the various agencies contribute men and funds for investigations under an agreed program.

THE ENGINEERING EXPERIMENT STATION

Through the Department of Mining Engineering of the University of Illinois, the State Geological Survey, and the United States Bureau of Mines, the Engineering Experiment Station is cooperating throughout the State in investigations and dissemination of information, with a view to improving conditions in the mining, quarrying, metallurgical, and other mineral industries, safeguarding life among employees, preventing unnecessary waste of resources, and otherwise contributing to the advancement of these industries, under authority granted by the Forty-seventh General Assembly.

The University, through the Engineering Experiment Station, furnishes offices and laboratory facilities for the Bureau in Urbana, and takes part, through the Department of Mining Engineering, both in field work and in publication.

The State Geological Survey adds to the cooperation a staff of geologists who are giving particular attention to the mineral resources of the State and to other geological problems.

The United States Bureau of Mines has established a mining experiment station at Urbana, with offices in the Ceramic Engineering Building which are headquarters for the technical staff of Bureau engineers working in this district.

Through the cooperation of the three contracting parties, a staff of trained engineers, geologists, and metallurgists is at the disposal of the mining and metallurgical industries of Illinois.

BOARD OF EXAMINERS

James P McGregor, C.P.A., *Chairman*, Chicago

By a law passed in 1903 the State University is made an examining board of applicants for certificates as certified public accountants. To carry out the provisions of the law the Board of Trustees has appointed a board of three examiners to prepare, conduct, and grade examinations, and a University committee to conduct the routine work. Under the law one examination must be held each year in May, but examinations have been held also in November or December of each year in which there were a sufficient number of applicants.

Applicants for the certificate of Certified Public Accountant are required to pass examinations in the theory of accounts, commercial law, auditing, and practical accounting.

The Illinois Society of Certified Public Accountants offers annually a gold medal and a silver medal to be awarded, respectively, to the persons passing the C. P. A. examination with the highest total marking in all subjects and with the second highest total marking in all subjects.
